- Waddicor, J. I. *See* Clifford *et al.*
- Williams, S. J. & Elliott, S. R. A continuous random network model for vitreous boron trioxide, 427.
- Yu, P. K. & Cullen, A. L. Measurement of permittivity by means of an open resonator. I. Theoretical, 49.

Subject index

- Aerosols, fine, coagulation of, 99.
 Artificial viscosity in supercritical solutions, 77.
- Boron trioxide (vitreous), a continuous random network model, 427.
 Bounds on effective moduli of composites, 305.
 Bounds on effective thermal conductivity of composites, 33.
 Bound states in quantum mechanics, 489.
 Box method, computation of unsteady boundary layers, 291.
- Causality, 487.
 Causality, Lorentz Group, 487.
 Coagulation, of fine aerosols, 99.
 Composite materials, 305, 333.
 Continuous random network model for vitreous B_2O_3 , 427.
 Covering radius, 259, 261.
 Criticality and thermal runaway, 29.
- Diffusion coefficients of hydrogen atoms, 241.
- Einstein's equations, 171.
- Flow generated by a force perpendicular to a wall, 349.
 Fluidized bed instabilities, 229.
 Fluids, 211.
 Fourth-moment equation, analytical solution, 137.
- Hardy–Littlewood inequalities, 447.
 \mathcal{H} -Space, 171.
 Hydrogen atom diffusivity, 241.
- Inequalities, integral, 447.
 Integrable and chaotic vortex motion, 359.
 Intensities in dispersive geometrical optics, 201.
 Intensity fluctuations in multiple scattering, 137.
- Langmuir–Blodgett Layers, 389.
 Lattice imaging of martensite, 187.
 Leech lattice, 259, 261.
- Martensitic interfaces in titanium-manganese, 187.
 Material frame-indifference, 417.
- New Physics, the, 1.
- Open resonator measurement of permittivity, 49.
- Permittivity measurement by means of an open resonator. I. Theoretical, 49.
 Permittivity measurement by means of an open resonator. II. Experimental, 73.
 Porous medium cavity flow – the vertical boundary layer structure, 119.

Resonant oscillations in open tubes, 409.

Rutherford Memorial Lecture, 1979, 1.

Schrödinger Equation, 489.

END OF THE THREE HUNDRED AND EIGHTIETH VOLUME (SERIES A)

PROCEEDINGS OF
THE ROYAL SOCIETY
OF LONDON

SERIES A

VOLUME 380

MATHEMATICAL AND PHYSICAL SCIENCES

1982

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG

The two numbers in this volume can be obtained separately from the Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

Typeset and printed in Great Britain at the University Press, Cambridge

CONTENTS

SERIES A VOLUME 380

NUMBER 1778 8 MARCH 1982

RUTHERFORD MEMORIAL LECTURE, 1979. The New Physics. By E. H. S. Burhop, F.R.S. [Plates 1-4]	<i>page</i> 1
Modelling thermal runaway and criticality in systems with diminishing reaction rates: the uniform temperature (Semenov) approximation. By T. Boddington, P. Gray, F.R.S., and S. K. Scott	29
Measurement of permittivity by means of an open resonator. I. Theoretical. By P. K. Yu and A. L. Cullen, F.R.S.	49
Measurement of permittivity by means of an open resonator. II. Experimental. By A. C. Lynch	73
Application of artificial viscosity in establishing supercritical solutions to the transonic integral equation. By P. L. Sachdev and M. Lobo	77
Coagulation of fine aerosols. By Nazli Egilmez and C. N. Davies. [Plate 1]	99
Thermally driven cavity flows in porous media. I. The vertical boundary layer structure near the corners. By P. A. Blythe, P. G. Daniels and P. G. Simpkins	119
Intensity fluctuations in a multiple scattering medium. Solution of the fourth moment equation. By B. J. Uscinski	137
\mathcal{H} -Space with a cosmological constant. By C. R. LeBrun	171
A high resolution electron microscope study of martensite and martensitic interfaces in titanium-manganese. By K. M. Knowles. [Plates 1-4]	187
On the calculation of intensity in dispersive inhomogenous media in the ray approximation. By R. Buckley	201
Statistical mechanics of a fluid drop. By J. R. Henderson and P. Schofield	211
Note on a wave-hierarchy interpretation of fluidized bed instabilities. By J. T. C. Liu	229

NUMBER 1779 8 APRIL 1982

Measurement of the diffusion coefficients of reactive species in dilute gases. By A. A. Clifford, P. Gray, F.R.S., R. S. Mason and J. I. Waddicor	241
A bound for the covering radius of the Leech lattice. By S. Norton.	259
The covering radius of the Leech lattice. By J. H. Conway, F.R.S., R. A. Parker and N. J. A. Sloane.	261
Computation of unsteady turbulent boundary layers with flow reversal, and evaluation of two separate turbulence models. By T. Cebeci and L. W. Carr.	291
New bounds on effective elastic moduli of two-component materials. By G. W. Milton and N. Phan-Thien.	305

New bounds on the effective thermal conductivity of N -phase materials. By N. Phan-Thien and G. W. Milton.	333
The axisymmetric flow field induced by a point force in the presence of a plane wall. By W. M. Pickering and C. Sozou.	349
Integrable and chaotic motions of four vortices. I. The case of identical vortices. By H. Aref and N. Pomphrey.	359
The shear properties of Langmuir–Blodgett layers. By B. J. Briscoe and D. C. B. Evans. [Plates 1 and 2]	389
On an equation which describes the resonant oscillations of a gas in an open-ended tube. W. Chester and A. Moser	409
On material frame-indifference. By A. I. Murdoch	417
A continuous random network model for vitreous boron trioxide. By S. J. Williams and S. R. Elliott	427
A return to the Hardy–Littlewood integral inequality. By W. D. Evans and W. N. Everitt	447
Causality and the Lorentz group. By L.-K. Hua	487
The Schrödinger equation: total interaction as perturbation. By K. Banerjee	489
Instructions to authors	495
Indexes	499
