

# General Notes on the Preparation of Scientific Papers

Revised Edition August 1974

*General notes on the preparation of scientific papers* is a guide for authors, enabling them to present their papers in the most acceptable way from the outset, so reducing work and speeding the rate of publication.

The third edition has been carefully compiled with assistance from the editors of various scientific journals: the *Notes* thus become more authoritative as a guide to current practice and as an aid to established authors as well as to those who are writing their first papers.

32 pages      210 × 150mm      illustrated  
Paper cover only

ISBN 0 85403 065 4

	U.K.	Overseas addresses
Single copy	£0.45	£0.50 T
per 5 copies	£1.80	£1.90
per 10 copies	£2.95	£3.05
per 20 copies	£4.95	£5.10
per 50 copies	£10.15	£10.40

## QUANTITIES, UNITS, AND SYMBOLS

Second edition 1975

This handbook contains in a convenient form a very great deal of information on SI (the International System of Units), symbols for physical quantities, recommended forms for many aspects of scientific writing including mathematical presentation, labelling of graphs and tables, preferred placements and type fonts for subscripts and superscripts, favoured abbreviations, etc. It also includes recommended values of physical constants. While SI and other internationally recommended practices are emphasized, values of conversion factors are given for use with imperial units and other units outside SI. References to original international authority are quoted.

Its compact size makes *Quantities, Units, and Symbols* an invaluable aid for scientific writing for all authors who wish to follow modern practice especially in physics and chemistry. Equally it should be an immediately available guide for teachers in higher education many of whom will wish their students to own a copy. It is also invaluable for the reader who has found some unfamiliar notation or terminology, not least when he has strayed from his own narrow specialism.

54 pages      250 × 176mm      Paper cover only

ISBN 0 85403 071 9

## CONTENTS

KING-HELE, D. G. & WALKER, DOREEN, M. C.	<i>pages</i> 247-288
Evaluation of 15th-order harmonics in the geopotential from analysis of resonant orbits	
PERRIE, W. A.	289-304
Mapping of wave systems to nonlinear Schrödinger equations	
WHEELER, A. A.	305-325
The Czochralski crystal growth system with a periodic crystal growth rate and no back-melting	
WHEELER, A. A.	327-343
The Czochralski crystal growth system with a periodic crystal growth rate and back-melting	
HARTLAND, S., GAPANY, P. & RAMAKRISHNAN, S.	345-365
Effect of the vessel wall on the stability of floating bodies	
BURROWS, C. R. & SAHINKAYA, M. N.	367-387
Parameter estimation of multi-mode rotor-bearing systems	
SWALLOWE, G. M. & FIELD, J. E.	389-408
The ignition of a thin layer of explosive by impact; the effect of polymer particles. [Plates 1-5]	
GLEAVE, C., CALVERT, J. M., LEES, D. G. & ROWLANDS, P. C.	409-427
A study of the mechanism of corrosion of some ferritic steels in high-pressure carbon dioxide with the aid of oxygen-18 as a tracer. I. Low-silicon mild steel. [Plates 1 and 2]	
GLEAVE, C., CALVERT, J. M., LEES, D. G. & ROWLANDS, P. C.	429-438
A study of the mechanism of corrosion of some ferritic steels in high-pressure carbon dioxide with the aid of oxygen-18 as a tracer. II. High-silicon mild steel. [Plates 1 and 2]	
ORTIZ, M. & POPOV, E. P.	439-458
A statistical theory of polycrystalline plasticity	
BIRD, D. M. & BUXTON, B. F.	459-479
The theory of the emission of planar channelling radiation by fast electrons	
INDEXES	481-484
