

INDEX TO VOLUME 302 (A)

- Acoustic paramagnetic resonance of Ni^{2+} in potassium magnesium fluoride (Rosenberg & Wigmore), 69.
- Anderson, R. L., Fischer, J. & Rączka, R. Coupling problem for $U(p, q)$ ladder representations. I., 491.
- Anderson, R. L. & Rączka, R. Coupling problem for $U(p, q)$ ladder representations. II. Limitations on the coupling of $U(p, q)$ ladders, 501.
- Applications of electron spin resonance in polymer chemistry (Fischer) (discussion), 321.
- Armour, E. A. G. & Stone, A. J. Calculation of the n.m.r. spin-spin coupling constants in ethylene, 25.
- Bamford, C. H. & Lind, D. J. Studies in polymerization. XVIII. Initiation by metal chelates, 145.
- Bates, D. R. & Flannery, M. R. Three-body recombination of positive and negative ions. II. General third body, 367.
- Beeby, J. L. The density of electrons in a perfect or imperfect lattice, 113.
- Bennett, T. J. *See* Wilmshurst, Bennett & Smith.
- Bićák, J. Gravitational radiation from uniformly accelerated particles in general relativity, 201.
- Billington, E. W. The flow properties of two types of non-Newtonian fluid, 1.
- Bray, R. C. & Knowles, P. F. Electron spin resonance in enzyme chemistry: the mechanism of action of xanthine oxidase (discussion), 351.
- Bretherton, F. P. Propagation in slowly varying waveguides, 555.
- Bretherton, F. P. & Garrett, C. J. R. Wavetrains in inhomogeneous moving media, 529.
- Brown, C. J. The crystal structure of anthranilic acid, 185.
- Brown, J. M., Thrush, B. A. & Tuck, A. F. The study of atom reactions in gases by electron spin resonance (discussion), 311.
- Calculation of the n.m.r. spin-spin coupling constants in ethylene (Armour & Stone), 25.
- Carrington, A. Electron resonance of gaseous free radicals (discussion), 291.
- Catalytic decomposition of ethers on evaporated tungsten films (Imai, Kembal & Whan), 385.
- Christie, M. I. *See* Lambert, Christie, Golesworthy & Linnett.
- Collective motion in the nuclear shell model. IV. Odd-mass nuclei in the sd shell (Elliott & Wilsdon), 509.
- Comments on the applicability of electron spin resonance to the study of the kinetics of gas reactions (Sugden) (discussion), 309.
- Coupling problem for $U(p, q)$ ladder representations. I. (Anderson, Fischer & Rączka), 491.
- Coupling problem for $U(p, q)$ ladder representations. II. Limitations on the coupling of $U(p, q)$ ladders (Anderson & Rączka), 501.
- Craik, D. J. & McIntyre, D. A. Critical size of magnetic particles with high uniaxial anisotropy, 99.
- Critical size of magnetic particles with high uniaxial anisotropy (Craik & McIntyre), 99.
- Crystal and molecular structure of a 1:1 complex of 5-bromouridine and dimethylsulphoxide (Iball, Morgan & Wilson), 225.
- Crystal structure of anthranilic acid (Brown), 185.
- Davies, P. N. & Thrush, B. A. The reactions of atomic oxygen with phosphorus and with phosphine, 243.

- Density of electrons in a perfect or imperfect lattice (Beeby), 113.
- Determination of angular distributions of planes in space (Morton), 51.
- Discussion on the applications of electron spin resonance in the study of reactive intermediates in chemical reactions (Waters and others), 285
- Duell, M. J. The use of a field-emission microscope for the formation and study of whiskers produced on tungsten as a result of chloromethane adsorption, 473.
- Dwyer, F. G., Eagleton, L. C., Wei, J. & Zahner, J. C. The kinetics of deuterium-neopentane exchange: effects of desorption and diffusion, 253.
- Eagleton, L. C. *See* Dwyer, Eagleton, Wei & Zahner.
- Effect of a magnetic field on the thermal conductivity of paramagnetic crystals: cerium ethylsulphate (McClintock & Rosenberg), 419.
- Electronic structure and stability of the inorganic fulminates (Iqbal & Yoffe), 35.
- Electron transition (5515 Å) and the geometric structure of *s*-tetrazine (Merer & Innes), 271.
- Electron resonance of gaseous free radicals (Carrington) (discussion), 291.
- Electron spin resonance in enzyme chemistry: the mechanism of action of xanthine oxidase (Bray & Knowles) (discussion), 351.
- Electron spin resonance spectroscopy of animal tissues (Wyard) (discussion), 355.
- Electron spin resonance spectroscopy of irradiated *DNA* (Elliott) (discussion), 361.
- Electron spin resonance studies of reactions of some short-lived organic radicals in solution (Norman) (discussion), 315.
- Electron spin resonance study of the oxidation of benzene solutions of phenols by means of silver oxide (Huysmans & Waters) (discussion), 329.
- Elliott, J. P. Electron spin resonance spectroscopy of irradiated *DNA* (discussion), 361.
- Elliott, J. P. & Wilsdon, C. E. Collective motion in the nuclear shell model. IV. Odd-mass nuclei in the *sd* shell, 509.
- Evans, A. G. The use of electron spin resonance to measure reaction rates (discussion), 331.
- Fischer, H. Applications of electron spin resonance in polymer chemistry (discussion), 321.
- Fischer, J. *See* Anderson, Fischer & Rączka.
- Flannery, M. E. *See* Bates & Flannery.
- Flow properties of two types of non-Newtonian fluid (Billington), 1.
- Free radicals of biological interest as studied by electron spin resonance (Hemmerich) (discussion), 335.
- Garrett, C. J. R. *See* Bretherton & Garrett.
- Golesworthy, R. C. *See* Lambert, Christie, Golesworthy & Linnett.
- Gravitational radiation from uniformly accelerated particles in general relativity (Bičák), 201.
- Gupta, N. D., Newman, M. F. & Tobin, S. J. On metabelian groups of prime-power exponent, 237.
- Haward, R. N. & Thackray, G. The use of a mathematical model to describe isothermal stress-strain curves in glassy thermoplastics, 453.
- Hemmerich, P. Free radicals of biological interest as studied by electron spin resonance (discussion), 335.
- Huysmans, W. G. B. & Waters, W. A. An electron spin resonance study of the oxidation of benzene solutions of phenols by means of silver oxide (discussion), 329.
- Iball, J., Morgan, C. H. & Wilson, H. R. The crystal and molecular structure of a 1:1 complex of 5-bromouridine and dimethylsulphoxide, 225.

- Imai, H. & Kemball, C. The reaction of water vapour with evaporated tungsten films, 399.
- Imai, H., Kemball, C. & Whan, D. A. The catalytic decomposition of ethers on evaporated tungsten films, 385.
- Innes, K. K. *See* Merer & Innes.
- Introduction: the scope of electron spin resonance in the study of chemical reactions (Waters) (discussion), 286.
- Iqbal, Z. & Yoffe, A. D. Electronic structure and stability of the inorganic fulminates, 35.
- Kemball, C. *See* Imai, Kemball & Whan; *see also* Imai & Kemball.
- Kinetics of deuterium–neopentane exchange: effects of desorption and diffusion (Dwyer, Eagleton, Wei & Zahner), 253.
- Knowles, P. F. *See* Bray & Knowles.
- Kuhns, I. E. & Mason, B. J. The supercooling and freezing of small water droplets falling in air and other gases, 437.
- Lambert, R. M., Christie, M. I., Golesworthy, R. C. & Linnett, J. W. Mass spectrometric study of the reaction of nitrogen atoms with acetaldehyde, 167.
- Lind, D. J. *See* Bamford & Lind.
- Linnett, J. W. *See* Lambert, Christie, Golesworthy & Linnett.
- Longitudinal magnetoresistance in silver and copper between 4.2 and 35 °K (Strom-Olsen), 83.
- McClintock, P. V. E. & Rosenberg, H. M. The effect of a magnetic field on the thermal conductivity of paramagnetic crystals: cerium ethylsulphate, 419.
- McIntyre, D. A. *See* Craik & McIntyre.
- Mason, B. J. *See* Kuhns & Mason.
- Mass spectrometric study of the reaction of nitrogen atoms with acetaldehyde (Lambert, Christie, Golesworthy & Linnett), 167.
- Mathon, J. & Wohlfarth, E. P. The temperature dependence of the spin wave energy in the itinerant electron model of ferromagnetism, 409.
- Merer, A. J. & Innes, K. K. The 5515 Å electron transition and the geometric structure of *s*-tetrazine, 271.
- Metabelian groups of prime-power exponent (Gupta, Newman & Tobin), 237.
- Morgan, C. H. *See* Iball, Morgan & Wilson.
- Morton, V. M. The determination of angular distributions of planes in space, 51.
- Newman, M. F. *See* Gupta, Newman & Tobin.
- Norman, R. O. C. Electron spin resonance studies of reactions of some short-lived organic radicals in solution (discussion), 315.
- Osborn, H. Poles of the two-body Green function, 137.
- Poles of the two-body Green function (Osborn), 137.
- Propagation in slowly varying waveguides (Bretherton), 555.
- Rączka, R. *See* Anderson, Fischer & Rączka; *see also* Anderson & Rączka.
- Reaction of water vapour with evaporated tungsten films (Imai & Kemball), 399.
- Reactions of atomic oxygen with phosphorus and with phosphine (Davies & Thrush), 243.
- Rosenberg, H. M. *See* McClintock & Rosenberg.
- Rosenberg, H. M. & Wigmore, J. K. Acoustic paramagnetic resonance of Ni²⁺ in potassium magnesium fluoride, 69.

- Smith, R. C. *See* Wilmshurst, Bennett & Smith.
- Stone, A. J. *See* Armour & Stone.
- Strom-Olsen, J. O. Longitudinal magnetoresistance in silver and copper between 4.2 and 35 °K, 83.
- Studies in polymerization. XVIII. Initiation by metal chelates (Bamford & Lind), 145.
- Study of atom reactions in gases by electron spin resonance (Brown, Thrush & Tuck), (discussion), 311.
- Study of short-lived free radicals produced by flash photolysis (Wilmshurst, Bennett & Smith) (discussion), 305.
- Sugden, T. M. Comments on the applicability of electron spin resonance to the study of the kinetics of gas reactions (discussion), 309.
- Supercooling and freezing of small water droplets falling in air and other gases (Kuhns & Mason), 437.
- Temperature dependence of the spin wave energy in the itinerant electron model of ferromagnetism (Mathon & Wohlfarth), 409.
- Thackray, G. *See* Haward & Thackray.
- Three-body recombination of positive and negative ions. II. General third body (Bates & Flannery), 367.
- Thrush, B. A. *See* Brown, Thrush & Tuck; *see also* Davies & Thrush.
- Tobin, S. J. *See* Gupta, Newman & Tobin.
- Tuck, A. F. *See* Brown, Thrush & Tuck.
- Use of a field-emission microscope for the formation and study of whiskers produced on tungsten as a result of chloromethane adsorption (Duell), 473.
- Use of a mathematical model to describe isothermal stress-strain curves in glassy thermoplastics (Haward & Thackray), 453.
- Use of electron spin resonance to measure reaction rates (Evans) (discussion), 331.
- Waters, W. A. and others. A discussion on the applications of electron spin resonance in the study of reactive intermediates in chemical reactions, 285.
- Waters, W. A. Introduction: the scope of electron spin resonance in the study of chemical reactions (discussion), 286.
- Waters, W. A. *See* Huysmans & Waters.
- Wavetrains in inhomogeneous moving media (Bretherton & Garrett), 529.
