SYMBOLS, SIGNS, AND ABBREVIATIONS RECOMMENDED FOR BRITISH SCIENTIFIC PUBLICATIONS

A REPORT BY THE SYMBOLS COMMITTEE OF THE ROYAL SOCIETY

1969

Since the publication in 1951 of the last Report of the Symbols Committee of the Royal Society considerable progress has been made towards international agreement on the names and symbols for physical quantities, on the definitions, names, and symbols for units, and on the rules for the expression of relations involving numbers between physical quantities and units.

The recommendations of the following international bodies, on each of which the U.K. is represented, are in virtually complete agreement wherever they overlap:

- The General Conference on Weights and Measures
- The International Organization for Standardization
- The International Union of Pure and Applied Physics
- The International Union of Pure and Applied Chemistry
- The International Electrochemical Commission

The British Standard B.S. 1991, Part 1, second edition, 1967, is also in virtually complete agreement with the international recommendations.

This new version of the Report of the Symbols Committee thus recommends the procedures and symbols which have been internationally agreed.

Price 7s. per copy, or £6 per 25 copies from The Royal Society, 6 Carlton House Terrace, London, S.W.1, or through booksellers.

SUBSCRIPTIONS TO THE ‘PROCEEDINGS’

Subscriptions may be placed with the Royal Society, payable in advance of publication of the four parts comprising the volume, at the following rates:

- Volume in parts as issued: £6 5s (post free); in the U.S.A. $16.00
- Cloth bound volume: £7 (post free); in the U.S.A. $18.00
CONTENTS

A Discussion on making a success of research in industry under the leadership of Professor M. J. Lighthill, Sec.R.S.

Lighthill, M. J. Introductory remarks  pages 293–294

Jones, F. E., Some factors governing the selection and control of research projects in industry  295–300
Discussion: Sir Harold Hartley, F.R.S., G. B. R. Fielden, F.R.S.

Collingwood, J. G. Profitable research in a marketing oriented business  301–307

Rose, J. D. ‘Research for survival’  309–316

Tishler, M. ‘Secrets of high moment’  317–324
Discussion: G. D. W. Smith

Docksey, P. The interrelation of petroleum research and company activities  325–332

Eltis, E. M. The influence of effective research and development on the aero engine business  333–347

Eastwood, E. Research in the electrical industry  349–366
Discussion: K. H. Spring

Clayton, R. J. The research worker in industry  367–368

Lighthill, M. J. Concluding remarks  369–370

Murray, J. J. & Umbrelohe, A. R.
Electronic properties of some synthetic metals derived from graphite  371–380

Barber, J. R.
Thermoelastic instabilities in the sliding of conforming solids  381–394

Nonlinear wave processes in electrodynamics  395–397

Brown, J. & Tipper, C. F. H.
The cool flame combustion of ethanol  399–415

Braun, W., Bass, A. M., Davis, D. D. & Simmons, J. D.
Flash photolysis of carbon suboxide: absolute rate constants for reactions of C(3P) and C(1D) with H2, N2, CO, NO, O2 and CH4. [Plates 9 and 10]  417–434
