

INDEX TO VOLUME 264 (A)

- Anno, T. & Coulson, C. A. The structure of graphite, 165.
- Blackman, L. C., Saunders, G. & Ubbelohde, A. R. Defect structure and properties of pyrolytic carbons, 19.
- Calculation of the ground state splitting for Mn^{2+} ions in a cubic field (Gabriel, Johnston & Powell), 503.
- Chandrasekhar, S., Elbert, Donna D. & Lebovitz, N. R. The stability of viscous flow in a curved channel in the presence of a magnetic field, 155.
- Clemmow, P. C. On the theory of the diffraction of a plane wave by a large perfectly conducting circular cylinder, 235.
- Clemmow, P. C. & Weston, V. H. Diffraction of a plane wave by an almost circular cylinder, 246.
- Collins, J. G. & Ziman, J. M. Low-temperature transport properties of the alkali metals. II. The transport coefficients, 60.
- Computation of the zeros of Hecke zeta functions in the Gaussian field (Davies), 496.
- Contraction of satellite orbits under the influence of air drag. II. With oblate atmosphere (Cook, King-Hele & Walker), 88.
- Cook, G. E., King-Hele, D. G. & Walker, Doreen M. C. The contraction of satellite orbits under the influence of air drag. II. With oblate atmosphere, 88.
- Coulson, C. A. *See* Anno & Coulson.
- Cullis, C. F. & Warwicker, E. A. The gaseous oxidation of diphenyl alcohols. IV. The isomeric butyl alcohols, 392.
- Davies, D. The computation of the zeros of Hecke zeta functions in the Gaussian field, 496.
- Davies, D. & Haselgrove, C. B. The evaluation of Dirichlet L -functions, 122.
- Defect structure and properties of pyrolytic carbons (Blackman, Saunders & Ubbelohde), 19.
- Devanathan, M. A. V. The structure of the electrical double layer in the presence of adsorbed organic molecules, 133.
- Dewar, M. J. S. & Hojvat, Nora L. The *s.p.o.* (split *p*-orbital) method. II. Further definition and application to acetylene, 431.
- Diffraction of a plane wave by an almost circular cylinder (Clemmow & Weston), 246.
- Dolder, K. T., Harrison, M. F. A. & Thonemann, P. C. A measurement of the ionization cross-section of helium ions by electron impact, 367.
- Edmondson, B. The effect of composition and structure on the tensile properties of high-purity iron single crystals, with particular reference to the question of brittle fracture, 176.
- Effect of composition and structure on the tensile properties of high-purity iron single crystals, with particular reference to the question of brittle fracture (Edmondson), 176.
- Elbert, Donna D. *See* Chandrasekhar, Elbert & Lebovitz.
- Electron and phonon scattering. Thermoelectricity in potassium and alloys at very low temperatures (Guénault & MacDonald), 41.
- Electron capture in fast collisions. I. Capture by fast protons in atomic hydrogen (McDowell), 277.
- Energy transfer from the triplet state (Porter & Wilkinson), 1.
- Energy transfer in polyatomic molecules. I. Catalysis of energy transfer with isotopic molecules (Hudson, McCoubrey & Ubbelohde), 289.

- Energy transfer in polyatomic molecules. II. Relative catalytic efficiency for energy transfer to different vibrations to the same molecule (McCoubrey, Milward & Ubbelohde), 299.
- von Engel, A. & Franklin, R. N. Synthesis and properties of an electron-ion plasma, 355.
- von Engel, A. & Goodyear, C. C. Fusion cross-section measurements with deuterons of low energy, 445.
- Equilibrium between a condensed phase and a reactive vapour: the heat capacity of a saturated, dissociating vapour and the form of the vapour pressure curve (Gray), 516.
- Evaluation of Dirichlet L -functions (Davies & Haselgrove), 122.
- Ferguson, A. F. Resonance charge transfer between $H(1s)$ and H^+ calculated by means of an approximation based on an expansion in molecular eigenfunctions, 540.
- Forces between polyatomic molecules. II. Short-range repulsive forces (Salem), 379.
- Franklin, R. N. *See* von Engel & Franklin.
- Freise, E. J. & Kelly, A. Twinning in graphite, 269.
- Fusion cross-section measurements with deuterons of low energy (von Engel & Goodyear), 445.
- Gabriel, J. R., Johnston, D. F. & Powell, M. J. D. A calculation of the ground state splitting for Mn^{2+} ions in a cubic field, 503.
- Gaseous oxidation of diphtic alcohols. IV. The isomeric butyl alcohols (Cullis & Warwick), 392.
- Goodyear, C. C. *See* von Engel & Goodyear.
- Gravitational waves in general relativity. VI. The outgoing radiation condition in general relativity (Sachs), 309.
- Gray, P. Equilibrium between a condensed phase and a reactive vapour: the heat capacity of a saturated, dissociating vapour and the form of the vapour pressure curve, 516.
- Guénault, A. M. & MacDonald, D. K. C. Electron and phonon scattering. Thermoelectricity in potassium and alloys at very low temperatures, 41.
- Harburn, G. & Taylor, C. A. Three-dimensional optical transforms, 339.
- Harrison, M. F. A. *See* Dolder, Harrison & Thonemann.
- Haselgrove, C. B. *See* Davies & Haselgrove.
- Hojvat, Nora L. *See* Dewar & Hojvat.
- Hudson, G. H., McCoubrey, J. C. & Ubbelohde, A. R. Energy transfer in polyatomic molecules. I. Catalysis of energy transfer with isotopic molecules, 289.
- Johnston, D. F. *See* Gabriel, Johnston & Powell.
- Kelly, A. *See* Freise & Kelly.
- King-Hele, D. G. *See* Cook, King-Hele & Walker.
- Lebovitz, N. R. *See* Chandrasekhar, Elbert & Lebovitz.
- Low-temperature transport properties of the alkali metals. II. The transport coefficients (Collins & Ziman), 60.
- McCarroll, R. Resonance charge transfer between $H(1s)$ and H^+ calculated by means of an approximation based on an expansion in atomic eigenfunctions, 547.
- McCoubrey, J. C., Milward, R. C. & Ubbelohde, A. R. Energy transfer in polyatomic molecules. II. Relative catalytic efficiency for energy transfer to different vibrations to the same molecule, 299.

- McCoubrey, J. C. *See* Hudson, McCoubrey & Ubbelohde.
MacDonald, D. K. C. *See* Guénault & MacDonald.
McDowell, M. R. C. Electron capture in fast collisions. I. Capture by fast protons in atomic hydrogen, 277.
Mahler, K. On the zeros of the derivative of a polynomial, 145.
Measurement of the ionization cross-section of helium ions by electron impact (Dolder, Harrison & Thonemann), 367.
Milward, R. C. *See* McCoubrey, Milward & Ubbelohde.

Nussenzveig, H. M. Soluble model of a break-up process, 408.

Orbach, R. Spin-lattice relaxation in rare earth salts, 458.
Orbach, R. Spin-lattice relaxation in rare earth salts. Field dependence of the two-phonon process, 485.

Porter, G. & Wilkinson, F. Energy transfer from the triplet state, 1.
Powell, M. J. D. *See* Gabriel, Johnston & Powell.

Relative intensities of totally symmetrical vibrations in the Raman spectrum of completely deuterated neopentane in the gaseous state (Taylor & Woodward), 558.
Resonance charge transfer between H(1s) and H⁺ calculated by means of an approximation based on an expansion in atomic eigenfunctions (McCarroll), 547.
Resonance charge transfer between H(1s) and H⁺ calculated by means of an approximation based on an expansion in molecular eigenfunctions (Ferguson), 540.

Sachs, R. Gravitational waves in general relativity. VI. The outgoing radiation condition, 309.
Salem, L. The forces between polyatomic molecules. II. Short-range repulsive forces, 379.
Saunders, G. *See* Blackman, Saunders & Ubbelohde.
Soluble model of a break-up process (Nussenzveig), 408.
Spence, D. A. Unsteady shock propagation in a relaxing gas, 221.
Spin-lattice relaxation in rare earth salts. Field dependence of the two-phonon process (Orbach), 485.
Spin-lattice relaxation in rare earth salts (Orbach), 458.
S.p.-o. (split *p*-orbital) method. II. Further definition and application to acetylene (Dewar & Hojvat), 431.
Stability of viscous flow in a curved channel in the presence of a magnetic field (Chandrasekhar, Elbert & Lebovitz), 155.
Structure of graphite (Anno & Coulson), 165.
Structure of the electrical double layer in the presence of adsorbed organic molecules (Devanathan), 133.
Synthesis and properties of an electron-ion plasma (von Engel & Franklin), 355.
Szigeti, B. Torsional absorption spectra of long-chain substances in the solid state, 212.
Szigeti, B. Torsional vibrations of long-chain hydrocarbons, 198.

Taylor, G. A. *See* Harburn & Taylor.
Taylor, K. A. & Woodward, L. A. Relative intensities of totally symmetrical vibrations in the Raman spectrum of completely deuterated neopentane in the gaseous state, 558.
Theory of the diffraction of a plane wave by a large perfectly conducting circular cylinder (Clemmow), 235.
Thonemann, P. C. *See* Dolder, Harrison & Thonemann.
Three-dimensional optical transforms (Harburn & Taylor), 339.
Torsional absorption spectra of long-chain substances in the solid state (Szigeti), 212.

Torsional vibrations of long-chain hydrocarbons (Szigeti), 198.

Twinning in graphite (Freise & Kelly), 269.

Ubbelohde, A. R. *See* Blackman, Saunders & Ubbelohde; Hudson, McCoubrey & Ubbelohde; *also* McCoubrey, Milward & Ubbelohde.

Unsteady shock propagation in a relaxing gas (Spence), 221.

Walker, Doreen M. C. *See* Cook, King-Hele & Walker.

Warwicker, E. A. *See* Cullis & Warwicker.

Weston, V. H. *See* Clemmow & Weston.

Wilkinson, F. *See* Porter & Wilkinson.

Woodward, L. A. *See* Taylor & Woodward.

Zeros of the derivative of a polynomial (Mahler), 145.

Ziman, J. M. *See* Collins & Ziman.

END OF THE TWO HUNDRED AND SIXTY-FOURTH VOLUME (SERIES A)
