

INDEX TO VOLUME 321 (A)

- Activity coefficients of electrolytes with particular reference to aqueous mixtures of 2:2 with 1:1 electrolytes (Gardner & Glueckauf), 515.
- Address of the President, Lord Blackett, O.M., C.H., at the Anniversary Meeting, 30 November 1970, 1.
- Adiabatic flash photolysis of NO_2 and SO_2 (Basco & Morse), 129.
- Angular momentum coherent states (Atkins & Dobson), 321.
- Armit, A. P. Example of an existing system in university research. Multipatch and Multiobject design systems (discussion), 235.
- Atkins, P. W. & Dobson, J. C. Angular momentum coherent states, 321.
- Bamford, C. H. & Ferrar, A. N. Studies in polymerization. XIX. Initiation by metal chelates in the presence of electron donors, 425.
- Basco, N. & Morse, R. D. The adiabatic flash photolysis of NO_2 and SO_2 , 129.
- Baxter, M. S. & Walton, A. Fluctuations of atmospheric carbon-14 concentrations during the past century, 105.
- Bézier, P. E. Example of an existing system in the motor industry: the Unisurf system (discussion), 207.
- Blackett, Lord, O.M., C.H. Address of the President at the Anniversary Meeting, 30 November 1970, 1.
- Bolton, H. C. & McWilliam, I. G. Ionization in flames: current-voltage relationships for the flame ionization detector, 361.
- Bowrey, M. & Purnell, J. H. The pyrolysis of disilane and rate constants of silene insertion reactions, 341.
- Budden, K. G. & Terry, P. D. Radio ray tracing in complex space, 275.
- Budden, K. G. & Uscinski, B. J. The scintillation of extended radio sources when the receiver has a finite bandwidth. II. Multiple scatter, 15.
- Chasen, S. H. The effect of new computer technology on the design of mechanisms (discussion), 177.
- Communication between an engineer and a computer (discussion) (Lang), 243.
- Computational geometry (discussion) (Forrest), 187.
- Computer-aided press-tool design (discussion) (Davy), 157.
- Computer parts description (discussion) (Day), 169.
- Crangle, J. & Goodman, G. M. The magnetization of pure iron and nickel, 477.
- Dale, M. R. Gear-train design (discussion), 163.
- Davy, D. W. Computer-aided press-tool design (discussion), 157.
- Day, J. T. Computer parts description (discussion), 169.
- Degree of sharpness in solutions of Einstein's field equations (Waylen), 397.
- Dennis, R. B., Smith, S. D. & Summers, C. J. Oscillatory non-resonant interband Faraday rotation in InSb and PbTe—a new magneto-optical effect, 303.
- Derivation of Green-type, transitional and uniform asymptotic expansions from differential equations. V. Angular oblate spheroidal wavefunctions $\overline{ps}_n^*(\eta, h)$ and $\overline{qs}_n^*(\eta, h)$ for large h (Jorna & Springer), 545.
- Developing laminar flow in a pipe of circular cross-section (Fargie & Martin), 461.
- Discussion on computer aids in mechanical engineering design and manufacture (Hawthorne, Edwards and others), 143.

- Dissociation of the sheep haemoglobin molecule at neutral pH. I. Osmotic pressure measurements. II. Sedimentation equilibrium measurements (Abstracts) (Jonson & Perrella), 141.
- Dobson, J. C. *See* Atkins & Dobson.
- Edwards, Sir George. *See* Hawthorne, Edwards and others.
- Effect of new computer technology on the design of mechanisms (discussion) (Chasen), 177.
- Electronic anomalies in dilute synthetic metals (Ubbelohde), 445.
- Example of an existing system in the motor industry: the Unisurf system (discussion) (Bézier), 207.
- Example of an existing system in the ship-building industry: the Autokon system (Mehlum & Sørensen), 219.
- Example of an existing system in university research. Multipatch and Multiobject design systems (discussion) (Armit), 235.
- Exchange reactions of olefins with deuterium oxide on ion-exchanged X-type zeolites (Kemball & McCosh), 259.
- Existing system in the aircraft industry. The British Aircraft Corporation Numerical Master Geometry system (discussion) (Sabin), 197.
- Fargie, D. & Martin, B. W. Developing laminar flow in a pipe of circular cross-section, 461.
- Ferrar, A. N. *See* Bamford & Ferrar.
- Finite compression of elastic solid cylinders in the presence of gravity (Vaughan), 381.
- Flame stabilization by plasma jets (Harrison & Weinberg), 95.
- Fluctuations of atmospheric carbon-14 concentrations during the past century (Baxter & Walton), 105.
- Forrest, A. R. Computational geometry (discussion), 187.
- Gardner, A. W. & Glueckauf, E. The activity coefficients of electrolytes with particular reference to aqueous mixtures of 2:2 with 1:1 electrolytes, 515.
- Gear-train design (Dale) (discussion), 163.
- Glencross, W. M. *See* Herring, Glencross, Parkinson & Pounds.
- Glueckauf, E. *See* Gardner & Glueckauf.
- Goodman, G. M. *See* Crangle & Goodman.
- Harrison, A. J. & Weinberg, F. J. Flame stabilization by plasma jets, 95.
- Hawthorne, Sir William, Edwards, Sir George and others—A discussion on computer aids in mechanical engineering design and manufacture, 143.
- Hawthorne, Sir William. Introductory remarks to a discussion, 145.
- Herring, J. R. H., Glencross, W. M., Parkinson, J. H. & Pounds, K. A. A satellite-borne X-ray spectroheliograph, 493.
- Hydrogen–deuterium exchange reactions on ion-exchanged X-type zeolites (Kemball & McCosh), 249.
- Introductory remarks to a discussion (Hawthorne), 145.
- Ionization in flames: current–voltage relationships for the flame ionization detector (Bolton & McWilliam), 361.
- Johnson, P. & Perrella, M. On the dissociation of the sheep haemoglobin molecule at neutral pH. I. Osmotic pressure measurements. II. Sedimentation equilibrium measurements (Abstracts), 141.

- Jones, I. T. N. & Wayne, R. P. The photolysis of ozone by ultraviolet radiation V. Photochemical formation of $O_2(^1\Delta_g)$, 409.
- Jorna, S. & Springer, C. Derivation of Green-type, transitional and uniform asymptotic expansions from differential equations. V. Angular oblate spheroidal wavefunctions $\overline{ps}_n^r(\eta, h)$ and $\overline{qs}_n^r(\eta, h)$ for large h , 545.
- Kemball, C. & McCosh, R. Exchange reactions of olefins with deuterium oxide on ion-exchanged X-type zeolites, 259.
- Kemball, C. & McCosh, R. Hydrogen-deuterium exchange reactions on ion-exchanged X-type zeolites, 249.
- Lang, C. A. Communication between an engineer and a computer (discussion), 243.
- McCosh, R. *See* Kemball & McCosh.
- McWilliam, I. G. *See* Bolton & McWilliam.
- Magnetization of pure iron and nickel (Crangle & Goodman), 477.
- Martin, B. W. *See* Fargie & Martin.
- Mehlum, E. & Sørensen, P. F. Example of an existing system in the ship-building industry: the Autokon system (discussion), 219.
- Miles, J. L. Solid-state anodization of aluminium beryllium, and, zirconium, 503.
- Molecular quantum electrodynamics (Woolley), 557.
- Morse, R. D. *See* Basco & Morse.
- Oscillatory non-resonant interband Faraday rotation in InSb and PbTe—a new magneto-optical effect (Dennis, Smith & Summers), 303.
- Parkinson, J. H. *See* Herring, Glencross, Parkinson & Pounds.
- Penny, F. D. State of the art (discussion), 147.
- Perrella, M. *See* Johnson & Perrella.
- Photolysis of ozone by ultraviolet radiations. V. Photochemical formation of $O_2(^1\Delta_g)$ (Jones & Wayne), 409.
- Pounds, K. A. *See* Herring, Glencross, Parkinson & Pounds.
- Preliminary investigation of the use of focused laser beams for minimum ignition energy studies (Weinberg & Wilson), 41.
- Propagation of very low-frequency radio waves in ducts in the magnetosphere (Walker), 69.
- Purnell, J. H. *See* Bowrey & Purnell.
- Pyrolysis of disilane and rate constants of silene insertion reactions (Bowrey & Purnell), 341.
- Radio ray tracing in complex space (Budden & Terry), 275.
- Sabin, M. A. An existing system in the aircraft industry. The British Aircraft Corporation Numerical Master Geometry system (discussion), 197.
- Satellite-borne X-ray spectroheliograph (Herring, Glencross, Parkinson & Pounds), 493.
- Scintillation of extended radio sources when the receiver has a finite bandwidth. II. Multiple scatter (Budden & Uscinski), 15.
- Solid-state anodization of aluminium, beryllium, and zirconium (Miles), 503.
- Sørensen, P. F. *See* Mehlum & Sørensen.
- Smith, S. D. *See* Dennis, Smith & Summers.
- Springer, C. *See* Jorna & Springer.

- State of the art (discussion) (Penny), 147.
- Studies in polymerization XIX. Initiation by metal chelates in the presence of electron donors (Bamford & Ferrar), 425.
- Summers, C. J. *See* Dennis, Smith & Summers.
- Terry, P. D. *See* Budden & Terry.
- Theoretical analysis and computer simulation of the growth of epitaxial films (Vincent), 53.
- Ubbelohde, A. R. Electronic anomalies in dilute synthetic metals, 445.
- Uscinski, B. J. *See* Budden & Uscinski.
- Vaughan, H. The finite compression of elastic solid cylinders in the presence of gravity, 381.
- Vincent, R. A theoretical analysis and computer simulation of the growth of epitaxial films, 53.
- Walker, A. D. M. The propagation of very low-frequency radio waves in ducts in the magnetosphere, 69.
- Walton, A. *See* Baxter & Walton.
- Waylen, P. C. On the degree of sharpness in solutions of Einstein's field equations, 397.
- Wayne, R. P. *See* Jones & Wayne.
- Weinberg, F. J. & Wilson, J. R. A preliminary investigation of the use of focused laser beams for minimum ignition energy studies, 41.
- Weinberg, F. J. *See* Harrison & Weinberg.
- Wilson, J. R. *See* Weinberg & Wilson.
- Woolley, R. G. Molecular quantum electrodynamics, 557.
