

CONTENTS

	PAGE
Chemical and spectroscopic studies of blue flames in the auto-ignition of methane. By A. G. GAYDON, F.R.S., N. P. W. MOORE and J. R. SIMONSON. (Plate 1) . . . . .	1
The scattering of slow neutrons by <i>ortho</i> - and <i>para</i> -hydrogen. By G. L. SQUIRES and A. T. STEWART . . . . .	19
The inhibition of the burning of gunpowder by foreign substances. By S. BENTUR, M. ISH-SHALOM, L. LENJI and Y. TROCKER . . . . .	33
The inelastic scattering of neutrons by magnetic spin waves. By R. J. ELLIOTT and R. D. LOWDE . . . . .	46
On the Ising problem and Mayer's cluster sums. By G. S. RUSHBROOKE and H. I. SCOINS . . . . .	74
A thermodynamic study of the adsorption of benzene vapour by active charcoals. By D. H. EVERETT and W. I. WHITTON . . . . .	91
The electronic structure of an icosahedron of boron atoms. By H. C. LONGUET-HIGGINS and M. DE V. ROBERTS . . . . .	110
Changes in silicone polymeric fluids due to high-energy radiation. By A. CHARLESBY . . . . .	120
Radiation protection in copolymers of <i>isobutylene</i> and styrene. By P. ALEXANDER and A. CHARLESBY . . . . .	136
