

INDEX TO VOLUME 243 (A)

- Absorption of sound in liquid helium II (Dransfeld, Newell & Wilks), 500.
Anniversary Address 1957 (Hinshelwood), v.
Archard, J. F. Elastic deformation and the laws of friction, 190.
- Barrer, R. M. & Stuart, W. I. Non-stoichiometric clathrate compounds of water, 172.
Bass, R. & Lamb, J. Ultrasonic relaxation and the vibrational specific heat of liquid sulphur dioxide, 94.
Bates, D. R. Slow collisions between heavy particles, 15.
Bates, L. F., Christoffel, D. A., Clow, H. & Davis, P. F. A correlation of the thermomagnetic and domain behaviour of a single crystal of silicon-iron, 160.
Benbow, J. J. & Wood, D. J. C. Unusual liquid-solid transition effects in a methoxy-pentamethylflavan, 518.
Brown, R. H. & Twiss, R. Q. Interferometry of the intensity fluctuations in light. II. An experimental test of the theory for partially coherent light, 291.
- Calculation of vibrational relaxation times in gaseous sulphur dioxide (Dickens & Linnett), 84.
Campbell, I. J. & Pitcher, A. S. Shock waves in a liquid containing gas bubbles, 534.
Certain integrals occurring in a hydrodynamical problem (Miller), 65.
Chemical research at the Atomic Energy Research Establishment, Harwell (Spence), 1.
Christoffel, D. A. *See* Bates, Christoffel, Clow & Davis.
Clow, H. *See* Bates, Christoffel, Clow & Davis.
Cochran, W. & Douglas, A. S. The use of a high-speed digital computer for the direct determination of crystal structures. II, 281.
Correlation of the thermomagnetic and domain behaviour of a single crystal of silicon-iron (Bates, Christoffel, Clow & Davis), 160.
- Davies, T. V. & Haydon, D. A. An investigation of droplet oscillation during mass transfer. II. A dynamical investigation of oscillating spherical droplets, 492.
Davis, P. F. *See* Bates, Christoffel, Clow & Davis.
Deacon, R. F. & Goodman, J. F. Lubrication by lamellar solids, 464.
Decomposition of *n*-hexane. I. By mercury photosensitization (Norrish & Purnell), 435.
Decomposition of *n*-hexane. II. By reaction with atomic hydrogen (Norrish & Purnell), 449.
Description of collective motions in terms of many-body perturbation theory. II. The correlation energy of a free-electron gas (Hubbard), 336.
Dickens, P. G. & Linnett, J. W. Calculation of vibrational relaxation times in gaseous sulphur dioxide, 84.
Diffusion of negative ion vacancies in potassium chloride (Ewles & Jain), 353.
Douglas, A. S. *See* Cochran & Douglas.
Dransfeld, K., Newell, J. A. & Wilks, J. The absorption of sound in liquid helium II, 500.
Dyer, H. B. & Matthews, I. G. The fluorescence of diamond, 320.
- Edgecombe, F. H. C., Norrish, R. G. W. & Thrush, B. A. The flash photolysis of chlorine monoxide, 24.
Edwards, S. F. The range of validity of strong and weak coupling approaches in field theory, 458.
Elastic deformation and the laws of friction (Archard), 190.
Elastic scattering of protons by carbon, aluminium, nickel, copper, zinc, niobium, silver and gold (Greenlees, Kuo & Petravić), 206.

- Electrical anharmonicity of the OH group vibration (Moccia & Thompson), 154.
von Engel, A. & Robson, A. E. The excitation theory of arcs with evaporating cathodes, 217.
Etching of crystal cleavages. I. Mica (Patel & Tolansky), 33.
Etching of crystal cleavages. II. Diamond octohedral cleavages (Patel & Tolansky), 41.
Ewles, J. & Jain, S. C. Diffusion of negative ion vacancies in potassium chloride, 353.
Excitation theory of arcs with evaporating cathodes (von Engel & Robson), 217.
- Fergusson, G. J. Reduction of atmospheric radiocarbon concentration by fossil fuel carbon dioxide and the mean life of carbon dioxide in the atmosphere, 561.
Flash photolysis of chlorine monoxide (Edgecombe, Norrish & Thrush), 24.
Fluorescence of diamond (Dyer & Matthews), 320.
- Gibson, W. M., Prowse, D. J. & Rotblat, J. The scattering of 9.5 MeV protons by He, C, N, O, F, Ne, A, Kr and Xe nuclei, 237.
Godwin, H., Walker, D. & Willis, E. H. Radiocarbon dating and post-glacial vegetational history: Scaleby Moss (abstract), 289.
Goodman, J. F. *See* Deacon & Goodman.
Greenlees, G. W., Kuo, L. Gioietta & Petravić, M. The elastic scattering of protons by carbon, aluminium, nickel, copper, zinc, niobium, silver and gold, 206.
- Haydon, D. A. An investigation of droplet oscillation during mass transfer. I. The conditions necessary, and the source of the energy for the oscillations, 483.
Haydon, D. A. *See* Davies & Haydon.
Heats of adsorption on evaporated nickel films (Klemperer & Stone), 375.
Hinshelwood, Sir Cyril. Anniversary Address, 1957, v.
Hubbard, J. The description of collective motions in terms of many-body perturbation theory. II. The correlation energy of a free-electron gas, 336.
- Interferometry of the intensity fluctuations in light. II. An experimental test of the theory for partially coherent light (Brown & Twiss), 291.
Investigation of droplet oscillation during mass transfer. I. The conditions necessary, and the source of the energy for the oscillations (Haydon), 483.
Investigation of droplet oscillation during mass transfer. II. A dynamical investigation of oscillating spherical droplets (Davies & Haydon), 492.
- Jain, S. C. *See* Ewles & Jain.
Jain, S. C. Simple solutions of the partial differential equation for diffusion (or heat conduction), 359.
Johnston, D. F. Space-group operations and time-reversal for a Dirac electron in a crystal field, 546.
- Kibble, T. W. B. & Polkinghorne, J. C. On Schwinger's variational principle, 252.
Kinetic spectroscopy in the far ultra-violet: the flash photolysis of ethyl compounds (Thrush), 555.
Klemperer, D. F. & Stone, F. S. Heats of adsorption on evaporated nickel films, 375.
Krueger, P. J. & Thompson, H. W. Vibrational band intensities in substituted anilines, 143.
Kuo, L. Gioietta. *See* Greenlees, Kuo & Petravić.
- Lamb, J. *See* Bass & Lamb.
Lambert, J. D. & Salter, R. Ultrasonic dispersion in gaseous sulphur dioxide, 78.
Linnett, J. W. *See* Dickens & Linnett.
Lubrication by lamellar solids (Deacon & Goodman), 464.

- Magnetic susceptibility of oxygen in a clathrate compound. II. (Meyer, O'Brien, & Van Vleck), 414.
- Matthews, I. G. *See* Dyer & Matthews.
- Method for the direct determination of the rate constants for radical-radical interactions in the gas phase. I. The technique of investigation (Moseley & Robb), 119.
- Method for the direct determination of the rate constants for radical-radical interactions in the gas phase. II. The rate constant for the recombination of methyl radicals (Moseley & Robb), 130.
- Meyer, H., O'Brien, Mary, C. M. & Van Vleck, J. H. The magnetic susceptibility of oxygen in a clathrate compound. II. 414.
- Miller, G. F. On certain integrals occurring in a hydrodynamical problem, 65.
- Moccia, R. & Thompson, H. W. Electrical anharmonicity of the OH group vibration, 154.
- Moseley, F. & Robb, J. C. A method for the direct determination of the rate constants for radical-radical interactions in the gas phase. I. The technique of investigation, 119.
- Moseley, F. & Robb, J. C. A method for the direct determination of the rate constants for radical-radical interactions in the gas phase. II. The rate constant for the recombination of methyl radicals, 130.
- Motion of a simple wedge along the water surface (Squire), 48.
- Mutual friction in a heat current in liquid helium II. IV. Critical heat currents in wide channels (Vinen), 400.
- Newell, J. A. *See* Dransfeld, Newell & Wilks.
- Non-stoichiometric clathrate compounds of water (Barrer & Stuart), 172.
- Norrish, R. G. W. *See* Edgecombe, Norrish & Thrush.
- Norrish, R. G. W. & Purnell, J. H. The decomposition of *n*-hexane. I. By mercury photosensitization, 435.
- Norrish, R. G. W. & Purnell, J. H. The decomposition of *n*-hexane. II. By reaction with atomic hydrogen, 449.
- O'Brien, Mary, C. M. *See* Meyer, O'Brien & Van Vleck.
- Patel, A. R. & Tolansky, S. The etching of crystal cleavages. I. Mica, 33.
- Patel, A. R. & Tolansky, S. The etching of crystal cleavages. II. Diamond octahedral cleavages, 41.
- Petravić, M. *See* Greenlees, Kuo & Petravić.
- Pitcher, A. S. *See* Campbell & Pitcher.
- Polkinghorne, J. C. *See* Kibble & Polkinghorne.
- Prowse, D. J. *See* Gibson, Prowse & Rotblat.
- Purnell, J. H. *See* Norrish & Purnell.
- Radiocarbon dating and post-glacial vegetational history: Scaleby Moss (abstract). (Godwin, Walker & Willis), 289.
- Range of validity of strong and weak coupling approaches in field theory (Edwards), 458.
- Reduction of atmospheric radiocarbon concentration by fossil fuel carbon dioxide and the mean life of carbon dioxide in the atmosphere (Fergusson), 561.
- Ridley, E. Cicely. Self-consistent field without exchange for U^{6+} , 422.
- Robb, J. C. *See* Moseley & Robb.
- Robson, A. E. *See* von Engel & Robson.
- Rotblat, J. *See* Gibson, Prowse & Rotblat.
- Salter, R. *See* Lambert & Salter.
- Scattering of 9.5 MeV protons by He, C, N, O, F, Ne, A, Kr and Xe nuclei (Gibson, Prowse & Roblat), 237.
- Schwinger's variational principle (Kibble & Polkinghorne), 252.

- Self-consistent field without exchange for U^{6+} (Ridley), 422.
- Shock waves in a liquid containing gas bubbles (Campbell & Pitcher), 534.
- Simple solutions of the partial differential equation for diffusion (or heat conduction) (Jain), 359.
- Slow collisions between heavy particles (Bates), 15.
- Space-group operations and time-reversal for a Dirac electron in a crystal field (Johnston), 546.
- Spence, R. Chemical research at the Atomic Energy Research Establishment, Harwell, 1.
- Squire, H. B. The motion of a simple wedge along the water surface, 48.
- Stephen, M. J. A variational method for calculating magnetic shielding constants in molecules, 264.
- Stephen, M. J. A variational method for calculating nuclear spin-spin interactions in molecules, 274.
- Stone, F. S. *See* Klemperer & Stone.
- Stuart, W. I. *See* Barrer & Stuart.
- Thickness of laminar flames in pre-mixed reactants: optical considerations (Weinberg), 107.
- Thompson, H. W. *See* Krueger & Thompson; *also* Moccia & Thompson.
- Thrush, B. A. *See* Edgecombe, Norrish & Thrush.
- Thrush, B. A. Kinetic spectroscopy in the far ultra-violet: the flash photolysis of ethyl compounds, 555.
- Tolansky, S. *See* Patel & Tolansky.
- Twiss, R. Q. *See* Brown & Twiss.
- Ultrasonic dispersion in gaseous sulphur dioxide (Lambert & Salter), 78.
- Ultrasonic relaxation and the vibrational specific heat of liquid sulphur dioxide (Bass & Lamb), 94.
- Unusual liquid-solid transition effects in a methoxypentamethylflavan (Benbow & Wood), 518.
- Use of a high-speed digital computer for the direct determination of crystal structures. II. (Cochran & Douglas), 281.
- Van Vleck, J. H. *See* Meyer, O'Brien & Van Vleck.
- Variational method for calculating magnetic shielding constants in molecules (Stephen), 264.
- Variational method for calculating nuclear spin-spin interactions in molecules (Stephen), 274.
- Vibrational band intensities in substituted anilines (Krueger & Thompson), 143.
- Vinen, W. F. Mutual friction in a heat current in liquid helium II. IV. Critical heat currents in wide channels, 400.
- Walker, D. *See* Godwin, Walker & Willis.
- Weinberg, F. J. The thickness of laminar flames in pre-mixed reactants: optical considerations, 107.
- Wilks, J. *See* Dransfeld, Newell & Wilks.
- Willis, E. H. *See* Godwin, Walker & Willis.
- Wood, D. J. C. *See* Benbow & Wood.
