

INDEX TO VOL. C. (A)

- Acoustic disturbances produced by small bodies in plane waves in water (Wood and Young), 261.
- Address of the President, 353.
- Adsorption of gas by charcoal, etc. (Briggs), 88.
- Aluminium, production of single crystals of, and their tensile properties (Carpenter and Elam), 329.
- Armstrong (E. F.) and Hilditch (T. P.) A Study of Catalytic Actions at Solid Surfaces. Part VII.—The Influence of Pressure on the Rate of Hydrogenation of Liquids in Presence of Nickel, 240.
- Aurora line in spectrum of night sky (Rayleigh), 367.
- Bairstow (L.), Cave (B. M.), and Lang (E. D.) The Two-dimensional Slow Motion of Viscous Fluids, 394.
- Ballistics, principles of internal (Proudman), 289.
- Bateman (H.) On the Numerical Solution of Linear Integral Equations, 441.
- Beta-rays, scattering of (Crowther and Schonland), 526.
- Bieler (E. S.) On the Currents induced in a Conductor by the Passage of a Mass of Magnetic Material over it, 50.
- Bishop (E.) See Burton and Bishop.
- Bone (W. A.) and Haward (W. A.) Gaseous Combustion at High Pressures. Part II.—The Explosion of Hydrogen-Air and Carbon Monoxide-Air Mixtures, 67.
- Bone (W. A., and others). Researches on the Chemistry of Coal. Part II.—The Resinic Constituents and Coking Propensities of Coals, 582.
- Briggs (H.) The Adsorption of Gas by Charcoal, Silica, and other Substances, 88.
- Burton (E. F.) and Bishop (E.) The Law of Distribution of Particles in Colloidal Solution, 414.
- Campbell (C.) See Dixon (H. B., and others).
- Carpenter (H. C. H.) and Elam (C. F.) The Production of Single Crystals of Aluminium and their Tensile Properties, 329.
- Catalytic actions at solid surfaces. VII (Armstrong and Hilditch), 240.
- Cave (B. M.) See Bairstow, Cave, and Lang.
- Coal, chemistry of. Part II.—Resinic constituents and coking propensities (Bone and others), 582.
- Colloidal solution, distribution of particles in (Burton and Bishop), 414.
- Crowther (J. A.) and Schonland (B. F. J.) On the Scattering of β -Rays, 526.
- Currents induced in conductor by magnetic material (Bieler), 50.
- Davies (A. C.) The Minimum Electron Energies associated with the Excitation of the Spectra of Helium, 599.
- Decomposition of formic acid, influence of temperature on (Hinshelwood and others), 575.
- Dingle (H.) Revision of Series in the Arc Spectrum of Mercury, 167.
- Dixon (H. B. and others). On the Velocity of Sound in Gases at High Temperatures, and the Ratio of the Specific Heats, 1.
- Doodson (A. T.) The Harmonic Development of the Tide-generating Potential, 305.
- Doubleday (I.) See Hardy and Doubleday.

- Earth, geological effects of cooling of (Jeffreys), 122.
- Elam (C. F.) See Carpenter and Elam.
- Electromagnetic waves, diffraction of plane, by perfectly reflecting sphere (White), 505.
- Electron energies associated with excitation of spectra of helium (Davies), 599.
- Ewing (Sir J. A.) The Atomic Process in Ferromagnetic Induction, 449.
- Explosion of hydrogen-air and CO-air mixtures (Bone and Haward), 67.
- Explosions, thermodynamical theory of (Henderson and Hassé), 461.
- Ferromagnetic induction, atomic process in (Ewing), 449.
- Fluids, experiments with rotating (Taylor), 114.
- Gaseous combustion at high pressures (Bone and Haward), 67.
- Gifford (J. W.) Atmospheric Pressure and Refractive Indices, with a corresponding Table of Indices of Optical Glass, 621.
- Hardy (W. B.) and Doubleday (I.) Boundary Lubrication.—The Paraffin Series, 550.
- Harle (H.) On the Viscosities of the Hydrogen Halides, 429.
- Hartley (H.) See Hinshelwood, Hartley, and Topley.
- Hassé (H. R.) See Henderson and Hassé.
- Havelock (T. H.) The Effect of Shallow Water on Wave Resistance, 499.
- Haward (W. A.) See Bone and Haward.
- Heat conduction, problem in theory of (Nicholson), 226.
- Heats, ratio of specific, and velocity of sound in gases (Dixon and others), 1; — ratio of specific, of air and carbon dioxide (Partington), 27; — specific, of air, steam, and CO₂ (Womersley), 483.
- Helium, electron energies associated with excitation of spectra of (Davies), 599.
- Henderson (Sir J. B.) and Hassé (H. R.) A Contribution to the Dynamical Theory of Explosions.—Parts I and II, 461.
- Hilditch (T. P.) See Armstrong and Hilditch.
- Hinshelwood (C. N.), Hartley (H.), and Topley (B.) The Influence of Temperature on two Alternative Modes of Decomposition of Formic Acid, 575.
- Hydrogen, structure of Balmer series of lines of (McLennan and Lowe), 217.
- Hydrogenation of liquids in presence of nickel, influence of pressure on (Armstrong and Hilditch), 240.
- Hydrophones, "light body" (Wood and Young), 252.
- Induction of coaxial circles, formulæ for calculation (King), 60.
- Interferometer, new form of (Waran), 419.
- Jeffreys (H.) On certain Geological Effects of the Cooling of the Earth, 122.
- King (L. V.) On some New Formulæ for the Numerical Calculation of the Mutual Induction of Coaxial Circles, 60.
- Lang (E. D.) See Bairstow, Cave, and Lang.
- Lead isotopes, spectra of (Merton), 84.
- Lees (C. H.) The Thermal Stresses in Spherical Shells concentrically heated, 379.
- Light, absorption of, by mercury vapour (Metcalf and Venkatesachar), 149.
- Linear integral equations, numerical solution of (Bateman), 441.
- Lowe (P.) See McLennan and Lowe.
- Lubrication, boundary.—Paraffin series (Hardy and Doubleday), 550.
- McLennan (J. C.) The Spectrum of Ionised Potassium, 182; — On the Refractive Indices of Mercury and Thallium Vapours, 191.

- McClennan (J. C.) and Lowe (P.) On the Structure of the Balmer Series Lines of Hydrogen, 217.
- McLennan (J. C.) and Shaver (W. W.) On the Emission and Absorption Spectra of Mercury, 200.
- Mercury vapour, absorption of light by (Metcalf and Venkatesachar), 149 ; — revision of series in arc spectrum of (Dingle), 167 ; — emission and absorption spectra of (McLennan and Shaver), 200.
- Merton (T. R.) On the Spectra of Lead Isotopes, 84.
- Metcalf (E. P.) and Venkatesachar (B.) On the Absorption of Light by Electrically Luminescent Mercury Vapour, 149.
- Microphones, directional properties of (Wood and Young), 252.
- Muirhead (A.) Obituary notice of, viii.
- Nicholson (J. W.) A Problem in the Theory of Heat Conduction, 226.
- Obituary Notices :—
- Odling, W., i.
Muirhead, A., viii.
- Odling (W.) Obituary Notice of, i.
- Parker (A.) See Dixon (H. B., and others).
- Partington (J. R.) The Ratio of the Specific Heats of Air and of Carbon Dioxide, 27.
- Pearson (A. R.) See Bone and others.
- Photographic efficiency of heterogeneous light (Toy), 109.
- Potassium, spectrum of ionised (McLennan), 182.
- Proudman (J.) The Principles of Internal Ballistics, 289.
- Raman (C. V.) and Ray (B.) On the Transmission Colours of Sulphur Suspensions, 102.
- Raman (C. V.) and Sutherland (G. A.) On the Whispering-Gallery Phenomenon, 424.
- Ray (B.) See Raman and Ray.
- Rayleigh (Lord.) The Aurora Line in the Spectrum of the Night Sky, 367.
- Refractive indices and atmospheric pressure, with table of indices (Gifford), 621.
- Refractive indices, mercury and thallium (McLennan), 191.
- Schonland (B. F. J.) See Crowther and Schonland.
- Shaver (W. W.) See McLennan and Shaver.
- Sherrington (C. S.) Address at Anniversary Meeting, November 30, 1921, 353.
- Sinkinson (E.) See Bone and others.
- Sound, velocity of, in gases at high temperatures (Dixon and others), 1.
- *Spectra of helium, electron energies associated with excitation of (Davies), 599.
- Spectrum of mercury (Dingle), 167 ; (McLennan and Shaver), 162 ; — of night sky (Rayleigh), 367 ; — potassium (McLennan), 182 ; — hydrogen (McLennan and Lowe), 217.
- Stockings (W. E.) See Bone and others.
- Sulphur suspensions, transmission colours of (Raman and Ray), 102.
- Sutherland (G. A.) See Raman and Sutherland.
- Taylor (G. I.) Experiments with Rotating Fluids, 114.
- Thermal stresses in spherical shells (Lees), 379.
- Tide-generating potential, harmonic development of (Doodson), 305.
- Topley (B.) See Hinshelwood, Hartley, and Topley.
- Toy (F. C.) The Photographic Efficiency of Heterogeneous Light, 109.

- Venkatesachar (B.) See Metcalfe and Venkatesachar.
 Viscosities of hydrogen halides (Harle), 429.
 Viscous fluids, 2-dimensional slow motion of (Bairstow and others), 394.
- Waran (H. P.) A New Form of Interferometer, 419.
 Wave resistance, effect of shallow water on (Havelock), 499.
 Whispering-gallery phenomenon (Raman and Sutherland), 424.
 White (F. P.) The Diffraction of Plane Electromagnetic Waves by a Perfectly Reflecting Sphere, 505.
 Womersley (W. D.) The Specific Heats of Air, Steam, and Carbon Dioxide, 483.
 Wood (A. B.) and Young (F. B.) On "Light Body" Hydrophones and the Directional Properties of Microphones, 252.
 Wood (A. B.) and Young (F. B.) On the Acoustic Disturbances produced by Small Bodies in Plane Waves transmitted through Water, with special Reference to the Single-plate Direction Finder, 261.
 Young (F. B.) See Wood and Young.

END OF THE HUNDREDTH VOLUME (SERIES A).

ERRATUM.

Proceedings No. A 702.
