

INDEX TO VOLUME 181 (A)

- Absorption of light in potassium vapour (Ditchburn, Tunstead & Yates), 386.
Amino-acid and the structure of proteins, Bakerian Lecture (Chibnall) (Abstract), 210.
Andrade, E. N. da C. Newton and the science of his age, 227.
Anniversary address (Dale), 211, 224.
- Bakerian Lecture. Amino-acid analysis and the structure of proteins (Chibnall) (Abstract), 210.
Bartlett, F. C. Fatigue following highly skilled work, Ferrier Lecture (Abstract), 329.
Bhabha, H. S. & Chakrabarty, S. K. The cascade theory with collision loss, 267.
Binary systems, statistics (Fuchs), 411.
Binary systems, statistics (Wannier), 409.
Binnie, A. M. & Green, J. R. An electrical detector of condensation in high-velocity steam, 134.
Blackman, M. On the relation of Debye theory and the lattice theory of specific heats, 58.
Bondi, H. On the generation of waves on shallow water by wind, 67.
Boundary lubrication, influence of temperature (Frewing), 23
- Cascade theory with collision loss (Bhabha & Chakrabarty), 267.
Chakrabarty, S. K. *See* Bhabha & Chakrabarty.
Chibnall, A. C. Bakerian Lecture. Amino-acid analysis and the structure of proteins (Abstract), 210.
Chromium structure (Hume-Rothery & Wyllie), 331.
Condensation in high-velocity steam, electrical detector (Binnie & Green), 134.
Cooke, A. H. & Hull, R. A. Thermal insulation at very low temperatures, 83.
Coulson, C. A. & Duncanson, W. E. Molecular wave functions for lithium, 378.
Cosmic rays, penetrating non-ionizing (Jánossy & Rochester), 399.
- Dale, Sir Henry Anniversary address, 211, 224.
Daniel, V. & Lipson, H. An X-ray study of the dissociation of an alloy of copper, iron and nickel, 368.
Debye theory and the lattice theory of specific heats (Blackman), 58.
4:4'-dinitrodiphenyl, crystal structure (Niekerk), 314.
Ditchburn, R. N., Tunstead, J. & Yates, J. G. The continuous absorption of light in potassium vapour, 386.
Duncanson, W. E. *See* Coulson & Duncanson.
- Elastic scattering of fast positrons by heavy nuclei (Massey), 14.
Electrical detector of condensation in high-velocity steam (Binnie & Green), 134.
Energy of homogeneous groups of α -particles and protons and of fast neutrons (Powell), 344.
- Ferrier Lecture. Fatigue following highly skilled work (Bartlett) (Abstract), 329.
Flame spectra in the photographic infra-red (Gaydon), 197.
Freezing-points of solutions of typical colloidal electrolytes (Johnston & McBain), 119.
Frewing, J. J. The influence of temperature on boundary lubrication, 23.
Frye, J. H. & Hume-Rothery, W. The hardness of primary solid solutions with special reference to alloys of silver, 1.
Fuchs, K. On the statistics of binary systems, 411.

- Gaydon, A. G. Flame spectra in the photographic infra-red, 197.
Geiger counter, method of determining half-value periods (Ward), 183.
Graphite, structure (Lipson & Stokes), 101.
Green, J. R. *See* Binnie & Green.
Guggenheimer, K. M. On nuclear energy levels, 169.
- Hardness of primary solid solutions with special reference to alloys of silver (Frye & Hume-Rothery), 1.
Harrison, G. E. The thermal diffusion of radon gas mixtures, 93.
Hepner, W. & Peierls, R. Non-central forces in the nuclear two-body problem, 43.
Hoselitz, K. & Sucksmith, W. A magnetic study of the two-phase iron-nickel alloys, 303.
Hull, R. A. *See* Cooke & Hull.
Hume-Rothery, W. & Wyllie, R. J. The structure of electro-deposited chromium, 331.
Hume-Rothery, W. *See also* Frye & Hume-Rothery.
- Iron-nickel alloys, magnetic study (Hoselitz & Sucksmith), 303.
- Jánossy, L. & Rochester, D. G. Penetrating non-ionizing cosmic rays, 399.
Jeans, Sir James. Newton and the science of today, 251.
Jeffreys, H. A derivation of the tidal equations, 20.
Johnston, S. A. & McBain, J. W. Freezing-points of solutions of typical colloidal electrolytes; soaps, sulphonates, sulphates and bile salt, 119.
Jones, F. W., Leech, P. & Sykes, C. Precipitation in single crystals of silver-rich and copper-rich alloys of the silver-copper system, 154.
- Leech, P. *See* Jones, Leech & Sykes.
Lipson, H. & Stokes, A. R. The structure of graphite, 101.
Lipson, H. *See also* Daniel & Lipson.
Lithium, molecular wave functions (Coulson & Duncanson), 378.
- McBain, J. W. *See* Johnston & McBain.
Massey, H. S. W. The elastic scattering of fast positrons by heavy nuclei, 14.
- Newton tercentenary celebrations, 223–266:
 presidential address (Dale), 224;
 Newton and the science of his age (Andrade), 227;
 Newton as an experimenter (Rayleigh), 244;
 Newton and the science of today (Jeans), 251;
 exhibits, 263.
- van Niekerk, J. N. The crystal structure of 4:4'-dinitrodiphenyl, 314.
Non-central forces in the nuclear two-body problem (Hepner & Peierls), 43.
Nuclear energy levels (Guggenheimer), 169.
- Pebbles, natural and artificial, the ultimate shape (Lord Rayleigh), 107.
Peierls, R. *See* Hepner & Peierls.
Phthalocyanines and porphins, thermal expansion (Ubbelohde & Woodward), 415.
Powell, C. F. Application of the photographic method to problems in nuclear physics.
 I. The determination of the energy of (*a*) homogeneous groups of α -particles and protons, (*b*) of fast neutrons, 344.
- Precipitation in single crystals of silver-rich and copper-rich alloys of the silver-copper system (Jones, Leech & Sykes), 154.

- Rayleigh, Lord. Newton as an experimenter, 244.
 Rayleigh, Lord. The ultimate shape of pebbles, natural and artificial, 107.
 Rochester, D. G. *See* Jánossy & Rochester.
- Silver alloys, hardness of primary solid solutions (Frye & Hume-Rothery), 1.
 Silver-copper system, precipitation in single crystals of silver-rich and copper-rich alloys (Jones, Leech & Sykes), 154.
 Smith, S. L. & Wood, W. A. A stress-strain curve for the atomic lattice of mild steel in compression, 72.
 Stokes, A. R. *See* Lipson & Stokes.
 Stress-strain curve for the atomic lattice of mild steel in compression (Smith & Wood), 72.
 Sucksmith, W. *See* Hoselitz & Sucksmith.
 Sykes, C. *See* Jones, Leech & Sykes.
- Thermal diffusion of radon gas mixtures (Harrison), 93.
 Thermal expansion of phthalocyanines and porphins (Ubbelohde & Woodward), 415.
 Thermal insulation at very low temperatures (Cooke & Hull), 83.
 Tidal equations, derivation (Jeffreys), 20
 Trichromatic theory of vision (Walters), 106.
 Tunstead, J. *See* Ditchburn, Tunstead & Yates.
- Ubbelohde, A. R. & Woodward, I. Structure and thermal properties of crystals.
 V. Thermal expansion of phthalocyanines and porphins, 415.
- Walters, H. V. Some experiments on the trichromatic theory of vision (Abstract), 106.
 Wannier, G. H. Some remarks on the statistics of binary systems, 409.
 Ward, A. G. A new method of determining half-value periods from observations with a single Geiger counter, 183.
 Waves, generation on shallow water by wind (Bondi), 67.
 Wilson, A. J. C. The reflexion of X-rays from the anti-phase nuclei of AuCu_3 , 360.
 Wood, W. A. *See* Smith & Wood.
 Woodward, I. *See* Ubbelohde & Woodward.
 Wyllie, R. J. *See* Hume-Rothery & Wyllie.
- X-rays, reflexion from anti-phase nuclei of AuCu_3 (Wilson), 360.
 X-ray study of the dissociation of an alloy of copper, iron and nickel (Daniel & Lipson), 368.
- Yates, J. G. *See* Ditchburn, Tunstead & Yates.

ERRATUM

On page 210, line 5, *for* Bermann *read* Bergmann.
