

THE ROYAL SOCIETY EXPEDITION  
TRISTAN DA CUNHA 1962

BIOLOGICAL AND VOLCANOLOGICAL REPORTS

VOLCANOLOGICAL

The report describes the morphology, geology, and volcanic history of the Tristan da Cunha Group, together with a full description of the 1961–1962 eruption. Petrographic description of the major rock types are included with 29 new analyses.

*Philosophical Transactions of the Royal Society*, Series A, Vol. 256, No. 1075.

140 Pages, Frontispiece, 18 Plates, coloured map. Price £5. 8s. (U.S. \$14.00)

BIOLOGICAL

The report contains articles on the terrestrial botany, the fauna, and effects of the eruption of 1961 on the vegetation and fauna of Tristan da Cunha.

*Philosophical Transactions of the Royal Society*, Series B, Vol. 249, No. 759.

178 Pages, 16 Plates.

Price £5. 2s. (U.S. \$13.25)

## CONTENTS

A DISCUSSION ON THE APPLICATIONS OF ELECTRON SPIN RESONANCE  
IN THE STUDY OF REACTIVE INTERMEDIATES IN CHEMICAL REACTIONS

ORGANIZED BY W. A. WATERS, F.R.S.

WATERS, W. A. Introduction: the scope of electron spin resonance in the study of chemical reactions	<i>pages</i> 287-290
CARRINGTON, A. Electron resonance of gaseous free radicals	291-304
WILMSHURST, T. H., BENNETT, T. J. & SMITH, R. C. Study of short-lived free radicals produced by flash photolysis	305-307
SUGDEN, T. M. Comments on the applicability of electron spin resonance to the study of the kinetics of gas reactions	309-310
BROWN, J. M., THRUSH, B. A. & TUCK, A. F. The study of atom reactions in gases by electron spin resonance	311-314
NORMAN, R. O. C. Electron spin resonance studies of reactions of some short-lived organic radicals in solution	315-319
FISCHER, H. Applications of electron spin resonance in polymer chemistry	321-327
HUYSMANS, W. G. B. & WATERS, W. A. An electron spin resonance study of the oxidation of benzene solutions of phenols by means of silver oxide	329-330
EVANS, A. G. The use of electron spin resonance to measure reaction rates	331-334
HEMMERICH, P. Free radicals of biological interest as studied by electron spin resonance	335-350
BRAY, R. C. & KNOWLES, P. F. Electron spin resonance in enzyme chemistry: the mechanism of action of xanthine oxidase	351-353
WYARD, S. J. Electron spin resonance spectroscopy of animal tissues	355-360
ELLIOTT, J. P. Electron spin resonance spectroscopy of irradiated DNA	361-365
<hr/>	
BATES, D. R. & FLANNERY, M. R. Three-body recombination of positive and negative ions. II. General third body.	367-383
IMAI, H., KEMBALL, C. & WHAN, D. A. The catalytic decomposition of ethers on evaporated tungsten films.	385-398
IMAI, H. & KEMBALL, C. The reaction of water vapour with evaporated tungsten films.	399-407
MATHON, J. & WOHLFARTH, E. P. The temperature dependence of the spin wave energy in the itinerant electron model of ferromagnetism.	409-418
McCLINTOCK, P. V. E. & ROSENBERG, H. M. The effect of a magnetic field on the thermal conductivity of paramagnetic crystals: cerium ethylsulphate.	419-436
