

PROCEEDINGS
OF THE
ROYAL SOCIETY OF LONDON

SERIES A. MATHEMATICAL AND PHYSICAL SCIENCES

VOL 225

LONDON

Published for the Royal Society by the
Cambridge University Press
Bentley House, N.W. 1

22 September 1954

*Printed in Great Britain at the University Press, Cambridge
(Brooke Crutchley, University Printer)
and published by the Cambridge University Press
Cambridge, and Bentley House, London
Agents for Canada, India, and Pakistan: Macmillan*

CONTENTS

SERIES A VOLUME 225

No. 1160 6 August 1954

	PAGE
The distribution of temperature along a thin rod electrically heated <i>in vacuo</i> . II. Theoretical (continued). By S. C. Jain and Sir K. S. Krishnan, F.R.S.	1
The distribution of temperature along a thin rod electrically heated <i>in vacuo</i> . III. Experimental. By S. C. Jain and Sir K. S. Krishnan, F.R.S.	7
The distribution of temperature along a thin rod electrically heated <i>in vacuo</i> . IV. Many useful empirical formulae verified. By S. C. Jain and Sir K. S. Krishnan, F.R.S.	19
The etching of diamond. I. Octahedron faces. By M. Omar, N. S. Pandya and S. Tolansky, F.R.S. (Plates 1 to 3)	33
The etching of diamond. II. Cleavage, dodecahedron and cube faces. By N. S. Pandya and S. Tolansky, F.R.S. (Plates 4 to 6)	40
Experiments on a gravity-free dispersion of large solid spheres in a Newtonian fluid under shear. By R. A. Bagnold, F.R.S.	49
The modes of decomposition of <i>n</i> -pentane. III. Fate of ethane at low pressures. By B. C. Spall, F. J. Stubbs, C. J. Danby and Sir Cyril Hinshelwood, For.Sec.R.S..	64
The laminar flame speed of propane/air mixtures with heat extraction from the flame. By J. P. Botha and D. B. Spalding. (Plate 7)	71
A macroscopic theory of interference and diffraction of light from finite sources. I. Fields with a narrow spectral range. By E. Wolf	96
The magnetic susceptibility of oxygen in a clathrate compound. By A. H. Cooke, H. Meyer, W. P. Wolf, D. F. Evans and R. E. Richards	112
The polarization of light by narrow slits. By R. V. Jones and J. C. S. Richards	122
The molecular orbital theory of chemical valency. XVII. Higher approximations. By P. P. Manning	136

No. 1161 31 August 1954

The spontaneous magnetization of alloys and compounds. II. Ferrites. By C. A. Clark and W. Sucksmith, F.R.S.	147
Thermionic constants of metals and semiconductors. IV. Monovalent metals (continued). By S. C. Jain and Sir K. S. Krishnan, F.R.S.	159
The instability of a layer of fluid heated below and subject to the simultaneous action of a magnetic field and rotation. By S. Chandrasekhar, F.R.S.	173
Discrete transitions in turbulent convection. By W. V. R. Malkus	185
The heat transport and spectrum of thermal turbulence. By W. V. R. Malkus	196
Wave drag of wings at supersonic speeds. By D. C. M. Leslie and J. D. Perry	213
Countercurrent transfer processes in the non-steady state. By M. A. Jaswon and W. Smith	226
The molecular orbital theory of chemical valency. XVIII. Localized orbitals in conjugated molecules. By P. P. Manning	244
On Feynmann's 'integral over all paths'. By B. Davison	252
The structure of haemoglobin. III. Direct determination of the molecular transform. By M. F. Perutz	264

No. 1162 14 September 1954

	PAGE
The structure of haemoglobin. IV. Sign determination by the isomorphous replacement method. By D. W. Green, V. M. Ingram and M. F. Perutz	287
The structure of haemoglobin. V. Imidazole-methaemoglobin: a further check of the signs. By E. R. Howells and M. F. Perutz	308
The structure of haemoglobin. VI. Fourier projections on the 010 plane. By Sir Lawrence Bragg, F.R.S. and M. F. Perutz	315
A thermocouple method of following the non-stationary state of chemical reactions. I. The evaluation of velocity coefficients for vinyl acetate, methyl methacrylate, and butyl acrylate polymerization reactions. By W. I. Bengough and H. W. Melville, F.R.S.	330
On overturning and anchoring of monolayers. I. Overturning and transfer. By Sir Eric Rideal, F.R.S. and J. Tadayon	346
On overturning and anchoring of monolayers. II. Surface diffusion. By Sir Eric Rideal, F.R.S. and J. Tadayon	357
The magnetic anisotropy of cobalt. By W. Sucksmith, F.R.S. and J. E. Thompson	362
The effect of drop size on flame propagation in liquid aerosols. By J. H. Burgoyne and L. Cohen. (Plates 8 and 9)	375
An experimental determination of the melting curves of argon and nitrogen into the 10000 atm region. By D. W. Robinson	393
The photo-sensitized oxidation of ethanol. By J. L. Bolland and H. R. Cooper	405

No. 1163 22 September 1954

The combustion of some organo-metallic compounds. By Sir Alfred Egerton, F.R.S. and S. Rudrakanchana. (Plates 10 to 12).	427
The oxidation of iron at 175 to 350° C. By D. E. Davies, U. R. Evans, F.R.S., and J. N. Agar	443
The effect of an electric field on the viscosity of liquids. III. By E. N. da C. Andrade, F.R.S. and J. Hart	463
Conditions under which dispersion of a solute in a stream of solvent can be used to measure molecular diffusion. By Sir Geoffrey Taylor, F.R.S.	473
The absorption of organic vapours by thin films of nitrocellulose. By E. C. Baughan, A. L. Jones and K. Stewart	478
The stability of the plane free surface of a liquid in vertical periodic motion. By T. B. Benjamin and F. Ursell	505
The diffraction of waves by an irregular refracting medium. By E. N. Bramley	515
The structure of hydrazoic acid. By K. Singh	519
On the propagation functions of quantum electrodynamics. By J. G. Valatin	535
An electron-diffraction examination of thin films of lithium fluoride and copper prepared by vacuum evaporation. By J. S. Halliday, T. B. Rymer and K. H. R. Wright	548
Index	564
