

QUANTITIES, UNITS, AND SYMBOLS

Second edition 1975

54 pages 250 x 176 mm. Paper cover only

ISBN 0 85403 071 9

	U.K.	Overseas	T
Price	£1.00	£1.05	

This handbook contains in a convenient form a very great deal of information on SI (the International System of Units), symbols for physical quantities, recommended forms for many aspects of scientific writing including mathematical presentation, labelling of graphs and tables, preferred placements and type fonts for subscripts and superscripts, favoured abbreviations, etc. It also includes recommended values of physical constants. While SI and other internationally recommended practices are emphasized, values of conversion factors are given for use with imperial units and other units outside SI. References to original international authority are quoted.

Its compact size makes *Quantities, Units, and Symbols* an invaluable aid to scientific writing for all authors who wish to follow modern practice especially in physics and chemistry. Equally it should be an immediately available guide for teachers in higher education many of whom will wish their students to own a copy. It is also invaluable for the reader who has found some unfamiliar notation or terminology, not least when he has strayed from his own narrow specialism.

The contents include :

- Physical quantities and symbols for physical quantities
- Units and symbols for units
- Numbers
- Recommended mathematical symbols
- Chemical elements, nuclides, and particles
- Quantum states
- Nuclear physics
- Thermodynamic results
- Galvanic cells
- Some common abbreviations
- Recommended values of physical constants
- Sources
- Bibliography

To encourage the widespread availability and use of Q.U.S. (as it is commonly known) the following special prices are offered for orders for multiple copies :

	U.K.	Overseas
5 copies	£4.00	£4.15
10 copies	£6.50	£6.70
20 copies	£11.00	£11.35
50 copies	£22.50	£23.20

Volume 374

CONTENTS

DAVIDSON, W. & MCCREA, W. H. Atomic and gravitational metrics in cosmology	pages 447-459
HARRIS, F. M., MUKHTAR, E. S., GRIFFITHS, I. W. & BEYNON, J. H. Design of a high-resolution mass spectrometer for studying the photodissociation of organic ions in the gas phase	461-473
KELLY, A. & MCCARTNEY, L. N. Failure by stress corrosion of bundles of fibres	475-489
HANSTEAD, P. D. Simplified digital synthesis of ultrasonic images	491-502
USCINSKI, B. J., BOOKER, H. G. & MARIANS, MARILYN Intensity fluctuations due to a deep phase screen with a power-law spectrum	503-530
SASTRY, G. P. & CHOWDHURY, D. Cherenkov radiation in spatially dispersive media	531-541
HOWE, M. S. The role of displacement thickness fluctuations in hydroacoustics, and the jet-drive mechanism of the flue organ pipe	543-568
PHAN-THIEN, N. On the effect of parallel and transverse stationary random surface roughness in hydrodynamics lubrication	569-591
INDEXES	593-595
