

INDEXES TO VOLUME 347 (A)

Author index

- Atiyah, M. F. Bakerian Lecture, 1975. Global geometry, 291.
- Bernstein, J., Regev, H., Herbststein, F. H., Main, P., Rizvi, S. H., Sasvari, K. & Turcsanyi, B. The crystal structure of the π -molecular compound pyrene: *p*-benzoquinone, 419.
- Billett, D. F. *See* Requena, Billett & Haydon.
- Birchley, J. C. Droplet combustion in a stream of oxidant, 195.
- Braginsky, S. I. & Roberts, P. H. Magnetic field generation by baroclinic waves, 125.
- Brooks, D. E., Levine, Y. K., Requena, J. & Haydon, D. A. Van der Waals forces in oil-water systems from the study of thin lipid films. III. Comparison of experimental results with Hamaker coefficients calculated from Lifshitz theory, 179.
- Cannell, P. A. Edge scattering of aerodynamic sound by a lightly loaded elastic half-plane 213.
- Cheeseman, K. J. *See* Evans, Nye & Cheeseman.
- Cole, R. J. & Pack, D. C. Some complementary bivariational principles for linear integral equations of Fredholm type, 239.
- Connerade, J. P. Centrifugal barrier perturbation of the n d series in Ca II, 575.
- Connerade, J. P. Potential barrier effects in the absorption spectrum of Xe I between 18 and 90 Å, 581.
- Davies, P. A. *See* Schurnmann & Davies.
- Duruz, J. J. & Ubbelohde, A. R. Some novel electromagnetic effects in the conductivity of molten organic salts, 301.
- Evans, D. C. B., Nye, J. F. & Cheeseman, K. J. The kinetic friction of ice, 493.
- Eve, M. The use of path integrals in guided wave theory, 405.
- Franklin, R. N., Hamberger, S. M., Lampis, G. & Smith, G. J. Nonlinear behaviour of a finite amplitude electron plasma wave. I. Electron trapping effects, 1.
- Franklin, R. N., Hamberger, S. M., Lampis, G. & Smith, G. J. Nonlinear behaviour of a finite amplitude electron plasma wave. II. Wave-wave interactions, 25.
- Gaster, M. A theoretical model of a wave packet in the boundary layer on a flat plane, 271.
- Gaster, M. & Grant, I. An experimental investigation of the formation and development of a wave packet in a laminar boundary layer, 253.
- Good, I. J. & Tideman, T. N. From individual to collective ordering through multi-dimensional attribute space, 371.
- Grant, I. *See* Gaster & Grant.
- Green, A. E. & Naghdi, P. M. Directed fluid sheets, 447.
- Hamberger, S. M. *See* Franklin, Hamberger, Lampis & Smith.
- Hartland, S. *See* Leidi & Hartland.
- Haydon, D. A. *See* Brooks, Levine, Requena & Haydon; *also* Requena, Billett & Haydon; Requena & Haydon.
- Herbstein, F. H. *See* Bernstein, Regev, Herbststein, Main and others.
- Hill, D. A formalism for the indirect Auger effect. II, 565.
- Hill, D. & Landsberg, P. T. A formalism for the indirect Auger effect. I, 547.

- Howe, M. S. The attenuation of sound by a randomly irregular impedance layer, 513.
- Johnson, R. S. On the modulation of water waves on shear flow, 537.
- Kléman, M. Remarks on a possible elasticity of membranes and lamellar media: disordered layers, 387.
- Lampis, G. *See* Franklin, Hamberger, Lampis & Smith.
- Landsberg, P. T. *See* Hill & Landsberg.
- Lardner, R. W. The development of plane shock waves in nonlinear viscoelastic media, 329.
- Leidi, M. & Hartland, S. Rows of two dimensional drops at fluid/liquid interfaces, 75.
- Levine, Y. K. *See* Brooks, Levine, Requena & Haydon.
- Longuet-Higgins, M. S. On the nonlinear transfer of energy in the peak of a gravity-wave spectrum: a simplified model, 311.
- Main, P. *See* Bernstein, Regev, Herbstein, Main and others.
- May, R. *See* O'Neill, Salmon & May.
- Murphy, J. O. & Steiner, J. M. The effect of a magnetic field and rotation acting simultaneously on the onset of stationary convection in a fluid layer with rigid boundaries, 85.
- Naghdi, P. M. *See* Green & Naghdi.
- Nye, J. F. *See* Evans, Nye & Cheeseman.
- O'Neill, P. Salmon, G. A. & May, R. The radiation-induced formation of excited states of aromatic hydrocarbons in alicyclic hydrocarbons. I. Yields of excited singlet and triplet state solute molecules, 61.
- Pack, D. C. *See* Cole & Pack.
- Patel, M. H. On boundary layers in oscillatory flow, 99.
- Peierls, Sir Rudolf. The momentum of light in a refracting medium, 475.
- Regev, H. *See* Bernstein, Regev, Herbstein, Main and others.
- Requena, J., Billett, D. F. & Haydon, D. A. Van der Waals forces in oil-water systems from the study of thin lipid films. I. Measurement of the contact angle and the estimation of the van der Waals free energy of thinning of a film, 141.
- Requena, J. & Haydon, D. A. Van der Waals forces in oil-water systems from the study of thin lipid films. II. The dependence of the van der Waals free energy of thinning on film composition and structure, 161.
- Requena, J. *See* Brooks, Levine, Requena & Haydon.
- Rizvi, S. H. *See* Bernstein, Regev, Herbstein, Main and others.
- Roberts, P. H. *See* Braginsky & Roberts.
- Salmon, G. A. *See* O'Neill, Salmon & May.
- Sasvari, K. *See* Bernstein, Regev, Herbstein, Main and others.
- Schnurmann, R. & Davies, P. A. Admissible Reynolds numbers for Poiseuille flow in jet viscometer orifices, 47.
- Smith, F. T. Steady motion within a curved pipe, 345.
- Smith, G. J. *See* Franklin, Hamberger, Lampis & Smith.
- Steiner, J. M. *See* Murphy & Steiner.
- Straughan, B. Uniqueness and stability for the conduction-diffusion solution to the Boussinesq equations backward in time, 435.
- Tideman, T. N. *See* Good & Tideman.
- Turcsanyi, B. *See* Bernstein, Regev, Herbstein, Main and others.
- Ubbelohde, A. R. *See* Duruz & Ubbelohde.

Subject index

- Admissible Reynolds numbers for jet viscometers, 47.
Auger effect, indirect, formalism for, 547, 565.
- Bakerian Lecture, 1975, 291.
Baroclinic waves, magnetic field generation by, 125.
- Ca II, centrifugal barrier perturbation of the nd series of, 575.
Cellular convection with rigid boundaries, 85.
Centrifugal barrier perturbation of the nd series in Ca II, 575.
Collective ordering through multidimensional attribute space, 371.
Combustion of a droplet, 195.
Conductivity of molten salts, 301.
- Edge scattering of aerodynamic sound by a lightly loaded elastic half-plane, 213.
Energy transfer in gravity waves, 311.
Excited states of aromatic hydrocarbons radiation-induced formation of in alicyclic hydrocarbons. 61.
- Flow, curved-pipe, 345.
Fluid/liquid interfaces – rows of two dimensional drops, 75.
Fluid sheets, 447.
Fredholm integral equations, 239.
Friction of ice, 493.
- Geometry, global, 291.
Gravity-waves: nonlinear transfer of energy, 311.
Guided waves and path integrals, 405.
- Hydromagnetic convection with rotation, 85.
- Ice, kinetic friction, 493.
Instability of a laminar boundary layer on a flat plate (experiment), 253.
Instability of a laminar boundary layer on a flat plate (theory), 271.
- Laminar boundary layers in oscillating flow, 99.
Light, momentum of, 475.
Lipid films, 141, 161, 179.
- Magnetic field generation by baroclinic waves, 125.
Membranes elasticity, 387.
Modulation of water waves on shear flows, 537.
Molten salts organic, 301.
Momentum of light in a refracting medium, 475.
- Nonlinear behaviour of a finite amplitude electron plasma wave I, electron trapping, 1.
Nonlinear behaviour of a finite amplitude electron plasma wave II, wave-wave interaction, 25.

- Path integrals and guided waves, 405.
Pipeflow, curved, 345.
Plasma wave, nonlinear behaviour due to electron trapping, 1.
Plasma waves, nonlinear behaviour due to resonant three wave interaction, 25.
Poiseuille flow in jet viscometer orifices, 47.
Potential barrier effects in the absorption spectrum of Xe I between 18 and 90 Å, 581.
Pyrene: *p*-benzoquinone, crystal structure of, 419.
- Radiation-induced yields of singlet and triplet excited solute molecules in alicyclic hydrocarbons, 61.
Randomly irregular impedance layer, attenuation of sound by, 513.
Rows of two dimensional drops at fluid/liquid interfaces. 75.
- Semiconductors, indirect Auger recombination in, 547, 565.
Shock waves in viscoelastic media, 329.
Sound, attenuation of by a randomly irregular impedance layer, 513.
Stability of the conduction-diffusion solution backward in time, 435.
- Unsteady laminar boundary layers, 99.
- Variational principles, complementary, 239.
Voting through multidimensional attribute space, 371.
van der Waals forces, 141, 161, 179.
- Water waves, 537.
Water waves on shear flows, 537.
Wave packet development on a laminar boundary layer (experiment), 253.
Wave packet development in a laminar boundary layer (theory), 271.
- Xe I, potential barrier effects in the absorption spectrum of, between 18 and 90 Å, 581.

PROCEEDINGS OF
THE ROYAL SOCIETY
OF LONDON

SERIES A VOLUME 347
MATHEMATICAL AND PHYSICAL SCIENCES

1975-6

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG

The four numbers in this volume can be obtained separately from
the Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

CONTENTS

SERIES A VOLUME 347

NUMBER 1648 9 DECEMBER 1975

| | |
|---|---------------|
| Nonlinear behaviour of a finite amplitude electron plasma wave. I. Electron trapping effects. By R. N. Franklin, S. M. Hamberger, G. Lampis and G. J. Smith | <i>page</i> 1 |
| Nonlinear behaviour of a finite amplitude electron plasma wave. II. Wave-wave interactions. By R. N. Franklin, S. M. Hamberger, G. Lampis and G. J. Smith | 25 |
| Admissible Reynolds numbers for Poiseuille flow in jet viscometer orifices. By R. Schnurmann and P. A. Davies. [Plate 1, with overlay] | 47 |
| The radiation-induced formation of excited states of aromatic hydrocarbons in alicyclic hydrocarbons. I. Yields of excited singlet and triplet state solute molecules. By P. O'Neill, G. A. Salmon and R. May | 61 |
| Rows of two dimensional drops at fluid/liquid interfaces. By M. Leidi and S. Hartland. [Plate 2] | 75 |
| The effect of a magnetic field and rotation acting simultaneously on the onset of stationary convection in a fluid layer with rigid boundaries. By J. O. Murphy and J. M. Steiner | 85 |
| On laminar boundary layers in oscillatory flow. By M. H. Patel | 99 |
| Magnetic field generation by baroclinic waves. By S. I. Braginsky and P. H. Roberts | 125 |

NUMBER 1649 23 DECEMBER 1975

| | |
|---|-----|
| Van der Waals forces in oil-water systems from the study of thin lipid films. I. Measurement of the contact angle and the estimation of the van der Waals free energy of thinning of a film. By J. Requena, D. F. Billett and D. A. Haydon, F.R.S. [Plates 3 and 4] | 141 |
| Van der Waals forces in oil-water systems from the study of thin lipid films. II. The dependence of the van der Waals free energy of thinning on film composition and structure. By J. Requena and D. A. Haydon, F.R.S. | 161 |
| Van der Waals forces in oil-water systems from the study of thin lipid films. III. Comparison of experimental results with Hamaker coefficients calculated from Lifshitz theory. By D. E. Brooks, Y. K. Levine, J. Requena and D. A. Haydon, F.R.S. | 179 |
| Droplet combustion in a stream of oxidant. By J. C. Birchley | 195 |
| Edge scattering of aerodynamic sound by a lightly loaded elastic half-plane. By P. A. Cannell | 213 |
| Some complementary bivariational principles for linear integral equations of Fredholme type. By R. J. Cole and D. C. Pack | 239 |
| An experimental investigation of the formation and development of a wave packet in a laminar boundary layer. By M. Gaster and I. Grant | 253 |
| A theoretical model of a wave packet in the boundary layer on a flat plane. By M. Gaster | 271 |

NUMBER 1650 13 JANUARY 1976

| | |
|---|----------|
| Bakerian Lecture, 1975. Global geometry. By M. F. Atiyah, F.R.S. | page 291 |
| Some novel electromagnetic effects in the conductivity of molten organic salts. By J. J. Duruz and A. R. Ubbelohde, F.R.S. | 301 |
| On the nonlinear transfer of energy in the peak of a gravity-wave spectrum: a simplified model. By M. S. Longuet-Higgins, F.R.S. | 311 |
| The development of plane shock waves in nonlinear viscoelastic media. By R. W. Lardner | 329 |
| Steady motion within a curved pipe. By F. T. Smith | 345 |
| From individual to collective ordering through multidimensional attribute space. By I. J. Good and T. N. Tideman | 371 |
| Remarks on a possible elasticity of membranes and lamellar media: disordered layers. By M. Kléman | 387 |
| The use of path integrals in guided wave theory. By M. Eve | 405 |
| The crystal structure of the π -molecular compound pyrene: <i>p</i> -benzoquinone. By J. Bernstein, H. Regev, F. H. Herstein, P. Main, S. H. Rizvi, K. Sasvari and B. Turcsanyi | 419 |
| Uniqueness and stability for the conduction-diffusion solution to the Boussinesq equations backward in time. By B. Straughan | 435 |

NUMBER 1651 27 JANUARY 1976

| | |
|---|-----|
| Directed fluid sheets. By A. E. Green, F.R.S. and P. M. Naghdi | 447 |
| The momentum of light in a refracting medium. By Sir Rudolf Peierls, F.R.S. | 475 |
| The kinetic friction of ice. By D. C. B. Evans, J. F. Nye and K. J. Cheeseman | 493 |
| The attenuation of sound by a randomly irregular impedance layer. By M. S. Howe | 513 |
| On the modulation of water waves on shear flows. By R. S. Johnson | 537 |
| A formalism for the indirect Auger effect. I. By D. Hill and P. T. Landsberg | 547 |
| A formalism for the indirect Auger effect. II. By D. Hill | 565 |
| Centrifugal barrier perturbation of the nd series in Ca II. By J. P. Connerade | 575 |
| Potential barrier effects in the absorption spectrum of Xe I between 18 and 90 Å. By J. P. Connerade | 581 |
| Indexes | 585 |
