## *Subject index*

Acetaldehyde vapour, fluorescence and phosphorescence, the effect of temperature, pressure and excitation wavelength, 385.

Alkali graphite, 51.

Alkali halides, thermal expansion at low temperatures, 237.

Autoionization in ScI, 1.

Autoionization in YI, 17.

Breakouts – of metal through refractories, 133.

Clean polymers, hindered transport of compact particles through solutions of, 297.

Chromatography; model-independent aspects of tracer chromatography theory, 89.

Compaction of powdered materials, mechanisms of, 183.

Convection effects on the oscillatory flow past an infinite, vertical, porous plate, 25, 37.

Convective diffusion with interphase mass transfer, 115.

Crystallography and nucleation of pearlite, 455.

Diamond wear, 435.

Diatomics in molecules, and the symmetric group; an application to small lithium clusters, 69.

d-orbital involvement in Si—N bond, 225.

E.s.c.a.; theory of core hole states, 201.

Fatigue crack propagation theory, 337.

Flow, oscillatory, past an infinite, vertical, porous plate, effects of free convection effects, 25, 37.

Free radicals, 265.

Heat transfer problems; exact solution by Wiener–Hopf technique. I, 347.

Helium film, comments on two-fluid model of, 261.

Hexamethylenetetramine interatomic forces, 363.

Hydrogen-atom recombination – Monte Carlo simulation, 419.

Infinite-component relativistic wave equation, 217.

Interatomic forces in hexamethylenetetramine, 363.

Light wave, momentum of, in a refractory medium, 149.

Long range forces, 403.

Lubricant films, shear strength measurements of, 99.

Majorana equation, 217.

Microwave spectroscopy, 265.

Miscible dispersion with interphase mass transfer, 115.

Molecular-sieve type sorption, 51.

Monte Carlo simulation of hydrogen-atom recombination, 419.
