

## INDEX TO VOLUME 179 (A)

- Absorption spectra of the cyclic dienes in the vacuum ultra-violet (Price & Walsh), 201.
- Adsorbed substances and insoluble monolayers, interaction (Pankhurst), 393.
- Alexander, A. E. The role of hydrogen bonds in condensed monolayers, 470.
- Alexander, A. E. A proposed general structure for condensed monomolecular films, 486.
- Alexander, E. A. & Lambert, J. D. Supersonic dispersion in gases. The activation of the acetaldehyde molecule, 499.
- Anniversary Address (Dale), 233.
- Born, M. & Sarginson, K. The effect of thermal vibrations on the scattering of X-rays, 69.
- Bragg, Sir William. The diffuse spots in X-ray photographs, 51.
- Bragg, Sir William. The diffuse spots in X-ray crystal photographs, 94.
- Bragg, Sir W. Lawrence. Diffraction of monochromatic X-rays by crystals at high temperature, 61.
- Broda, E. E. & Goodeve, C. F. The behaviour of visual purple at low temperature, 151.
- Buckingham, R. A., Hamilton, J. & Massey, H. S. W. The low-temperature properties of gaseous helium, II, 103.
- Buckingham, R. A. & Massey, H. S. W. The scattering of neutrons by deuterons and the nature of nuclear forces, 123.
- Carbon, heat of sublimation (Kynch & Penney), 214.
- Chapman, S. & Cowling, T. G. The velocity of diffusion in a mixed gas; the second approximation, 159.
- Cosmic-ray showers, penetrating (Jánosy), 361.
- Cowling, T. G. *See* Chapman & Cowling.
- Dale, Sir Henry. Anniversary Address, 233.
- Danby, C. J. & Hinshelwood, C. N.. The polymerization of olefines induced by free radicals, 169.
- Darwin, C. G. Diffuse reflexions of X-rays by crystals, 65.
- Diffuse reflexions of X-rays by crystals. *See* Discussion.
- Discussion on diffuse reflexions of X-rays by crystals, 1, 289. *See* Born & Sarginson, Bragg, Bragg, Darwin, Finch, Jahn, Lonsdale, Lonsdale & Smith, Preston, Raman.
- Equilibrium constant of ammonia, pressure dependence (Fuchs), 433.
- Finch, G. I. Diffuse reflexions of X-rays by crystals, 67.
- Fuchs, K. The vapour-pressure curve, 194.
- Fuchs, K. Statistical mechanics of binary systems, 340.
- Fuchs, K. The statistical mechanics of many component gases, 408.
- Fuchs, K. Pressure dependence of the equilibrium constant of ammonia, 433.
- Fürth, R. An elementary theory of thermal diffusion, 461.

- Gaseous helium, low temperature properties (Buckingham, Hamilton & Massey), 103.
- Gaydon, A. G. The spectra of chilled hydrocarbon flames, 439.
- Goodeve, C. F. *See* Broda & Goodeve.
- Hamilton, J. *See* Buckingham, Hamilton & Massey.
- Hinshelwood, C. N. *See* Danby & Hinshelwood.
- Isotope effects in some acid phosphates (Ubbelohde & Woodward), 399.
- Jahn, H. A. The Faxén-Waller theory and the surfaces of isodiffusion for cubic crystals, 320.
- Jánossy, L. Penetrating cosmic-ray showers, 361.
- Kynch, G. J. & Penney, W. G. On the heat of sublimation of carbon and on some absorption bands of three mesomeric hydrocarbons, 214.
- Lambert, J. D. *See* Alexander & Lambert.
- Laplace's differential equations for tides (Proudman), 261.
- Lonsdale, K. Extra reflexions from the two types of diamond, 315.
- Lonsdale, K. & Smith, H. An experimental study of diffuse X-ray reflexion by single crystals, 8.
- Massey, H. S. W. *See* Buckingham, Hamilton & Massey, *and* Buckingham & Massey.
- Monolayers, condensed, hydrogen bonds in (Alexander), 470.
- Monomolecular films, condensed, structure (Alexander), 486.
- Olefines, polymerization induced by free radicals (Danby & Hinshelwood), 169.
- Pallasites, structure and mode of formation (Rayleigh), 386.
- Pankhurst, K. G. A. Interaction between adsorbed substances of simple constitution and insoluble monolayers, II, 393.
- Penney, W. G. *See* Kynch & Penney.
- Preston, G. D. Anomalous reflexions in X-ray patterns, I.
- Price, W. C. & Walsh, A. D. The absorption spectra of the cyclic dienes in the vacuum ultra-violet, 201.
- Proudman, J. On Laplace's differential equations for the tides, 261.
- Raman, Sir C. Venkata. Reflexion and scattering of X-rays with change of frequency, 289, 302.
- Rayleigh, Lord. The stone-iron meteorites called pallasites: a synthetic study of their structure and probable mode of formation, 386.
- Sarginson, K. *See* Born & Sarginson.
- Scattering of neutrons by deuterons and the nature of nuclear forces (Buckingham & Massey), 123.
- Smith, H. *See* Lonsdale & Smith.

- Smith, S. L. & Wood, W. A. A stress-strain curve for the atomic lattice of mild steel, and the physical significance of the yield point of a metal, 450.
- Soddy, F. The summation of infinite harmonic series, 377.
- Spectra of chilled hydrocarbon flames (Gaydon), 439.
- Statistical mechanics of binary systems (Fuchs), 340.
- Statistical mechanics of many component gases (Fuchs), 408.
- Steel, mild, atomic lattice (Smith & Wood), 450.
- Summation of infinite harmonic series (Soddy), 377.
- Supersonic dispersion in gases (Alexander & Lambert), 499.
- Thermal diffusion theory (Fürth), 461.
- Tides, Laplace's differential equations (Proudman), 261.
- Ubbelohde, A. R. & Woodward, I. Structure and thermal properties associated with some hydrogen bonds in crystals, IV, 399.
- Vapour-pressure curve (Fuchs), 194.
- Velocity of diffusion in a mixed gas (Chapman & Cowling), 159.
- Visual purple, behaviour at low temperature (Broda & Goodeve), 151.
- Walsh, A. D. *See* Price & Walsh.
- Wood, W. A. *See* Smith & Wood.
- Woodward, I. *See* Ubbelohde & Woodward.
- X-rays, diffuse reflexions by crystals. *See* Discussion.
- Yield point of metal, significance (Smith & Wood), 450.
