

GENERAL NOTES ON THE PREPARATION OF SCIENTIFIC PAPERS

Second Edition

October 1965

5s (U.S. 65 cents)

The purpose of these general notes is first to assist authors in the writing of scientific papers in an acceptable style and secondly to suggest the introduction of greater uniformity in the general approach to the preparation of scientific papers for publication. It is, nevertheless, clear that specialized subjects may call for particular methods of presentation, and these notes should be read in conjunction with any instructions issued by the journal in which the author hopes to publish.

This revised and extended edition has been prepared with the assistance of editors of scientific journals attending Conferences of Editors organized by the Royal Society.
