

INDEX TO VOLUME 279 (A)

- Aerodynamic resistance to a rotating sphere in the transition régime between free molecule and continuum creep flow (Lord), 39.
- Air velocity in blast waves from t.n.t. explosions (Dewey), 366.
- Alexander, J. D. H., Bowen, P. J. & Heddle, D. W. O. Southern hemisphere observations of ultraviolet radiation from celestial objects. I. Experimental techniques and rocket payload technology, 511.
- Anisotropic simple fluids (Green), 437.
- Anodic formation of calomel films on mercury electrodes—an ellipsometric-galvanostatic study (Bockris, Devanathan & Reddy), 327.
- Apparatus for nuclear electron double resonance at 12500 gauss (Richards & White), 474.
- Approximate elastic critical loads of rigidly jointed plane frameworks having redundant members (Waters), 357.
- Aspiration of heavy air-borne particles into a point sink (Davies), 413.
- Bacon, G. E., Curry, N. A. & Wilson, S. A. A crystallographic study of solid benzene by neutron diffraction, 98.
- Bailey J. E. The monoclinic-tetragonal transformation and associated twinning in thin films of zirconia, 395.
- Barnard, J. A. & Honeyman, T. W. The gaseous oxidation of acetone. I. The high-temperature reaction, 236.
- Barnard, J. A. & Honeyman, T. W. The gaseous oxidation of acetone. II. The low-temperature reaction, 249.
- Barron, T. H. K., Leadbetter, A. J. & Morrison, J. A. The thermal properties of alkali halide crystals. IV. Analysis of thermal expansion measurements, 62.
- Bates, D. R. & Kingston, A. E. Recombination and energy balance in a decaying plasma. I. $H-H^+ - e$ plasma, 10.
- Bates, D. R. & Kingston, A. E. Recombination and energy balance in a decaying plasma. II. $He-He^+ - e$ plasma, 32.
- Beeby, J. L. The electronic structure of disordered systems, 82.
- Bilby, B. A., Cottrell, A. H., Smith, E. & Swinden, K. H. Plastic yielding from sharp notches, 1.
- Bockris, J. O'M., Devanathan, M. A. V. & Reddy, A. K. N. The anodic formation of calomel films on mercury electrodes—an ellipsometric-galvanostatic study, 327.
- Bottomley, M. J., Parry, G. S. & Ubbelohde, A. R. Thermal expansion of some salts of graphite, 291.
- Bowen, P. J. *See* Alexander, Bowen & Heddle.
- Camerman, A. & Trotter, J. The crystal and molecular structure of perylene, 129.
- Churchill, M. R. & Mason, R. The crystal and molecular structure of π -cyclopentadienyl 1-phenylcyclopentadiene cobalt, 191.
- Cornwell, J. F. On the theory of the low temperature spontaneous magnetization of ferromagnetic metals, 346.
- Cottrell, A. H. *See* Bilby, Cottrell, Smith & Swinden.
- Crystal and molecular structure of π -cyclopentadienyl 1-phenylcyclopentadiene cobalt (Churchill & Mason), 191.
- Crystal and molecular structure of perylene (Camerman & Trotter), 129.
- Crystal and molecular structure of tetrakis (trifluoromethyl)cyclopentadienone- π -cyclopentadienyl cobalt (Gerloch & Mason), 170.
- Crystallographic study of solid benzene by neutron diffraction (Bacon, Curry & Wilson), 98.
- Curry, N. A. *See* Bacon, Curry & Wilson.

- Davies, C. N. The aspiration of heavy air-borne particles into a point sink, 413.
- Decay of the triplet state. II. Rate and mechanism in the gas phase (Porter & West), 302.
- Devanathan, M. A. V. *See* Bockris, Devanathan & Reddy.
- Dewey, J. M. The air velocity in blast waves from t.n.t. explosions, 366.
- Direct observation of polymer molecules and determination of their molecular weight (Richardson), 50.
- Edwards, S. F. & Gulyaev, Y. V. Path integrals in polar co-ordinates, 229.
- Electron content of the ionosphere at middle latitudes in summer (Taylor), 497.
- Electronic structure of disordered systems (Beeby), 82.
- Electron transfer reactions and living polymers (Review Lecture) (Szwarc), 260.
- Fifth virial coefficient of a fluid of hard spheres (Rowlinson), 147.
- Figgis, B. N., Gerloch, M. & Mason, R. The paramagnetic anisotropies and ligand fields of the tetrahedral cobaltous chlorides and thiocyanate, 210.
- Friedlander, F. G. On the radiation field of pulse solutions of the wave equation. II, 386.
- Gaseous oxidation of acetone. I. The high-temperature reaction (Barnard & Honeyman), 236.
- Gaseous oxidation of acetone. II. The low-temperature reaction (Barnard & Honeyman), 249.
- Gaydon, A. G., Kimbell, G. H. & Palmer, H. B. A shock-tube study of the kinetics of decomposition of carbon disulphide, 313.
- Gerloch, M. *See* Figgis, Gerloch & Mason.
- Gerloch, M. & Mason, R. The crystal and molecular structure of tetrakis(trifluoromethyl)-cyclopentadienone- π -cyclopentadienyl cobalt, 170.
- Green, A. E. Anisotropic simple fluids, 437.
- Gross, M. J. & Heddle, D. W. O. Southern hemisphere observations of ultra-violet radiation from celestial objects. II. The angular motion of a freely falling rocket, 523.
- Growth history of a natural octahedral diamond (Harrison & Tolansky), 490.
- Gulyaev, Y. V. *See* Edwards & Gulyaev.
- Harrison, E. R. & Tolansky, S. Growth history of a natural octahedral diamond, 490.
- Heddle, D. W. O. *See* Alexander, Bowen & Heddle; Gross & Heddle.
- Heddle, D. W. O. Southern hemisphere observations of ultra-violet radiation from celestial objects. III. Stellar photon fluxes at wavelengths near 2000 Å, 533.
- Holbeche, T. A. & Spence, D. A. A theoretical and experimental investigation of temperature variation behind attenuating shock waves, 111.
- Honeyman, T. W. *See* Barnard & Honeyman.
- Huffington, J. D. A study of the microtopography of some surfaces by means of a friction technique, 161.
- Integration of Maxwell's equations, and charge and dipole fields (Ward), 562.
- Isotope effect in hydrocarbon flame bands (deuterium substitution) (Vaidya), 572.
- Kimbell, G. H. *See* Gaydon, Kimbell & Palmer.
- Kingston, A. E. *See* Bates & Kingston.
- Leadbetter, A. J. *See* Barron, Leadbetter & Morrison.
- Longuet-Higgins, M. S. Planetary waves on a rotating sphere, 446.
- Lord, R. G. The aerodynamic resistance to a rotating sphere in the transition régime between free molecule and continuum creep flow, 39.

- Marsh, D. M. Plastic flow in glass, 420.
- Mason, R. *See* Churchill & Mason; Figgis, Gerloch & Mason; Gerloch & Mason.
- Monoclinic-tetragonal transformation and associated twinning in thin films of zirconia (Bailey), 395.
- Morrison, J. A. *See* Barron, Leadbetter & Morrison.
- Nuclear electron double resonance at 12500 gauss (Richards & White), 481.
- Palmer, H. B. *See* Gaydon, Kimbell & Palmer.
- Pandya, T. P. & Weinberg, F. J. The structure of flat, counter-flow diffusion flames, 544.
- Paramagnetic anisotropies and ligand fields of the tetrahedral cobaltous chlorides and thiocyanate (Figgis, Gerloch & Mason), 210.
- Parry, G. S. *See* Bottomley, Parry & Ubbelohde.
- Path integrals in polar co-ordinates (Edwards & Gulyaev), 229.
- Planetary waves on a rotating sphere (Longuet-Higgins), 446.
- Plastic flow in glass (Marsh), 420.
- Plastic yielding from sharp notches (Bilby, Cottrell, Smith & Swinden), 1.
- Porter, G. & West, P. Decay of the triplet state. II. Rate and mechanism in the gas phase, 302.
- Radiation field of pulse solutions of the wave equation. II (Friedlander), 386.
- Recombination and energy balance in a decaying plasma. I. $H-H^+-e$ plasma (Bates & Kingston), 10.
- Recombination and energy balance in a decaying plasma. II. $He-He^+-e$ plasma (Bates & Kingston), 32.
- Reddy, A. K. N. *See* Bockris, Devanathan & Reddy.
- Review Lecture. Electron transfer reactions and living polymers (Szwarc), 260.
- Richardson, M. J. The direct observation of polymer molecules and determination of their molecular weight, 50.
- Richards, R. E. & White, J. W. Apparatus for nuclear electron double resonance at 12500 gauss, 474.
- Richards, R. E. & White, J. W. Nuclear electron double resonance at 12500 gauss, 481.
- Rowlinson, J. S. The fifth virial coefficient of a fluid of hard spheres, 147.
- Shock-tube study of the kinetics of decomposition of carbon disulphide (Gaydon, Kimbell & Palmer), 313.
- Smith, E. *See* Bilby, Cottrell, Smith & Swinden.
- Southern hemisphere observations of ultra-violet radiation from celestial objects.
- I. Experimental techniques and rocket payload technology (Alexander, Bowen & Heddle), 511.
- II. The angular motion of a freely falling rocket (Gross & Heddle), 523.
- III. Stellar photon fluxes at wavelengths near 2000 Å (Heddle), 533.
- Spence, D. A. *See* Holbeche & Spence.
- Structure of flat, counter-flow diffusion flames (Pandya & Weinberg), 544.
- Study of the microtopography of some surfaces by means of a friction technique (Huffington), 161.
- Swinden, K. H. *See* Bilby, Cottrell, Smith & Swinden.
- Szwarc, M. Review Lecture. Electron transfer reactions and living polymers, 260.
- Taylor, G. N. The electron content of the ionosphere at middle latitudes in summer, 497.

- Theoretical and experimental investigation of temperature variation behind attenuating shock waves (Holbeche & Spence), 111.
- Theory of the low temperature spontaneous magnetization of ferromagnetic metals (Cornwell), 346.
- Thermal expansion of some salts of graphite (Bottomley, Parry & Ubbelohde), 291.
- Thermal properties of alkali halide crystals. IV. Analysis of thermal expansion measurements (Barron, Leadbetter & Morrison), 62.
- Tolansky, S. *See* Harrison & Tolansky.
- Trotter, J. *See* Camerman & Trotter.
- Ubbelohde, A. R. *See* Bottomley, Parry & Ubbelohde.
- Vaidya, W. M. Isotope in hydrocarbon flame bands (deuterium substitution), 572.
- Ward, G. N. On the integration of Maxwell's equations, and charge and dipole fields, 562.
- Waters, H. The approximate elastic critical loads of rigidly jointed plane frameworks having redundant members, 357.
- Weinberg, F. J. *See* Pandya & Weinberg.
- West, P. *See* Porter & West.
- White, J. W. *See* Richards & White.
- Wilson, S. A. *See* Bacon, Curry & Wilson.
