

INDEX TO VOLUME 211 (A)

- Accuracy of Rayleigh's method of calculating the natural frequencies of vibrating systems (Temple), 204.
- Action of waving cylindrical tails in propelling microscopic organisms (Taylor), 225.
- Action of X-rays on ferrous and ferric salts in aqueous solutions (Rigg, Stein & Weiss), 375.
- Activation energy of the *para*-hydrogen conversion on tungsten (Couper & Eley), 544.
- Adrian, E. D. Anniversary Address, 1.
- Aerosol formation (Corner), 417.
- Andrade, E. N. da C. & Dobbs, E. R. The viscosities of liquid lithium, rubidium and caesium, 12.
- Anniversary Address (Adrian), 1.
- Atomic Energy Research Establishment (Cockcroft), 155.
- Baskett, A. C. The resistance of *Bact. lactis aerogenes* to proflavine (2:8-diaminoacridine). II. The direct induction of adaptation (Abstract), 302.
- Berman, R. & MacDonald, D. K. C. The thermal and electrical conductivity of copper at low temperatures, 122.
- Brownian motion (Klein), 431.
- Buckingham, R. A., Hubbard, S. J. & Massey, H. S. W. The scattering of neutrons and of protons by deuterons, 183.
- Caesium, viscosity of liquid (Andrade & Dobbs), 12.
- Carman, P. C. Diffusion and flow of gases and vapours through micropores. IV. Flow of capillary condensate, 526.
- Cockcroft, Sir John. The scientific work of the Atomic Energy Research Establishment, 155.
- Corner, J. The formation of an aerosol by condensation of a dilute vapour in a carrier gas, 417.
- Couper, A. & Eley, D. D. The activation energy of the *para*-hydrogen conversion on tungsten, 544.
- Couper, A. & Eley, D. D. The reversible dissociation of hydrogen molecules and the *para*-hydrogen conversion, 536.
- Cowley, P. R. E. J. & Melville, H. W. The photo-degradation of polymethylmethacrylate. II. Evaluation of absolute rate constants for a depolymerization reaction, 320.
- Dean, A. C. R. & Hinshelwood, Sir Cyril. The resistance of *Bact. lactis aerogenes* to proflavine (2:8-diaminoacridine). I. The applicability of the statistical fluctuation test (Abstract), 301.
- Diacetylene spectra (Jones), 285.
- Diffraction of a plane sound pulse incident normally on a regular grating of perfectly reflecting strips (Fox), 398.
- Diffusion and flow of gases and vapours through micropores. IV. Flow of capillary condensate (Carman), 526.
- Dingle, R. B. Some magnetic properties of metals. I. General introduction, and properties of large systems of electrons, 500.
- Dingle, R. B. Some magnetic properties of metals. II. The influence of collisions on the magnetic behaviour of large systems, 517.
- Dobbs, E. R. *See* Andrade & Dobbs.
- Durie, R. A. The spectra of flames supported by fluorine, 110.

- Egerton, Sir Alfred & Thabet, S. K. Flame propagation: the measurement of burning velocities of slow flames and the determination of limits of combustion, 445.
- Elastic deformations (Green, Rivlin & Shield), 128.
- Eley, D. D. *See* Couper & Eley.
- Elliott, A. Infra-red dichroism and chain orientation in crystalline ribonuclease, 490.
- Energy per ion pair for electrons in gases and gas mixtures (Valentine), 75.
- Faust, R. C. Multiple-beam interference microscopy, 240.
- Flame propagation: the measurement of burning velocities of slow flames and the determination of limits of combustion (Egerton & Thabet), 445.
- Formation of an aerosol by condensation of a dilute vapour in a carrier gas (Corner), 417.
- Fox, E. N. The diffraction of a plane sound pulse incident normally on a regular grating of perfectly reflecting strips, 398.
- Garner, W. E. & Haycock, E. W. The thermal decomposition of lithium aluminium hydride, 335.
- Garner, W. E., Stone, F. S. & Tiley, P. F. The reaction between carbon monoxide and oxygen on cuprous oxide at room temperature, 472.
- General theory of small elastic deformations superposed on finite elastic deformations (Green, Rivlin & Shield), 128.
- Glew, D. N. & Moelwyn-Hughes, E. A. The kinetics of the acid and alkaline hydrolysis of methyl fluoride in water, 254.
- Green, A. E., Rivlin, R. S. & Shield, R. T. General theory of small elastic deformations superposed on finite elastic deformations, 128.
- Haycock, E. W. *See* Garner & Haycock.
- Hinshelwood, Sir Cyril. *See* Dean & Hinshelwood.
- Hubbard, S. J. *See* Buckingham, Hubbard & Massey.
- Hydrogen/oxygen reaction (Warren), 86, 96.
- Infra-red and Raman spectra of diacetylene (Jones), 285.
- Infra-red dichroism and chain orientation in crystalline ribonuclease (Elliott), 490.
- Ionization produced by metallic salts in flames (Smith & Sugden), 31, 58.
- Jones, A. Vallance. Infra-red and Raman spectra of diacetylene, 285.
- Kinetics of the acid and alkaline hydrolysis of methyl fluoride in water (Glew & Moelwyn-Hughes), 254.
- Kinetics of the hydrogen/oxygen reaction. II. The explosion region in salt- and alkali-coated vessels (Warren), 86.
- Kinetics of the hydrogen/oxygen reaction. III. The explosion-limit equation and its applications (Warren), 96.
- Klein, G. Mean first-passage times of Brownian motion and related problems, 431.
- Lighthill, M. J. On sound generated aerodynamically. I. General theory, 564.
- Lithium aluminium hydride decomposition (Garner & Haycock), 335.
- Lithium, viscosity of liquid (Andrade & Dobbs), 12.
- MacDonald, D. K. C. *See* Berman & MacDonald.
- McVittie, G. C. A model universe admitting the interchangeability of stress and mass, 295.
- Mann, J. & Thompson, H. W. Measurements with crystals using polarized infra-red radiation, 168.
- Massey, H. S. W. *See* Buckingham, Hubbard & Massey.

- Mean first-passage times of Brownian motion and related problems (Klein), 431.
- Measurements with crystals using polarized infra-red radiation (Mann & Thompson), 168.
- Melville, H. W. *See* Cowley & Melville.
- Microscopic organisms, propulsion (Taylor), 225.
- Model universe admitting the interchangeability of stress and mass (McVittie), 295.
- Moelwyn-Hughes, E. A. *See* Glew & Moelwyn-Hughes.
- Multiple-beam interference microscopy (Faust), 240.
- New radio interferometer and its application to the observation of weak radio stars (Ryle), 351.
- Orbits and rays in the gravitational field of a finite sphere according to the theory of A. N. Whitehead (Synge), 303.
- Photo-degradation of polymethylmethacrylate. II. Evaluation of absolute rate constants for a depolymerization reaction (Cowley & Melville), 320.
- Rayleigh's method of calculating natural frequencies (Temple), 204.
- Reaction between carbon monoxide and oxygen on cuprous oxide at room temperature (Garner, Stone & Tiley), 472.
- Renormalization of scalar electrodynamics using β -formalism (Salam), 276.
- Resistance of *Bact. lactis aerogenes* to proflavine (2:8-diaminoacridine). I. The applicability of the statistical fluctuation test (Abstract) (Dean & Hinshelwood), 301.
- Resistance of *Bact. lactis aerogenes* to proflavine (2:8-diaminoacridine). II. The direct induction of adaptation (Abstract) (Baskett), 302.
- Reversible dissociation of hydrogen molecules and the *para*-hydrogen conversion (Couper & Eley), 536.
- Rigg, T., Stein, G. & Weiss, J. The action of X-rays on ferrous and ferric salts in aqueous solutions, 375.
- Rivlin, R. S. *See* Green, Rivlin & Shield.
- Rubidium, viscosity of liquid (Andrade & Dobbs), 12.
- Ryle, M. A new radio interferometer and its application to the observation of weak radio stars, 351.
- Salam, Abdus. Renormalization of scalar electrodynamics using β -formalism, 276.
- Scattering of neutrons and of protons by deuterons (Buckingham, Hubbard & Massey), 183.
- Scientific work of the Atomic Energy Research Establishment (Cockcroft), 155.
- Shield, R. T. *See* Green, Rivlin & Shield.
- Smith, H. & Sugden, T. M. Studies on the ionization produced by metallic salts in flames. III. Ionic equilibria in hydrogen/air flames containing alkali metal salts, 31.
- Smith, H. & Sugden, T. M. Studies on the ionization produced by metallic salts in flames. IV. The stability of gaseous alkali hydroxides in flames, 58.
- Some magnetic properties of metals (Dingle). I. General introduction, and properties of large systems of electrons, 500.
- Some magnetic properties of metals (Dingle). II. The influence of collisions on the magnetic behaviour of large systems, 517.
- Sound generated aerodynamically. I. General theory (Lighthill), 564.
- Spectra of flames supported by fluorine (Durie), 110.
- Stein, G. *See* Rigg, Stein & Weiss.
- Stone, F. S. *See* Garner, Stone & Tiley.
- Studies on the ionization produced by metallic salts in flames (Smith & Sugden). III. Ionic equilibria in hydrogen/air flames containing alkali metal salts, 31.

- Studies on the ionization produced by metallic salts in flames (Smith & Sugden).
IV. The stability of gaseous alkali hydroxides in flames, 58.
- Sugden, T. M. *See* Smith & Sugden.
- Synge, J. L. Orbits and rays in the gravitational field of a finite sphere according to the theory of A. N. Whitehead, 303.
- Taylor, Sir Geoffrey. The action of waving cylindrical tails in propelling microscopic organisms, 225.
- Temple, G. The accuracy of Rayleigh's method of calculating the natural frequencies of vibrating systems, 204.
- Thabet, S. K. *See* Egerton & Thabet.
- Thermal and electrical conductivity of copper at low temperatures (Berman & MacDonald), 122.
- Thermal decomposition of lithium aluminium hydride (Garner & Haycock), 335.
- Thompson, H. W. *See* Mann & Thompson.
- Tiley, P. F. *See* Garner, Stone & Tiley.
- Valentine, J. M. Energy per ion pair for electrons in gases and gas mixtures, 75.
- Vibrations of free plates: line symmetry; corresponding modes (Waller), 265.
- Viscosities of liquid lithium, rubidium and caesium (Andrade & Dobbs), 12.
- Waller, Mary D. Vibrations of free plates: line symmetry; corresponding modes, 265.
- Warren, D. R. Kinetics of the hydrogen/oxygen reaction. II. The explosion region in salt- and alkali-coated vessels, 86.
- Warren, D. R. Kinetics of the hydrogen/oxygen reaction. III. The explosion-limit equation and its applications, 96.
- Weiss, J. *See* Rigg, Stein & Weiss.
