

## INDEX TO VOLUME 239 (A)

- Adiabatic coupling between nuclear and electronic motion in molecules. II (Dalgarno & McCarroll), 413.
- Adkins J. E. & Green, A.E. Plane problems in second-order elasticity theory, 557.
- Aerodynamic forces on an oscillating aerofoil fitted with a spoiler (Woods), 328.
- Analogy between plates and disks (Prager), 394.
- Approximate methods in high-frequency scattering (Jones), 338.
- Approximation for the radial distribution function (Rodriguez), 373.
- Background of counters and radiocarbon dating (Moljk, Drever & Curran), 433.
- Bamford, C. H., Jenkins, A. D. & Johnston, R. Studies in polymerization. XI. Reactions between polymer radicals and ferric chloride in non-aqueous media, 214.
- Behaviour of the paramagnetic ions in the single crystals of some similar salts of the iron group of elements. I. Hydrated cupric salts (Bose, Mitra & Datta), 165.
- Bell, R. L. & Cahn, R. W. The dynamics of twinning and the interrelation of slip and twinning in zinc crystals, 494.
- Bevington, J. C. The nature of the initiation reaction in the polymerization of styrene sensitized by benzoyl peroxide, 420.
- Binary system nitrogen-oxygen at 1.3158 atm (Cockett), 76.
- Birss, F. W., Danby, C. J. & Hinshelwood, Sir Cyril. The thermal dissociation of tertiary butyl peroxide in presence of nitric oxide, 154.
- Black, G. & Linfoot, E. H. Spherical aberration and the information content of optical images, 522.
- Blackman, M. & Lisgarten, N. D. The cubic and other structural forms of ice at low temperature and pressure, 93.
- Bose, A., Mitra, S. C. & Datta, S. K. The behaviour of the paramagnetic ions in the single crystals of some similar salts of the iron group of elements. I. Hydrated cupric salts, 165.
- Brown, E. H. The diffusion of load from a stiffener into an infinite elastic sheet, 296.
- Buoyant vortex rings (Turner), 61.
- Cahn, R. W. *See* Bell & Cahn.
- Carbon formation in diffusion flames and the role of acetylene (Cole & Minkoff), 280.
- Characterization and crystal structure of caesium antimonide, a photo-electric surface material (Jack & Wachtel), 46.
- Cockett, A. H. The binary system nitrogen-oxygen at 1.3158 atm, 76.
- Cole, D. J. & Minkoff, G. J. Carbon formation in diffusion flames and the role of acetylene, 280.
- Collective motion in quantum mechanics (Skyrme), 399.
- Cubic and other structural forms of ice at low temperature and pressure (Blackman & Lisgarten), 93.
- Curran, S. C. *See* Moljk, Drever & Curran.
- Dalgarno, A. & McCarroll, R. Adiabatic coupling between nuclear and electronic motion in molecules. II. 413.
- Damodaran, K. K. Dissociation of molecular hydrogen ions ( $H_2^+$ ) in gases, 382.
- Danby, C. J. *See* Birss, Danby & Hinshelwood.
- Danby, C. J., Lambert, J. D. & Mitchell, C. M. Separation of hydrocarbon isomers by thermal diffusion, 365.
- Datta, S. K. *See* Bose, Mitra & Datta.

- Dawson, I. M. & Watson, D. H. The study of crystal growth with the electron microscope. V. The crystal growth of *n*-pentacontanol-1, 349.
- Derivation of the Brueckner many-body theory (Goldstone), 267.
- Diffusion of load from a stiffener into an elastic sheet (Brown), 296.
- Dissociation of molecular hydrogen ions ( $H_2^+$ ) in gases (Damodaran), 382.
- Distribution of stress and velocity in glaciers and ice-sheets (Nye), 113.
- Drever, R. W. P. *See* Moljk, Drever & Curran.
- Dynamics of twinning and the interrelation of slip and twinning in zinc crystals (Bell & Cahn), 494.
- Effect of *P*-state and higher angular momentum hard-core interaction on nuclear binding (Thouless), 108.
- Electrical octupole Coulomb excitation in rhodium (Jones & Phillips), 487.
- Electron and lattice conduction in metals (Hanna & Sondheimer), 247.
- Emara, Sayeda H. & Tolansky, S. The microstructure of dodecahedral faces of diamond, 289.
- Fairbairn, A. R. & Gaydon, A. G. Spectra produced by shock waves, flames and detonations, 464.
- Farquhar, I. E. & Landsberg, P. T. On the quantum-statistical ergodic and *H*-theorems, 134.
- Finch, G. I. & Sinha, K. P. On reaction in the solid state. 145.
- Finite extensions of fully ordered groups (Neumann & Shepperd), 320.
- Froese, Charlotte. The limiting behaviour of atomic wave functions for large atomic number, 311.
- Gaydon, A. G. *See* Fairbairn & Gaydon.
- Girdler, R. W. & Harrison, J. C. Submarine gravity measurements in the Atlantic Ocean, Indian Ocean, Red Sea and Mediterranean Sea, 202.
- Goldstone, J. Derivation of the Brueckner many-body theory, 267.
- Green. *See* Adkins & Green.
- Hanna, I. I. & Sondheimer, E. H. Electron and lattice conduction in metals, 247.
- Harrison, D. & Moelwyn-Hughes, E. A. The heat capacities of certain liquids, 230.
- Harrison, J. C. *See* Girdler & Harrison.
- Heat capacities of certain liquids (Harrison & Moelwyn-Hughes), 230.
- Hill, R. A. W. Rapid measurement of thermal conductivity by transient heating of a fine thermo-junction, 476.
- Hinshelwood, Sir Cyril. *See* Birss, Danby & Hinshelwood.
- Infra-red spectrum and molecular configuration of sodium deoxyribonucleate (Sutherland & Tsuboi), 446.
- Jack, K. H. & Wachtel, M. M. The characterization and crystal structure of caesium antimonide, a photo-electric surface material, 46.
- Jenkins, A. D. *See* Bamford, Jenkins & Johnston.
- Johnston, R. *See* Bamford, Jenkins & Johnston.
- Jones, D. S. Approximate methods in high-frequency scattering, 338.
- Jones G. A. & Phillips, W. R. Electrical octupole Coulomb excitation in rhodium, 487.
- Lambert, J. D. *See* Danby, Lambert & Mitchell.
- Landsberg, P. T. *See* Farquhar & Landsberg.
- Linfoot, E. H. *See* Black & Linfoot.

- Limiting behaviour of atomic wave functions for large atomic number (Froese), 311.  
Lisgarten, N. D. *See* Blackman & Lisgarten.
- McCarroll, R. *See* Dalgarno & McCarroll.  
Mechanism of the photolysis of acetamide (Spall & Steacie), 1.  
Microstructure of dodecahedral faces of diamond (Emara & Tolansky), 289.  
Minkoff, G. J. *See* Cole & Minkoff.  
Mitchell, C. M. *See* Danby, Lambert & Mitchell.  
Mitra, S. C. *See* Bose, Mitra & Datta.  
Moelwyn-Hughes, E. A. *See* Harrison & Moelwyn-Hughes.  
Moljk, A., Drever, R. W. P., & Curran, S. C. The background of counters and radio-carbon dating, 433.
- Nature of the initiation reaction in the polymerization of styrene sensitized by benzoyl peroxide (Bevington), 420.  
Neumann, B. H. & Shepperd, J. A. H. Finite extensions of fully ordered groups, 320.  
Nye, J. F. The distribution of stress and velocity in glaciers and ice-sheets, 113.
- Optical method of studying the diffraction from imperfect crystals. I. Modulated structures (Willis), 184.  
Optical method of studying the diffraction from imperfect crystals. II. Crystals with dislocations (Willis), 192.
- Phillips, W. R. *See* Jones & Phillips.  
Plane problems in second-order elasticity theory (Adkins & Green), 557.  
Pople, J. A. The theory of chemical shifts in nuclear magnetic resonance. I. Induced current densities, 541.  
Pople, J. A. The theory of chemical shifts in nuclear magnetic resonance. II. Interpretation of proton shifts, 550.  
Prager, W. On the analogy between plates and disks, 394.
- Quantum-statistical ergodic and *H*-theorems (Farquhar & Landsberg), 134.
- Rapid measurement of thermal conductivity by transient heating of a fine thermojunction (Hill), 476.  
Reaction in the solid state (Finch & Sinha), 145.  
Rodriguez, A. E. An approximation for the radical distribution function, 373.
- Separation of hydrocarbon isomers by thermal diffusion (Danby, Lambert & Mitchell) 365.  
Shepperd, J. A. H. *See* Neumann & Shepperd.  
Sinha, K. P. *See* Finch & Sinha.  
Skyrme, T. H. R. Collective motion in quantum mechanics, 399.  
Sondheimer, E. H. *See* Hanna & Sondheimer.  
Spall, B. C. & Steacie, E. W. R. The mechanism of the photolysis of acetamide, 1.  
Spectra produced by shock waves, flames and detonations (Fairbairn & Gaydon), 464.  
Spherical aberration and the information content of optical images (Black & Linfoot), 522.  
Steacie, E. W. R. *See* Spall & Steacie.  
Studies in polymerization. XI. Reactions between polymer radicals and ferric chloride in non-aqueous media (Bamford, Jenkins & Johnston), 214.  
Study of crystal growth with the electron microscope. V. The crystal growth of *n*-pentanol-1 (Dawson & Watson), 349.

- Submarine gravity measurements in the Atlantic Ocean, Indian Ocean, Red Sea and Mediterranean Sea (Girdler & Harrison), 202.
- Sutherland, G. B. B. M. & Tsuboi, M. The infra-red spectrum and molecular configuration of sodium deoxyribonucleate, 446.
- Tatsumi, T. The theory of decay process of incompressible isotropic turbulence, 16.
- Theory of chemical shifts in nuclear magnetic resonance. I. Induced current densities, (Pople), 541.
- Theory of chemical shifts in nuclear magnetic resonance. II. Interpretation of proton shifts (Pople), 550.
- Theory of decay process of incompressible isotropic turbulence (Tatsumi), 16.
- Thermal dissociation of tertiary butyl peroxide in presence of nitric oxide (Birss, Danby & Hinshelwood), 154.
- Thouless, D. J. The effect of *P*-state and higher angular momentum hard-core interaction on nuclear binding, 108.
- Tolansky, S. *See* Emará & Tolansky.
- Tsuboi, M. *See* Sutherland & Tsuboi.
- Turner, J. S. Buoyant vortex rings, 61.
- Wachtel, M. M. *See* Jack & Wachtel.
- Watson, D. H. *See* Dawson & Watson.
- Willis, B. T. M. An optical method of studying the diffraction from imperfect crystals. I. Modulated structures, 184.
- Willis, B. T. M. An optical method of studying the diffraction from imperfect crystals. II. Crystals with dislocations, 192.
- Woods, L. C. Aerodynamic forces on an oscillating aerofoil fitted with a spoiler, 328.
