

The scientific aspects of nature conservation in Great Britain

A Discussion held on 10 June 1976

Organized by J. E. (now Sir Eric) Smith, F.R.S., A. R. Clapham, F.R.S.
and D. A. Ratcliffe

CONTENTS

The objectives of conservation

J. L. Harley, F.R.S.

Discussion: V. C. Wynne-Edwards, S. M. Walters, D. A. Ratcliffe

Nature conservation: aims, methods and achievements

D. A. Ratcliffe

Change in natural and managed ecosystems: detection, measurement and assessment

J. M. Hellowell

Discussion: J. D. Holloway

The scientific basis of practical conservation: aims and methods of conservation

C. D. Pigott

Discussion: S. M. Walters

The scientific basis of practical conservation: factors limiting the persistence of populations and communities of animals and plants

J. P. Dempster

Conservation problems in the future

A. D. Bradshaw

General Discussion

Concluding remarks

This book reports a meeting held in the rooms of the Royal Society on 10 June 1976, as an outcome of talks between representatives of the Royal Society, the Nature Conservancy Council and the Institute of Terrestrial Ecology. Its aim was to give interested scientists and others an opportunity for hearing and discussing the arguments, largely scientific, for nature conservation in general and for nature reserves in particular. Consideration was also given to scientific problems of the management of nature reserves and to the principles underlying efforts to solve them. A number of leading ecologists took part in the discussion, which was of special importance at a time when even scientists have seemed too little aware of the aims of the Nature Conservancy Council and of the scientific basis of their policy with regard to the use of land for nature reserves.

CONTENTS

LORD TODD	<i>pages</i> v-xiv
Address of the President at the Anniversary Meeting, 30 November 1977	
BENJAMIN, T. B.	1-26
Bifurcation phenomena in steady flows of a viscous fluid. I. Theory	
BENJAMIN, T. B.	27-43
Bifurcation phenomena in steady flows of a viscous fluid. II. Experiments. [Plate 1]	
McPHERDAN, R. C. & MCKENZIE, D. R.	45-63
The conductivity of lattices of spheres. I. The simple cubic lattice	
CAMPOS, L. M. B. C.	65-91
On the emission of sound by an ionized inhomogeneity	
RAO, C. R. A. & GODA, M. A. A.	93-110
Generalization of Lamb's problem to a class of inhomogeneous elastic halfspaces	
WISE, M. B. & TRAINOR, L. E. H.	111-119
Group theory and many-body diagrams. III. Many-particle Green diagrams	
BASSETT, D. C. & HODGE, A. M.	121-132
On lamellar organization in certain polyethylene spherulites. [Plates 1-5]
