

INDEX TO VOLUME 213 (A)

- Andrade, E. N. da C. & Jolliffe, K. H. The flow of polycrystalline metals under simple shear, 3.
- Barrer, R. M. & Barrie, J. A. Sorption and surface diffusion in porous glass, 250.
- Barrie, J. A. *See* Barrer & Barrie.
- Barrow, G. M. & McKean, D. C. The intensities of absorption bands in the methyl halides, 27.
- Basicities of the nitrogen atoms in the porphyrin nucleus; their dependence on some substituents of the tetrapyrrolic ring (Neuberger & Scott), 307.
- Batchelor, G. K. The effect of homogeneous turbulence on material lines and surfaces, 349.
- Blackwood, J. D. & Bowden, F. P. The initiation, burning and thermal decomposition of gunpowder, 285.
- Bowden, F. P. *See* Blackwood & Bowden.
- Bowers, R. & Mendelssohn, K. Superflow of helium II through narrow slits, 158.
- Boyd, D. R. J. & Longuet-Higgins, H. C. Coriolis interaction between vibration and rotation in symmetric top molecules, 55.
- Boyd, D. R. J., Thompson, H. W. & Williams, R. L. Vibration-rotation bands of methane, 42.
- Bragg, Sir Lawrence & Perutz, M. F. The structure of haemoglobin, 425.
- Brouwer, L. E. J. An intuitionist correction of the fixed-point theorem on the sphere, 1.
- Buchanan, T. J., Haggis, G. H., Hasted, J. B. & Robinson, B. G. The dielectric estimation of protein hydration, 379.
- Buckingham, R. A. & Dalgarno, A. Diffusion and excitation transfer of metastable helium in normal gaseous helium, 506.
- Buckingham, R. A. & Dalgarno, A. The interaction of normal and metastable helium atoms, 327.
- Chalmers, B. & Martius, Ursula M. Slip planes and the energy of dislocations, 175.
- Cini, M. A perturbation method for Dirac's new electrodynamics, 520.
- Comparison of the acceleration due to gravity at the National Physical Laboratory, Teddington, the Bureau International des Poids et Mesures, Sèvres, the Physikalisch-Technische Bundesanstalt, Brunswick, and the Geodetic Institute, Potsdam (Cook), 408.
- Cook, A. H. Comparison of the acceleration due to gravity at the National Physical Laboratory, Teddington, the Bureau International des Poids et Mesures, Sèvres, the Physikalisch-Technische Bundesanstalt, Brunswick, and the Geodetic Institute, Potsdam, 408.
- Coriolis interaction between vibration and rotation in symmetric top molecules (Boyd, & Longuet-Higgins), 55.
- Cottrell, T. L. & Paterson, S. An equation of state applicable to gases at densities near that of the solid and temperatures far above the critical, 214.
- Creep of metals under interrupted stressing (Kennedy), 492.
- Dalgarno, A. *See* Buckingham & Dalgarno.
- Determination of the velocity of short electromagnetic waves by interferometry (Froome), 123.
- Dielectric dispersion in pure polar liquids at very high radio-frequencies. I. Measurements on water, methyl and ethyl alcohols (Lane & Saxton), 400.

- Dielectric dispersion in pure polar liquids at very high radio-frequencies. II. Relation of experimental results to theory (Saxton), 473.
- Dielectric estimation of protein hydration (Buchanan, Haggis, Hasted & Robinson), 379.
- Diffraction by a semi-infinite metallic sheet (Senior), 436.
- Diffusion and excitation transfer of metastable helium in normal gaseous helium (Buckingham & Dalgarno), 506.
- Diffusion theory of rectification (Landsberg), 226.
- Dutton, J., Haydon, S. C. & Jones, F. Llewellyn. Electrical breakdown of gases. II Spark mechanisms in nitrogen, 203.
- Effect of homogeneous turbulence on material lines and surfaces (Batchelor), 349.
- Eggleton, A. E. J., Tompkins, F. C. & Wanford, D. W. B. Measurement of the thermal accommodation coefficients of gases, 266.
- Electrical breakdown of gases. I. Spark mechanism in air (Jones & Parker), 185.
- Electrical breakdown of gases. II. Spark mechanism in nitrogen (Dutton, Haydon & Jones), 203.
- Equation of state applicable to gases at densities near that of the solid and temperatures far above the critical (Cottrell & Paterson), 214.
- Flow of polycrystalline metals under simple shear (Andrade & Jolliffe), 3.
- Froome, K. D. Determination of the velocity of short electromagnetic waves by interferometry, 123.
- Gabor, D. Wave theory of plasmas, 73.
- Gaydon, A. G. & Wolfhard, H. G. Spectra of flames supported by free atoms, 366.
- Gerrard, J. A. F., Perutz, M. H. & Roche, André. Measurement of the velocity distribution along a vertical line through a glacier. 546.
- Griffiths, J. H. E. & Owen, J. Paramagnetic resonance in the nickel Tutton salts, 459.
- Gunpowder, initiation, burning and thermal decomposition (Blackwood & Bowden), 285.
- Haemoglobin structure (Bragg & Perutz), 425.
- Haggis, G. H. *See* Buchanan, Haggis, Hasted & Robinson.
- Hall, G. G. The molecular orbital theory of chemical valency. X. A method of calculating the ionization potentials of conjugated molecules, 102.
- Hall, G. G. The molecular orbital theory of chemical valency. XI. Bond energies, resonance energies and triplet state energies, 113.
- Hasted, J. B. *See* Buchanan, Haggis, Hasted & Robinson.
- Haydon, S. C. *See* Dutton, Haydon & Jones.
- Helium II, superflow through narrow slits (Bowers & Mendelssohn), 158.
- Hinshelwood, Sir Cyril. *See* Kilkenny & Hinshelwood.
- Initiation, burning and thermal decomposition of gunpowder (Blackwood & Bowden), 285.
- Intensities of absorption bands in the methyl halides (Barrow & McKean), 27.
- Interaction of normal and metastable helium atoms (Buckingham & Dalgarno), 327.
- Intuitionist correction of the fixed-point theorem on the sphere (Brouwer), 1.
- Investigation of some adaptive changes in yeast cells (Kilkenny & Hinshelwood) (Abstract), 559.
- Jain, S. C. & Krishnan, Sir K. S. The thermionic constants of metals and semi-conductors. I. Graphite, 143.
- Jeffrey, G. A. & Rollett, J. S. The structure of dimethyl-triacetylene, 86.
- Jolliffe, K. H. *See* Andrade & Jolliffe.

Jones, F. Llewellyn. *See* Dutton, Haydon & Jones.

Jones, F. Llewellyn & Parker, A. B. Electrical breakdown of gases. I. Spark mechanism in air, 185.

Kennedy, A. J. The creep of metals under interrupted stressing, 492.

Kilkenny, B. C. & Hinshelwood, Sir Cyril. An investigation of some adaptive changes in yeast cells (Abstract), 559.

Krishnan, Sir K. S. *See* Jain & Krishnan.

Landsberg, P. T. On the diffusion theory of retification, 226.

Lane, J. A. & Saxton, J. A. Dielectric dispersion in pure polar liquids at very high radio-frequencies. I. Measurements on water, methyl and ethyl alcohols, 400.

Longuet-Higgins, H. C. *See* Boyd & Longuet-Higgins.

McKean, D. C. *See* Barrow & McKean.

MacLellan, A. G. A statistical-mechanical theory of surface tension, 274.

Martius, Ursula M. *See* Chalmers & Martius.

Measurement of Donnan potentials with cellulose and aqueous solutions (Neale & Standring), 530.

Measurement of the thermal accommodation coefficients of gases (Eggleton, Tompkins & Wanford), 266.

Measurement of the velocity distribution along a vertical line through a glacier (Gerrard, Perutz & Roch), 546.

Mendelssohn, K. *See* Bowers & Mendelssohn.

Methyl halides, intensity of absorption bands (Barrow & McKean), 27.

Molecular orbital theory of chemical valency X. A method of calculating the ionization potentials of conjugated molecules (Hall), 102.

Molecular orbital theory of chemical valency XI. Bond energies, resonance energies and triplet state energies (Hall), 113.

Neale, S. M. & Standring, P. T. The measurement of Donnan potentials with cellulose and aqueous solutions, 530.

Neuberger, A. & Scott, J. J. The basicities of the nitrogen atoms in the porphyrin nucleus; their dependence on some substituents of the tetrapyrrolic ring, 307.

Neutron-proton scattering at 156 ± 3 MeV (Randle, Taylor & Wood), 392.

Owen, J. *See* Griffiths & Owen.

Packham, B. A. The theory of symmetrical gravity waves of finite amplitude. II. The solitary wave, 238.

Paramagnetic resonance in the nickel Tutton salts (Griffiths & Owen), 459.

Parker, A. B. *See* Jones & Parker.

Paterson, S. *See* Cottrell & Paterson.

Perturbation method for Dirac's new electrodynamics (Cini), 520.

Perutz, M. F. *See* Bragg & Perutz; Gerrard, Perutz & Roch.

Randle, T. C., Taylor, A. E. & Wood, E. Neutron-proton scattering at 156 ± 3 MeV, 392.

Robinson, B. G. *See* Buchanan, Haggis, Hasted & Robinson.

Roch, André. *See* Gerrard, Perutz & Roch.

Rollett, J. S. *See* Jeffrey & Rollett.

Saxton, J. A. Dielectric dispersion in pure polar liquids at very high radio-frequencies.

II. Relation of experimental results to theory, 473.

Saxton, J. A. *See* Lane & Saxton.

- Scott, J. J. *See* Neuberger & Scott.
- Senior, T. B. A. Diffraction by a semi-infinite metallic sheet, 436.
- Slip planes and the energy of dislocations (Chalmers & Martius), 175.
- Sorption and surface diffusion in porous glass (Barrer & Barrie), 250.
- Spectra of flames supported by free atoms (Gaydon & Wolfhard), 366.
- Standring, P. T. *See* Neale & Standring.
- Statistical-mechanical theory of surface tension (MacLellan), 274.
- Structure of dimethyl-triacetylene (Jeffrey & Rollett), 86.
- Structure of haemoglobin (Bragg & Perutz), 425.
- Superflow of helium II through narrow slits (Bowers & Mendelssohn), 158.
- Surface tension, statistical-mechanical theory (MacLellan), 274.
- Taylor, A. E. *See* Randle, Taylor & Wood.
- Theory of symmetrical gravity waves of finite amplitude. II. The solitary wave (Packham), 238.
- Thermionic constants of metals and semi-conductors. I. Graphite (Jain & Krishnan), 143.
- Thompson, H. W. *See* Boyd, Thompson & Williams.
- Tompkins, F. C. *See* Eggleton, Tompkins & Wanford.
- Vibration-rotation bands of methane (Boyd, Thompson & Williams), 42.
- Wanford, D. W. B. *See* Eggleton, Tompkins & Wanford.
- Wave theory of plasmas (Gabor), 73.
- Williams, R. L. *See* Boyd, Thompson & Williams.
- Wolfhard, H. G. *See* Gaydon & Wolfhard.
- Wood, E. *See* Randle, Taylor & Wood.
