INDEX TO VOLUME 214 (A)

Activation energies and frequency factors in the thermal decomposition of paraffin hydrocarbons (Peard, Stubbs & Hinshelwood), 471.
Analysis of the swimming of long and narrow animals (Taylor), 158.
Angular distribution and attenuation of the star-producing component of cosmic rays (Barford & Davis), 225.
Anomalous paramagnetism of copper acetate (Bleaney & Bowers), 451.
Ashwell, D. G. A characteristic type of instability in the large deflexions of elastic plates.
I. Curved rectangular plates bent about one axis. II. Flat square plates bent about all edges, 98.
Auluck, F. C. & Kothari, D. S. Effect of electromagnetic radiation on the Lamb shift, 137.

Bakerian Lecture. The origin of the solar system (Jeffreys), 281.
Barford, N. C. & Davis, G. The angular distribution and attenuation of the star-producing component of cosmic rays, 225.
Benzoyl bromide, pyrolysis (Ladacki, Leigh & Szware), 273.
Bowers, K. D. See Bleaney & Bowers.

Carbon dioxide and air equilibrium (Webster), 61.
Casado, F. L., Massie, Doreen S. & Whytlaw-Gray, R. The limiting densities of vapours. 466.
Cation exchangers (Glueckauf), 207; (Duncan), 344.
Characteristic type of instability in the large deflexions of elastic plates. I. Curved rectangular plates bent about one axis. II. Flat square plates bent about all edges (Ashwell), 98.
Charnes, A., Osterle, F. & Saibel, E. On the energy equation for fluid-film lubrication, 133.
Commutation laws of relativistic field theory (Peierls), 143.
Copper acetate, anomalous paramagnetism (Bleaney & Bowers), 451.
Correspondence between the resonance and molecular orbital theories (Dewar & Longuet-Higgins), 482.
Cassels, J. M., Pickavance, T. G. & Stafford, G. H. Proton-proton scattering at 147 MeV, 262.
Catalysis on evaporated metal films. I. The efficiency of different metals for the reaction between ammonia and deuterium (Kemball), 413.
Cuthbertson, D. P. The Rowett Research Institute, 429.

Danby, C. J. See appendix to Peard, Stubbs & Hinshelwood, 330.
Danby, C. J. See Stubbs, Ingold, Spall, Danby & Hinshelwood.
Davis, G. See Barford & Davis.
Dawson, I. M. The study of crystal growth with the electron microscope. II. The observation of growth steps in the paraffin n-heptane, 72.
Determination of the frictional forces in a tidal current (Bowden & Fairbairn), 371.
Dewar, M. J. S. & Longuet-Higgins, H. C. The correspondence between the resonance and molecular orbital theories, 482.
Dielectric dispersion in pure polar liquids at very high radio frequencies. III. The effect of electrolytes in solution (Lane & Saxton), 531.
Diffraction of galactic radio waves as a method of investigating the irregular structure of the ionosphere (Hewish), 494.
Diffusion and chemical reaction velocity in cylindrical and spherical systems of physiological interest (Abstract) (Roughton), 564.
Duncan, J. F. A theoretical treatment of cation exchangers. II. Equilibria between an ion exchanger and an aqueous solution with a common cation, 344.

Edge waves on a sloping beach (Ursell), 79.
Effect of electromagnetic radiation on the Lamb shift (Auluck & Kothari), 137.
Effect of the temperature of preparation on the mechanical properties and structure of gelatin films (Bradbury & Martin), 183.
Elastic plate deflections (Ashwell), 98.
Electromagnetic interpretation problem for the sphere (Slichter), 356.
Electron microscope and crystal growth (Dawson), 72.
Enumeration of graphs in the Feynman-Dyson technique (Hurst), 44.

Fairbairn, L. A. See Bowden & Fairbairn.
Feynman-Dyson technique (Hurst), 44.
Flowers, B. H. See Edmonds & Flowers.

Gelatin films (Bradbury & Martin), 183.
Generation of noise by isotropic turbulence (Proudman), 119.
Glueckauf, E. A theoretical treatment of cation exchangers. I. The prediction of equilibrium constants from osmotic data, 207.

Helium, thermal conductivity (Webb, Wilkinson & Wilks), 546.
Hewish, A. The diffraction of galactic radio waves as a method of investigating the irregular structure of the ionosphere, 494.
Hinshelwood, Sir Cyril. See Peard, Stubbs & Hinshelwood; also Stubbs, Ingold, Spall, Danby & Hinshelwood.
Hurst, C. A. The enumeration of graphs in the Feynman-Dyson technique, 44.

Influence of pressure on the equilibrium between carbon dioxide and air (Webster), 61.
Ingold, K. U. See Stubbs, Ingold, Spall, Danby & Hinshelwood.
Ionosphere investigated by diffraction of galactic radio waves (Hewish), 494.

Kemball, C. Catalysis on evaporated metal films. I. The efficiency of different metals for the reaction between ammonia and deuterium, 413.
Kinetics of the thermal decomposition of branched-chain paraffin hydrocarbons. II. The isomeric hexanes (Peard, Stubbs & Hinshelwood), 339.
Index

Kinetics of the thermal decomposition of normal paraffin hydrocarbons. V. Order of reaction over extended ranges of pressure (Stubbs, Ingold, Spall, Danby & Hinshelwood), 20.

Kothari, D. S. See Auluck & Kothari.

Lamb shift and electromagnetic radiation (Auluck & Kothari), 137.

Lane, J. A. & Saxton, J. A. Dielectric dispersion in pure polar liquids at very high radio-frequencies. III. The effect of electrolytes in solution, 531.

Limiting densities of vapours (Casado, Massie & Whytlaw-Gray), 466.

Martin, C. See Bradbury & Martin.

Massie, Doreen S. See Casado, Massie & Whytlaw-Gray.

Milner, S. R. The relation of Eddington's E-numbers to the tensor calculus. II. An extension of tensor transformation theory, 312.

On the energy equation for fluid-film lubrication (Charnes, Osterle & Saibel), 133.

Osterle, F. See Charnes, Osterle & Saibel.

Palit, Santi R. See Basu, Sen & Palit.

Peard, M. G., Stubbs, F. J. & Hinshelwood, Sir Cyril. Activation energies and frequency factors in the thermal decomposition of paraffin hydrocarbons, 471.

Peierls, R. E. The commutation laws of relativistic field theory, 143.

Phase transition in superconductors. I. Nucleation (Faber), 392.

Pickavance, T. G. See Cassels, Pickavance & Stafford.

Proton-proton scattering at 147 MeV (Cassels, Pickavance & Stafford), 262.

Proudman, I. The generation of noise by isotropic turbulence, 119.

Pyrolysis of benzyol bromide and the determination of the relevant bond dissociation energies (Ladacki, Leigh & Szwarc), 273.

Relation of Eddington's E-numbers to the tensor calculus. I. The matrix form of E-numbers (Milner), 292.

Relation of Eddington's E-numbers to the tensor calculus. II. An extension of tensor transformation theory (Milner), 312.

Ribosenucleic acid content of isolated cell nuclei (Mauritzen, Roy & Stedman) (Abstract), 427.

Richardson, L. F. Transforms for the eddy-diffusion of clusters, 1.

Roughton, F. J. W. Diffusion and chemical reaction velocity in cylindrical and spherical systems of physiological interest (Abstract), 564.
Rowett Research Institute (Cuthbertson), 429.
Rowlinson, J. S. The theory of regular solutions, 192.
Roy, A. B. See Mauritzen, Roy & Stedman.

Saibel, E. See Charnes, Osterle & Saibel.
Saxton, J. A. See Lane & Saxton.
Sen, Jyotirindra Nath. See Basu, Sen & Palit.
Slichter, L. B. An electromagnetic interpretation problem for the sphere, 356.
Spall, B. C. See Stubbs, Ingold, Spall, Danby & Hinshelwood.
Spherical shell nuclear model (Wilson), 446.
Spin-Hamiltonian and line widths in nickel Tutton salts (Stevens), 237.
Stafford, G. H. See Cassels, Pickavance & Stafford.
Stedman, E. See Mauritzen, Roy & Stedman.
Strickland-Constable, R. F. Two-phase equilibrium in binary and ternary systems. IX.
Derivation of the general equation defining a small change at equilibrium, 36.
Stubbs, F. J., Ingold, K. U., Spall, B. C., Danby, C. J. & Hinshelwood, Sir Cyril. The
kinetics of the thermal decomposition of normal paraffin hydrocarbons. V. Order of
reaction over extended ranges of pressure, 20.
Stubbs, F. J. See Peard, Stubbs & Hinshelwood.
Studies in chain transfer. II. Catalyzed polymerization of methyl methacrylate (Basu,
Sen & Palit), 247.
Studies in jj-coupling. II. Fractional parentage coefficients and the central force energy
matrix for equivalent particles (Edmonds & Flowers), 515.
Study of crystal growth with the electron microscope. II. The observation of growth
steps in the paraffin n-heptane (Dawson), 72.
Superconductors, phase transition (Faber), 392.
Swimming of animals, analysis of (Taylor), 158.
Szwarc, M. See Ladacki, Leigh & Szwarc.

Taylor, Sir Geoffrey. Analysis of the swimming of long and narrow animals, 158.
Theoretical treatment of cation exchangers. I. The prediction of equilibrium constants
from osmotic data (Ghueckauf), 207.
Theoretical treatment of cation exchangers. II. Equilibria between an ion exchanger
and an aqueous solution with a common cation (Duncan). 344.
Theory of regular solutions (Rowlinson), 192.
Tidal current frictional forces (Bowden & Fairbairn), 371.
Transforms for the eddy-diffusion of clusters (Richardson), 1.
Two-phase equilibrium in binary and ternary systems. IX. Derivation of the general
equation defining a small change at equilibrium (Strickland-Constable), 36.

Ursell, F. Edge waves on a sloping beach, 79.

Webster, T. J. The influence of pressure on the equilibrium between carbon dioxide and
air, 61.
Whyntlaw-Gray, R. See Casado, Massie & Whyntlaw-Gray.
Wilson, H. A. The spherical shell nuclear model, 446.

END OF THE TWO HUNDRED AND FOURTEENTH VOLUME (SERIES A)
