INDEX TO VOLUME 205 (A)

Adsorption on evaporated tungsten films. I. Oxygen and carbon monoxide chemisorption and the determination of film surface areas (Rideal & Trappall), 409.

Allen, D. N. de G. & Sopwith, D. G. The stresses and strains in a partly plastic thick tube under internal pressure and end-load, 69.

Ambrose, E. J. & Elliott, A. The structure of synthetic polypeptides. II. Investigations with polarized infra-red spectroscopy, 47.

Anniversary Address (Robinson), 1.

Application of variational methods to atomic scattering problems. I. The elastic scattering of electrons by hydrogen atoms (Massey & Moiseiwitsch), 483.

Aspects of the chemical statics and dynamics of proteins in solution (Moelwyn-Hughes), 60.

Bardwell, J. & Hinchelwood, Sir Cyril. The cool flame of methyl ethyl ketone, 375.

Binnie, A. M. The theory of waves travelling on the core in a swirling liquid, 530.

Bleaney, B. & Ingram, D. J. E. The paramagnetic resonance spectra of two salts of manganese, 336.

Bradley, R. S. Rates of evaporation. IV. The rate of evaporation and vapour pressure of rhombic sulphur, 553.

Catalyzed polymerization of gaseous formaldehyde (Bevington & Norrish), 516.

Clemmow, P. C. A method for the exact solution of a class of two-dimensional diffraction problems, 286.

Cool flame of methyl ethyl ketone (Bardwell & Hinchelwood), 375.

Copper and iron crystals, deformation by abrasion (Evans, Layton & Wilman), 17.

Craven, P. M. & Lambert, J. D. The viscosities of organic vapours, 439.

Deformation of copper and iron crystals by unidirectional abrasion (Evans, Layton & Wilman), 17.

Dielectric constant method of following the non-stationary state in polymerization. I. The theory of the method (Burrell, Majury & Melville), 309.

Dielectric constant method of following the non-stationary state in polymerization. II. The operation and performance of the instrument (Majury & Melville), 323.

Dielectric constant method of following the non-stationary state in polymerization. III. The determination of rates of polymerization and of radical lifetimes (Majury & Melville), 496.
