SERIES A VOLUME 297

No. 1448 27 February 1967

A DISCUSSION ON CIRCULAR DICHROISM-ELECTRONIC AND STRUCTURAL PRINCIPLES ORGANIZED BY R. S. NYHOLM, F.R.S.

A. GENERAL PRINCIPLES		PAGE
Introductory remarks. By R. S. Nyholm, F.R.S.		2
General principles. By S. F. Mason		3
Some remarks on the interpretation of natural and magnetically induced optical activity data. By A. Moscowitz		16
B. ORGANIC CHROMOPHORES		
Some coupled chromophores. By R. C. Cookson		27
Some comments on the relevance of charge transfer for the 300 nm transition in β , γ unsaturated ketones. By A. Moscowitz		40
Low temperature circular dichroism: conformational effects. By G. Snatzke		43
Numerical evaluation of Kramers-Kronig relations. By C. A. Emeis, L. J. Oosterhoff and Gonda de Vries		54
Carboxyl and aromatic chromophores: optical rotatory dispersion and circular dichroism studies. By W. Klyne		66
C. COORDINATION COMPOUNDS		
The effect of ring size and conformation on the rotatory strength of tris-(bidentate) complexes. By F. Woldbye		79
Stereospecific induction. By B. Bosnich		88
The angular overlap model applied to chiral chromophores and the parentage interrelation of absolute configurations. By C. E. Schäffer		96
Circular dichroism and configuration of complexes of amino acids. By R. D. Gillard		134
D. MACROMOLECULES		
Optical rotation in helical polymers. By A. D. McLachlan		141
Circular dichroism of helical polynucleotide chains. By J. Brahms		150
Circular dichroism of polypeptides. By W. B. Gratzer		163
Closing remarks. By Sir Christopher Ingold, F.R.S.		171

No. 1449 28 February 1967

Review Lecture The annulenes. By F. Sondheimer		173
Tipping effects in Azbel-Kaner cyclotron resonance. By D. A. Smith		205
Optical properties of arsenic trisulphide. By B. L. Evans and P. A. Young. (Plate 1)		230
Construction of singularity-free spherically symmetric space-time manifolds. By H. P. Künzle		244
The ferromagnetic domain structure in haematite. By B. Gustard. (Plates 2 and 3)		269
De Haas-van Alphen effect and Fermi surface of ordered alloys of the β brass type. By J.-P. Jan, W. B. Pearson and Y. Saito		275
Collision broadening and shift in the $\lambda 6573$ line of calcium. By G. Smith		288
Interpretation of collision broadening and shift in atomic spectra. By W. R. Hindmarsh, A. D. Petford and G. Smith		296

No. 1450 7 March 1967

	PAGE
Sticking probabilities, heats of adsorption and redistribution processes of nitrogen on tungsten films at 195 and 290 °K. By D. O. Hayward, D. A. King and F. C. Tompkins, F.R.S.	305
Variation of sticking probabilities with temperature and coverage, and desorption spectra for nitrogen on tungsten films. By D. O. Hayward, D. A. King and F. C. Tompkins, F.R.S.	321
Structure factor and direct correlation function for a classical hard sphere fluid. By N. W. Ashcroft and N. H. March	336
A wave equation for massive particles of arbitrary spin. By J. S. Dowker	351
The mechanism of the acetaldehyde pyrolysis. By K. J. Laidler and M. T. H. Liu . . .	365
Paramagnetic resonance and electron nuclear double resonance of substitutional hydrogen atoms in CaF ₂ . By R. G. Bessent, W. Hayes and J. W. Hodby	376
The identification and some physico-chemical consequences of non-basal edge and screw dislocations in graphite. By C. Roscoe and J. M. Thomas. (Plates 4 to 11)	397
Ultrasonic attenuation in white tin crystals. By J. M. Perz and E. R. Dobbs	408
Corrigenda for Volume 291	424

No. 1451 21 March 1967

Studies in polymerization. XVII. The initiation of vinyl polymerization by tetrakis (triphenyl phosphite) nickel (0). By C. H. Bamford, F.R.S. and K. Hargreaves . . .	425
Far infrared spectra of charge-transfer complexes between iodine and substituted pyridines. By R. F. Lake and H. W. Thompson, For.Sec.R.S.	440
Wave theory intrinsic to seismology. By C. L. Pekeris	449
Surface-wave damping in closed basins. By J. W. Miles	459
Diagonal cubic equations and inequalities. By Jane Pitman and D. Ridout	476
Effects of uniaxial stress and electric fields on localized vibrational modes of H ⁻ and D ⁻ ions in CaF ₂ . By W. Hayes and H. F. Macdonald	503
The rates of elementary processes in the chain reaction between hydrogen and oxygen. III. Kinetics of the combination of hydrogen atoms with nitric oxide. By D. B. Hartley and B. A. Thrush	520
The strength of fused silica. By B. A. Proctor, I. Whitney and J. W. Johnson. (Plates 12 and 13)	534
Flow induced in a cylindrical column by a uniformly rotating magnetic field. By C. Devanathan and P. L. Bhatnagar	558
Index	564

A DISCUSSION ON CIRCULAR DICHROISM:
ELECTRONIC AND STRUCTURAL PRINCIPLES

Published by the Royal Society
Burlington House
Piccadilly
London, W. 1

Price £1. 2s. 6d. (U.S. \$3.35)

NOTICE TO AUTHORS AND COMMUNICATORS

No scientific communication or paper is considered, read or published by the Royal Society unless it has been communicated by a Fellow or Foreign Members of the Society whose duty it shall be 'to satisfy himself that any letter, report, or other paper which he may communicate is suitable to be read before the Society' (Statute 64).

In view of the necessity for economy, authors of papers submitted to the Royal Society are required to put their communications in as concise a form as possible. MSS should be typewritten, carefully revised and properly prepared as copy for press. It is desirable that authors should retain copies of their MSS for reference.

The communicator shall also be responsible for the suitable presentation of the MS and for its grammatical correctness. The Secretaries reserve the right to return a MS to the author for retyping or other adequate preparation if it is received prepared or presented in a state which would make it difficult for the compositor to set.

Every paper must be accompanied by *three copies* of a brief summary not exceeding 5% of the length of the paper or one page of 'Proceedings'.

Authors are requested to send in all drawings, diagrams or other illustrations in a state suitable for direct photographic reproduction. They should be drawn on a large scale in Indian ink on Bristol Board or on good quality tracing linen or tracing paper, with temporary lettering in blue pencil. Great care should be exercised in selecting only those that are essential. If unsatisfactory drawings are submitted authors may be required to have them redrawn by a professional artist.

It is to be understood that papers are only accepted on the assumption that authors are prepared to conform with the instructions to authors prescribed by the Royal Society.

Copies of *Notes on the preparation of papers to be communicated to the Royal Society* will be sent to communicators and authors of papers on application to the Executive Secretary.

SUBSCRIPTIONS TO THE 'PROCEEDINGS'

Subscriptions may be placed with the Royal Society, *payable in advance of publication* of the four parts comprising the volume, at the following rates:

Volume in parts as issued	£4. (post free); in the U.S.A. \$12.00
Cloth bound volume	£4. 7s. 6d. (post free); in the U.S.A. \$13.15.
