A DISCUSSION ON THE SCIENTIFIC RESULTS FROM THE
PROSPERO AND ARIEL 4 SATELLITES

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG

NOTICE TO CONTRIBUTORS TO
PROCEEDINGS AND PHILOSOPHICAL TRANSACTIONS
OF THE ROYAL SOCIETY

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the *Proceedings* and longer papers and those with numerous or large illustrations for the *Philosophical Transactions*.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The 'Instructions to authors' are also printed in every fifth volume of the *Proceedings* A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper; any diagrams should be drawn in a size to permit blockmaking at a reduction to about one half linear, the lettering being inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper should normally be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the *Year Book of the Royal Society*. In the event of any difficulty, an author is invited to send the paper direct to the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

A DISCUSSION ON THE SCIENTIFIC RESULTS FROM THE PROSPERO AND ARIEL 4 SATELLITES

ARRANGED BY THE BRITISH NATIONAL COMMITTEE ON
SPACE RESEARCH UNDER THE LEADERSHIP OF

SIR HARRIE MASSEY, SEC.R.S., R. DALZIEL
AND D. G. KING-HELE, F.R.S.

(Discussion held 9 January 1974 - MSS received 19 August 1974)

[Plates 2-6]

CONTENTS

	PAGE
R. DALZIEL The Ariel 4 satellite	161
J. D. CRAVEN AND L. A. FRANK Observations of angular distributions of low energy electron intensities over the auroral zones with Ariel 4	167
C. V. GOODALL, H. D. HOPKINS, Y. KABASAKAL TULUNAY AND R. J. D'ARCY Topside ionosphere electron density measurements on Ariel 4	189
K. BULLOUGH, M. DENBY, W. GIBBONS, A. R. W. HUGHES, T. R. KAISER AND A. R. L. TATNALL E.l.f./v.l.f. emissions observed on Ariel 4	207
D. WALSH, A. P. HAYES AND V. A. W. HARRISON Observations of radio frequency noise from Ariel 4	227
P. A. SMITH Cerenkov relations between r.f. noise and energetic particles on Ariel 4	241
R. H. GOODING The orbits of Ariel 4 and Prospero	257
H. J. H. SKETCH The Prospero satellite	265
D. K. BEDFORD Observations of the micrometeoroid flux from Prospero	277
