

## INDEX TO VOLUME CLXIX (A)

- Address of the President (Bragg), 1.  
Adsorption of double molecules, theory (Chang), 512.  
Agar (J. N.) and Bowden (F. P.) The kinetics of electrode reactions. I and II, 206.  
Aickin (R. G.), Baylis (N. S.) and Rees (A. L. G.) The effect of solvents on the continuous absorption spectrum of bromine, 234.  
Airscrew sound waves, photography of (Hilton), 174.  
Allibone (T. E.) and Meek (J. M.) The development of the spark discharge. II, 246.  
Allmand (A. J.) *See* Lizius and Allmand.  
Ammonia in water, basic strength of (Everett and Wynne-Jones), 190.  
Ammonium ion, dissociation of (Everett and Wynne-Jones), 190.  
Arnot (F. L.) and M'Ewen (M. B.) Electron transfer in mercury vapour, 437.
- Bakerian Lecture (Ingold), 149.  
Band spectrum of silicon monosulphide (Barrow and Jevons), 45.  
Barrow (R. F.) and Jevons (W.) The band spectrum of silicon monosulphide and its relation to the band spectra of similar molecules, 45.  
Baylis (N. S.) *See* Aickin and others.  
Benzene, structure of (Ingold), 149.  
Bowden (F. P.) and Leben (L.) The nature of sliding and the analysis of friction, 371.  
Bowden (F. P.) and Tabor (D.) The area of contact between stationary and between moving surfaces, 391.  
Bowden (F. P.) *See* Agar and Bowden.  
Bradfield (K. N. E.), Christopherson (D. G.) and Southwell (R. V.) Relaxation methods applied to engineering problems. IV. Problems relating to elastic stability and vibrations, 289.  
Bragg (Sir William) Address of the President, 1.  
Bromine absorption spectrum, effect of solvents on (Aickin and others), 234.  
Buckingham (R. A.) *See* Massey and Buckingham.
- Cameron (W. H. B.) and Elliott (A.) The emission band spectrum of chlorine. III, 463.  
Carbon bisulphide and water vapour, sorption of (Lizius and Allmand), 25.  
Chang (T. S.) Statistical theory of the adsorption of double molecules, 512.  
Childs (W. H. J.) and Jahn (H. A.) A new Coriolis perturbation in the methane spectrum. III, 451.  
Childs (W. H. J.) and Jahn (H. A.) The spectrum of mono-deuteromethane in photographic infra-red. I. Preparation of the gas, and measurements of a simple band at  $9021\text{ cm.}^{-1}$ , 428.  
Christopherson (D. G.) *See* Bradfield and others.  
Co-operative assemblies, statistical mechanics of (Guggenheim), 134.  
Coriolis perturbation in the methane spectrum (Childs and Jahn), 451.  
Cosmic-ray particles, scattering (Williams), 531.

- Coulson (C. A.) The electronic structure of some polyenes and aromatic molecules. VII. Bonds of fractional order by the molecular orbital method, 413.
- Critical and co-operative phenomena (Lennard-Jones and Devonshire), 317.
- Curran (S. C.), Dee (P. I.) and Petřilka (V.) The excitation of X-radiation in process of proton capture by light elements, 269.
- Dee (P. I.) *See* Curran and others.
- Devonshire (A. F.) *See* Lennard-Jones and Devonshire.
- Diffusion of radon gas mixtures (Hirst and Harrison), 573.
- Dynamical continuum, Hamilton-Jacobi theory (Weiss), 102.
- Elastic stability and vibrations, problems (Bradfield and others), 289.
- Electrode reactions, kinetics of (Agar and Bowden), 206.
- Electro-dynamics, Hamilton-Jacobi theory, 119.
- Electron ferromagnetism (Stoner), 339.
- Electron transfer in mercury vapour (Arnot and M'Ewen), 437.
- Electrons, fast, scattering (Williams), 531.
- Elliott (A.) A band spectrum attributed to NBr, 469.
- Elliott (A.) *See* Cameron and Elliott.
- Energy and specific heat (Stoner), 339.
- Everett (D. H.) and Wynne-Jones (W. F. K.) The dissociation of the ammonium ion and the basic strength of ammonia in water, 190.
- Friction, analysis of (Bowden and Leben), 371.
- Guggenheim (E. A.) The statistical mechanics of co-operative assemblies, 134.
- Hamilton-Jacobi theory (Weiss), 102, 119.
- Harrison (G. E.) *See* Hirst and Harrison.
- Helium, low temperature properties of (Massey and Buckingham), 205.
- Hilton (W. F.) The photography of airscrew sound waves, 174.
- Hirst (W.) and Harrison (G. E.) The diffusion of radon gas mixtures, 573.
- Ingold (C. K.) The Bakerian Lecture. The structure of benzene, 149.
- Ionic recombination in air (Sayers), 83.
- Jahn (H. A.) *See* Childs and Jahn.
- Jevons (W.) *See* Barrow and Jevons.
- Lennard-Jones (J. E.) and Devonshire (A. F.) Critical and co-operative phenomena. III. A theory of melting and the structure of liquids, 317.
- Leben (L.) *See* Bowden and Leben.
- Lizius (J. L.) and Allmand (A. J.) The simultaneous sorption of carbon bisulphide and water vapour by activated charcoals, 25.
- M'Ewen (M. B.) *See* Arnot and M'Ewen.
- Massey (H. S. W.) and Buckingham (R. A.) The low temperature properties of gaseous helium, 205.

- Meek (J. M.) *See* Allibone and Meek.
- Melting, and structure of liquids, a theory of (Lennard-Jones and Devonshire), 317.
- Molecular orbital method (Coulson), 413.
- Mono-deuteromethane, spectrum in photographic infra-red (Childs and Jahn), 428.
- Paraffin wax, polar molecules in (Sillars), 66.
- Petržilka (V.) *See* Curran and others.
- Polar molecules in solid paraffin wax, behaviour of (Sillars), 66.
- Polyenes and aromatic molecules, electronic structure of (Coulson), 413.
- Presidential Address (Bragg), 1.
- Price (W. C.) and Simpson (D. M.) The absorption spectra of carbon dioxide and carbon oxysulphide in the vacuum ultra-violet, 501.
- Proton capture by light elements (Curran and others), 269.
- Rees (A. L. G.) *See* Aickin and others.
- Relaxation methods applied to engineering problems (Bradfield and others), 289.
- Relaxation methods applied to linear systems (Temple), 476.
- Sayers (J.) Ionic recombination in air, 83.
- Silicon monosulphide, band spectrum of (Barrow and Jevons), 45.
- Sillars (R. W.) The behaviour of polar molecules in solid paraffin wax, 66.
- Simpson (D. M.) *See* Price and Simpson.
- Sliding, the nature of (Bowden and Leben), 371.
- Solvents, effect on continuous absorption spectrum of bromine (Aickin and others), 234.
- Sorption of carbon bisulphide and water vapour by activated charcoals (Lizius and Allmand), 25.
- Southwell (R. V.) *See* Bradfield and others.
- Spark discharge, development of (Allibone and Meek), 246.
- Spectra, absorption, of carbon dioxide and oxysulphide (Price and Simpson), 502.
- Spectrum, band, attributed to NBr (Elliott), 469.
- Spectrum of chlorine, emission band (Cameron and Elliott), 463.
- Stoner (E. C.) Collective electron ferromagnetism. II. Energy and specific heat, 339.
- Surfaces, moving and stationary, area of contact between (Bowden and Tabor), 391.
- Tabor (D.) *See* Bowden and Tabor.
- Temple (G.) The general theory of relaxation methods applied to linear systems, 476.
- Weiss (P.) On the Hamilton-Jacobi theory and quantization of a dynamical continuum, 102.

Weiss (P.) On the Hamilton-Jacobi theory and quantization of generalized electro-dynamics, 119.

Williams (E. J.) Concerning the scattering of fast electrons and of cosmic-ray particles, 531.

Wynne-Jones (W. F. K.) *See* Everett and Wynne-Jones.

X-radiation, excitation of (Curran and others), 269.

END OF THE ONE HUNDRED AND SIXTY-NINTH VOLUME (SERIES A)
