SERIES A

VOLUME 368

MATHEMATICAL AND PHYSICAL SCIENCES

1979

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG

The four numbers in this volume can be obtained separately from
the Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

CONTENTS

SERIES A VOLUME 368

NUMBER 1732 17 OCTOBER 1979

RECENT DEVELOPMENTS IN GENERAL RELATIVITY
EXTENDED ABSTRACTS OF CONTRIBUTIONS TO A DISCUSSION

ORGANIZED BY

S. W. HAWKING, F.R.S., AND R. PENROSE, F.R.S.

General introduction. By R. Penrose, F.R.S.	<i>page</i> 3
Experimental tests of General Relativity. By C. M. Will	5
Sources of gravitational waves [short abstract]. By K. S. Thorne	9
Gravitational wave detectors. By R. W. P. Drever, J. Hough, J. R. Pugh, W. A. Edelstein, H. Ward, G. M. Ford and N. A. Robertson	11
Numerical construction of space-time. By L. Smarr	15
Cosmological implications of the 3K background. By D. W. Sciama	17
Global General Relativity. By R. Penrose, F.R.S.	19
Theory of black holes with accretion disks. By B. Carter	23
Observational status of black holes. By M. J. Rees	27
Quantum gravity. By C. J. Isham	33
<hr/>	
Anisotropy in the scratch hardness of cubic crystals. By C. A. Brookes and P. Green	37
Bondi's vector, and the Seliger & Whitham Variational Principle for matter fields. By R. L. Schafir	59
On the mutual interaction between rotation and magnetic fields for axisymmetric bodies. By C. G. Gimblett and R. S. Peckover	75
Rotationally inelastic collisions of orbitally degenerate molecules; maser action in OH and CH. By R. N. Dixon and D. Field	99
An acoustic redetermination of the gas constant. By A. R. Colclough, T. J. Quinn and T. R. D. Chandler	125
Interaction of elastic waves with a unilateral interface. By Maria Comninou and J. Dundurs	141
Rescaling the perturbation series. By K. Banerjee	155

NUMBER 1733 29 OCTOBER 1979

Excitation of transitions between atomic or molecular energy levels by monochromatic laser radiation. III. Effect of Doppler broadening when phase-destroying collisions predominate. By R. A. Smith, F.R.S.	163
Interactions between particles of arbitrary shape. I. Uncharged particles. By C. J. Barnes	177
Molecular alignment in nematic liquid crystals: a comparison between the results of experiments at high pressure and predictions based on mean field theories. By R. G. Horn and T. E. Faber	199
Restrictions upon instabilities of plane and helical gas flows. By F. W. Warren	225

Nonlinear energy transfer in a narrow gravity-wave spectrum. By J. C. Dungey and W. H. Hui	239
Further development of the three-region model of a premixed turbulent flame. I. Turbulent diffusion dominated region 2. By D. R. Ballal	267
Further development of the three-region model of a premixed turbulent flame. II. Instability dominated region 1. By D. R. Ballal	283
Further development of the three-region model of a premixed turbulent flame. III. Eddy entrainment, combustion in depth process of region 3. By D. R. Ballal	295
Casimir effect for a self-interacting scalar field. By L. H. Ford	305
Comment on the interaction of an atom with a pair of perfectly conducting plates. By L. H. Ford	311
NUMBER 1734 13 NOVEMBER 1979	
Pendellösung interference in the Bragg reflexion of X-rays from a crystal surface. By A. R. Lang, F.R.S. and Mai Zhen-Hong. (Plate 1)	313
A model for the simultaneous heterogeneous and homogeneous nucleation of gas bubbles. By M. R. Hayns and M. H. Wood	331
Subgrain coalescence and the nucleation of recrystallization at grain boundaries in aluminium. By A. R. Jones, B. Ralph and N. Hansen. (Plates 1-8)	345
Slowly varying solitary waves. I. Korteweg-de Vries equation. By R. Grimshaw	359
Slowly varying solitary waves. II. Nonlinear Schrödinger equation. By R. Grimshaw	377
Perturbations and stability of rotating stars. I. Completeness of normal modes. By J. Dyson and B. F. Schutz	389
Self-dual metrics with self-dual Killing vectors. By K. P. Tod and R. S. Ward	411
Towards a unified nonlinear theory of massless bosons. By H. P. W. Gottlieb	429
NUMBER 1735 29 NOVEMBER 1979	
Thermal explosions and the disappearance of criticality at small activation energies: exact results for the slab. By T. Boddington, P. Gray, F.R.S., and C. Robinson	441
Atmospheric reactions of the HO ₂ radical studied by laser magnetic resonance spectroscopy. By J. P. Burrows, D. I. Cliff, G. W. Harris, B. A. Thrush, F.R.S., and J. P. T. Wilkinson	463
A note on complexities of compression failure. By B. L. Karihaloo	483
The nickel silicide inner core of the Earth. By J. M. Herndon	495
Models for non-Gaussian variation, with applications to turbulence. By O. Barndorff-Nielsen	501
Equations for the growth of a distribution of small physical objects. By C. F. Clement and M. H. Wood	521
The vortex-street structure of turbulent jets. Part 2. By J. C. Lau	547
Nonlinear stability of boundary layers for disturbances of various sizes. By F. T. Smith	573
Coriolis contribution to the rotatory ether drag. By N. B. Baranova and B. Ya. Zel'Dovich	591
Indexes	593
