POSTGRADUATE TRAINING IN THE UNITED KINGDOM

In November 1965 the Council of the Royal Society decided to set up an ad hoc committee to examine postgraduate training in science and technology in the United Kingdom. It was decided to investigate the content and quality of the training especially for the Ph.D. degree. Six subjects groups were set up, the studies in each to be made by groups of Fellows of the Royal Society and others: the subject groups investigated are biology, chemistry, engineering, Earth sciences, mathematics and physics, and each group has a Fellow of the Royal Society as its chairman.

The reports were compiled after consultation with heads of departments in centres in postgraduate training and contain a summary of their comments, together with each group’s conclusions and recommendations. The first four have been published and may be obtained from the Executive Secretary, 6 Carlton House Terrace, London, S.W. 1, or any bookseller.

| Report No. 1 | Chemistry       | 6s.  (U.S. 80 cents) |
| Report No. 2 | Physics         | 7s. 6d. (U.S. $1.00) |
| Report No. 3 | Biology         | 7s. 6d. (U.S. $1.00) |
| Report No. 4 | Applied Mathematics | 7s. 6d. (U.S. $1.00) |

CONTENTS

A DISCUSSION ON SCIENCE AND TECHNOLOGY OF AEROSOL POLLUTION

ORGANIZED BY A. R. UBBELOHDE, F.R.S. AND T. M. SUGDEN, F.R.S.

[Plates 7 to 14]

UBBELOHDE, A. R. Introductory remarks. pages 139–140

HOMANN, K. H. & WAGNER, H. G. Chemistry of carbon formation in flames. 141–152

AGNEW, W. G. Automotive air pollution research. 153–181

BURT, R. & THOMAS, A. Aerosol pollution from internal combustion engines. 183–194

WEINBERG, F. J. Electrical aspects of aerosol formation and control. 195–208

STAIRMAND, C. J. Some industrial problems of aerosol pollution. 209–214

WILSON, M. J. G. Indoor air pollution. 215–221

LAWThER, P. J., ELLISON, J. McK. & WALLER, R. E. Some medical aspects of aerosol research. 223–234

Price £1. 15s. (U.S. $4.55)  

Published by the Royal Society, 6 Carlton House Terrace, London, S.W. 1
