

## INDEX TO VOLUME 208 (A)

- Ambrose, E. J. & Elliott, A. Infra-red spectroscopic studies of globular protein structure, 75.
- Angular distributions from ( $d, p$ ) and ( $d, n$ ) nuclear reactions (Butler), 559.
- Asymptotic behaviour of viscous fluid flow at a great distance from a cylindrical body, with special reference to Filon's paradox (Imai), 487.
- Azides (Yoffe), 188.
- Azides & fulminates (Bowden & Williams), 176.
- Berman, R. The thermal conductivities of some dielectric solids at low temperatures. (Experimental), 90.
- Bleaney, B. & Ingram, D. J. E. Paramagnetic resonance and hyperfine structure in four cobalt salts, 143.
- Bowden, F. P. & Young, J. E. Friction of clean metals and the influence of adsorbed films, 311.
- Bowden, F. P. & Young, J. E. Friction of diamond, graphite, and carbon and the influence of surface films, 444.
- Bowden, F. P. & Williams, H. T. Initiation and propagation of explosion in azides and fulminates, 176.
- Brown, G. E. & Ravenhall, D. G. On the interaction of two electrons, 552.
- Butler, S. T. Angular distributions from ( $d, p$ ) and ( $d, n$ ) nuclear reactions, 559.
- Caesium chloride, thermal transition (Menary, Ubbelohde & Woodward), 158.
- Callomon, H. J., McKean, D. C. & Thompson, H. W. Intensities of vibration bands. III. Nitrous oxide, 332.
- Callomon, H. J., McKean, D. C. & Thompson, H. W. Intensities of vibration bands. IV. Carbonyl sulphide and acetylene, 341.
- Cassels, J. M. The inelastic scattering of very slow neutrons by aluminium, 527.
- Comparison of theory and experiment for photo-ionization cross-sections (Seaton), I. Neon and the elements from boron to neon, 408.
- Comparison of theory and experiment for photo-ionization cross-sections (Seaton), II. Sodium and the alkali metals, 418.
- Concept of partial coherence in optics (Hopkins), 263.
- Cook, A. H. A note on the errors involved in the calculation of elevations of the geoid, 133.
- Dauphiné twinnings in quartz (Thomas & Wooster), 43.
- Davies, J. T. The distribution of ions under a charged monolayer, and a surface equation of state for charged films, 224.
- Davies, T. V. The theory of symmetrical gravity waves of finite amplitude. I., 475.
- Dielectric behaviour of vapours adsorbed on activated silica gel (McIntosh, Rideal & Snelgrove), 292.
- Disproportionation and combination of ethyl radicals: the photolysis of mercury diethyl (Ivin & Steacie), 25.
- Distribution of ions under a charged monolayer, and a surface equation of state for charged films (Davies), 224.
- Elliott, A. *See* Ambrose & Elliott.
- Energy density of monochromatic radiation in a dispersive medium (Pelzer), 365.
- Ethyl radicals (Ivin & Steacie), 25.
- Experiment in biophysics (Randall), 1.

- Fine-scale structure of turbulence (Townsend), 534.  
Fine structure of the  $\alpha$ -line of heavy hydrogen (Series), 277.  
Foster, E. W. Hyperfine structure in the  $5d^9 6p$  and  $5d^8 6s^2$  configuration of the spectrum of Hg III, 367.  
Friction of clean metals and the influence of adsorbed films (Bowden & Young), 311.  
Friction of diamond, graphite, and carbon and the influence of surface films (Bowden & Young), 444.
- Gaydon, A. G. & Wolfhard, H. G. Predissociation in the spectrum of OH; the vibrational and rotational intensity distribution in flames, 63.  
Geoid elevations, errors in calculation (Cook), 133.  
Gravity waves, theory (Davies), 475.
- Heavy hydrogen  $\alpha$ -line (Series), 277.  
Hinshelwood, Sir Cyril. *See* Ingold, Stubbs & Hinshelwood.  
Hopkins, H. H. The concept of partial coherence in optics, 263.  
Huang, Kun. On the interaction between the radiation field and ionic crystals, 352.  
Hume-Rothery, W., Irving, H. M. & Williams, J. R. P. The valencies of the transition elements in the metallic state, 431.  
Hyperfine structure in the  $5d^9 6p$  and  $5d^8 6s^2$  configurations of the spectrum of Hg III, (Foster), 367.
- Imai, Iaso. On the asymptotic behaviour of viscous fluid flow at a great distance from a cylindrical body, with special reference to Filon's paradox, 487.  
Inelastic scattering of very slow neutrons by aluminium (Cassels), 527.  
Infra-red spectroscopic studies of globular protein structure (Ambrose & Elliott), 75.  
Ingold, K. U., Stubbs, F. J. & Hinshelwood, Sir Cyril. The kinetics of the thermal decomposition of normal paraffin hydrocarbons. IV. Modes of rupture of the carbon chain, 285.  
Ingram, D. J. E. *See* Bleaney & Ingram.  
Initiation and propagation of explosion in azides and fulminates (Bowden & Williams), 176.  
Intensities of vibration bands. (Callomon, McKean & Thomson). III. Nitrous oxide, 332.  
Intensities of vibration bands. (Callomon, McKean & Thompson). IV. Carbonyl sulphide and acetylene, 341.  
Interaction between the radiation field and ionic crystals (Huang), 352.  
Interaction of two electrons (Brown & Ravenhall), 552.  
Iron-nitrogen system: the preparation and the crystal structures of nitrogen-austenite ( $\gamma$ ) and nitrogen-martensite ( $\alpha'$ ) (Jack), 200.  
Irving, H. M. *See* Hume-Rothery, Irving & Williams.  
Ivin, K. J. & Steacie, E. W. R. The disproportionation and combination of ethyl radicals: the photolysis of mercury diethyl, 25.
- Jack, K. H. The iron-nitrogen system: the preparation and the crystal structures of nitrogen-austenite ( $\gamma$ ) and nitrogen-martensite ( $\alpha'$ ), 200.  
Jack, K. H. The occurrence and the crystal structure of  $\alpha''$ -iron nitride; a new type of interstitial alloy formed during the tempering of nitrogen-martensite, 216.
- Kinetics of the thermal decomposition of normal paraffin hydrocarbons. IV. Modes of rupture of the carbon chain (Ingold, Stubbs & Hinshelwood), 285.  
Klemens, P. G. The thermal conductivity of dielectric solids at low temperatures. (Theoretical), 108.

- Lock, J. M. Penetration of magnetic fields into superconductors. III. Measurements on thin films of tin, lead and indium, 391.
- McIntosh, R., Rideal, E. K. & Snelgrove, J. A. The dielectric behaviour of vapours adsorbed on activated silica gel, 292.
- McKean, D. C. *See* Callomon, McKean & Thompson.
- Meksyn, D. & Stuart, J. T. Stability of viscous motion between parallel planes for finite disturbances, 517.
- Menary, J. W., Ubbelohde, A. R. & Woodward, I. The thermal transition in caesium chloride in relation to crystal structure, 158.
- Metallic transfer between sliding metals: an autoradiographic study (Rabinowicz & Tabor), 455.
- Nitrous oxide vibration-rotation bands (Thompson & Williams), 326.
- Note on the errors involved in the calculation of elevations of the geoid (Cook), 133.
- Occurrence and the crystal structure of  $\alpha'$ -iron nitride; a new type of interstitial alloy formed during the tempering of nitrogen-martensite (Jack), 216.
- Palit, Santi R. & Venkateswarlu, V. Solubilization of water in non-polar solvents by cationic detergents, 542.
- Paramagnetic resonance and hyperfine structure in four cobalt salts (Bleaney & Ingram), 143.
- Pelzer, H. Energy density of monochromatic radiation in a dispersive medium, 365.
- Penetration of magnetic fields into superconductors. III. Measurements on thin films of tin, lead and indium (Lock), 391.
- Piezocrescence—The growth of Dauphiné twinning in quartz under stress (Thomas & Wooster), 43.
- Pointwise bounds for the solutions of certain boundary-value problems (Synge), 170.
- Predissociation in the spectrum of OH; the vibrational and rotational intensity distribution in flames (Gaydon & Wolfhard), 63.
- Protein structure (Ambrose & Elliott), 75.
- Rabinowicz, E. & Tabor, D. Metallic transfer between sliding metals: an autoradiographic study, 455.
- Randall, J. T. An experiment in biophysics, 1.
- Ravenhall, D. G. *See* Brown & Ravenhall.
- Rideal, E. K. *See* McIntosh, Rideal & Snelgrove.
- Seaton, M. J. A comparison of theory and experiment for photo-ionization cross-sections. I. Neon and the elements from boron to neon, 408.
- Seaton, M. J. A comparison of theory and experiment for photo-ionization cross-sections. II. Sodium and the alkali metals, 418.
- Series, G. W. The fine structure of the  $\alpha$ -line of heavy hydrogen, 277.
- Snelgrove, J. A. *See* McIntosh, Rideal & Snelgrove.
- Solubilization of water in non-polar solvents by cationic detergents (Palit & Venkateswarlu), 542.
- Stability of viscous motion between parallel planes for finite disturbances (Meksyn & Stuart), 517.
- Steacie, E. W. R. *See* Ivin & Steacie.
- Stuart, J. T. *See* Meksyn & Stuart.

- Stubbs, F. J. *See* Ingold, Stubbs & Hinshelwood.
- Syngé, J. L. Pointwise bounds for the solutions of certain boundary-value problems, 170.
- Tabor, D. *See* Rabinowicz & Tabor.
- Temperature distribution along a radiating gas stream in which heat is being liberated by a chemical reaction (Thring), 247.
- Theory of symmetrical gravity waves of finite amplitude. I (Davies), 475.
- Thermal conductivities of some dielectric solids at low temperatures. (Experimental) (Berman), 90.
- Thermal conductivity of dielectric solids at low temperatures. (Theoretical) (Klemens), 108.
- Thermal decomposition and explosion of azides (Yoffe), 188.
- Thermal transition in caesium chloride in relation to crystal structure (Menary, Ubbelohde & Woodward), 158.
- Thomas, L. A. & Wooster, W. A. Piezocrescence—the growth of Dauphiné twinning in quartz under stress, 43.
- Thompson, H. W. *See* Callomon, McKean & Thompson.
- Thompson, H. W. & Williams, R. L. Vibration-rotation bands of nitrous oxide, 326.
- Thring, M. W. The temperature distribution along a radiating gas stream in which heat is being liberated by a chemical reaction, 247.
- Townsend, A. A. On the fine-scale structure of turbulence, 534.
- Transition elements, valencies (Hume-Rothery, Irving & Williams), 431.
- Ubbelohde, A. R. *See* Menary, Ubbelohde & Woodward.
- Valencies of the transition elements in the metallic state (Hume-Rothery, Irving & Williams), 431.
- Venkateswarlu, V. *See* Palit & Venkateswarlu.
- Vibration-rotation bands of nitrous oxide (Thompson & Williams), 326.
- Williams, H. T. *See* Bowden & Williams.
- Williams, R. J. P. *See* Hume-Rothery, Irving & Williams.
- Williams, R. L. *See* Thompson & Williams.
- Wolfhard, H. G. *See* Gaydon & Wolfhard.
- Woodward, I. *See* Menary, Ubbelohde & Woodward.
- Wooster, W. A. *See* Thomas & Wooster.
- Yoffe, A. D. Thermal decomposition and explosion of azides, 188.
- Young, J. E. *See* Bowden & Young.
