

INDEXES TO VOLUME 412 (A)

Author index

- Abragam, A. THE CLAUDE BERNARD LECTURE, 1986. Ordering nuclear spins, 255.
Alford, N. McN. *See* Kendall *et al.*
- Bennett, M. J., Desport, J. A. & Labun, P. A. Transverse microstructure of an oxide scale formed on a 20% Cr–25% Ni–niobium stabilized stainless steel, 223.
- Berry, M. V. & Mondragon, R. J. Neutrino billiards: time-reversal symmetry-breaking without magnetic fields, 53.
- Birchall, J. D. *See* Kendall *et al.*
- Broadbent, E. G. *See* Leppington *et al.*
- Budden, K. G. & Jones, D. The theory of radio windows in planetary magnetospheres, 1.
Budden, K. G. & Jones, D. Theory of wave polarization of radio waves in magnetospheric cavities, 25.
- Chalmers, I. D., Gallimberti, I., Gibert, A. & Farish, O. The development of electrical leader discharges in a point–plane gap in SF₆, 285.
- Chandrasekhar, Subrahmanyan & Ferrari, Valeria. On the dispersion of cylindrical impulsive gravitational waves, 75.
- Coffey, W. T., Corcoran, P. M. & Vij, J. K. On the role of inertial effects and dipole–dipole coupling in the theory of the Debye and far-infrared absorption of polar fluids. II. Comparison with experimental observations, 339.
- Corcoran, P. M. *See* Coffey *et al.*
- Desport, J. A. *See* Bennett *et al.*
- Donnelly, R. *See* Walsh & Donnelly.
- Farish, O. *See* Chalmers *et al.*
- Ferrari, Valeria. *See* Chandrasekhar & Ferrari.
- Gallimberti, I. *See* Chalmers *et al.*
- Gibert, A. *See* Chalmers *et al.*
- Gray, P., Kordylewski, W. & Krajewski, Z. Time-to-ignition in a tubular reactor operated adiabatically, 45.
- Heron, K. H. *See* Leppington *et al.*
- Howe, M. S. On the structure of the turbulent boundary-layer wall pressure spectrum in the vicinity of the acoustic wavenumber, 389.
- Jones, D. *See* Budden & Jones.
- Kendall, K., Alford, N. McN. & Birchall, J. D. Elasticity of particle assemblies as a measure of the surface energy of solids, 269.
- Khayry, A. B. & McGeough, J. A. Analysis of electrochemical arc machining by stochastic and experimental methods, 403.
- Kordylewski, W. *See* Gray *et al.*
- Krajewski, Z. *See* Gray *et al.*
- Labun, P. A. *See* Bennett *et al.*
- Leppington, F. G. & Levine, H. The sound field of a pulsating sphere in unsteady rectilinear motion, 199.
- Leppington, F. G., Heron, K. H., Broadbent, E. G. & Mead, Susan M. Resonant and non-resonant acoustic properties of elastic panels. II. The transmission problem, 309.
- Levine, H. *See* Leppington & Levine.

McGeough, J. A. *See* Khayry & McGeough.

Mead, Susan M. *See* Leppington *et al.*

Mondragon, R. J. *See* Berry & Mondragon.

Munk, W. H., Scully-Power, P. A. & Zachariassen, F. THE BAKERIAN LECTURE, 1986. Ships from space, 231.

Norris, A. N., White, B. S. & Schrieffer, J. R. Gaussian wave packets in inhomogeneous media with curved interfaces, 93.

Rose, L. R. F. The mechanics of transformation toughening, 169.

Schrieffer, J. R. *See* Norris *et al.*

Scully-Power, P. A. *See* Munk *et al.*

Vij, J. K. *See* Coffey *et al.*

Walsh, J. & Donnelly, R. A new technique for studying propagation and scattering for mixed paths with discontinuities, 125.

White, B. S. *See* Norris *et al.*

Zachariassen, F. *See* Munk *et al.*

Subject index

- absorption and barrier crossing, 341.
 acoustic power transmission, 309.
 acoustic propagation, 93, 199.
 antiferromagnetic nuclear diffraction, 255.
 asymptotic approximation, 309.
 asymptotic expansions, matched, 199.
 asymptotic methods, 93.
 averaged transmission properties, 309.
- Bakerian Lecture, 1986, 231.
 billiards, 53.
 Bragg scatter, 231.
- ceramics, 169.
 creeping modes, 389.
 cylindrical gravitational waves, 75.
- Dirac billiards, 53.
 discharges in electrolytes, 403.
 dispersion of waves, 75.
 drilling fine holes, 403.
 dynamic nuclear polarization, 255.
- elasticity, 169
 elasticity, particle assemblies, 269
 electrical breakdown, 285.
 electrochemical arc machining, 403.
 electromagnetic propagation, 125.
 electromagnetic scattering, 125.
- FIR absorption peaks, 341.
 flow reactor, 45.
 fracture mechanics, 169.
- gaussian wave packets, 93.
 glitter, 231.
- high-modal density, 309.
 high pressure, 285.
 high-speed photography, 285.
- ignition, 45.
 impulsive waves, 75.
 intermediate frequency absorption, 341.
 itinerant oscillator model, 341.
- low Mach number, 199.
- machining, influence on, 403.
 magnetospheres, 1.
 magnetospheric cavities, 25.
 massless relativistic billiards, 53.
 microkelvin temperatures, 255.
 'mixed-path' propagation, 125.
 mode conversion, 1.
 moving medium, 199.
- neutrino, 53.
 non-thermal continuum, 1.
 non-uniform field, 285.
 nuclear magnetic ordering, 255.
- open systems, 45.
 oxidation, 223.
 oxide-scale microstructure, 223.
- particle assemblies, 269.
 particle surface energy, 269.
 phase types, 403.
 planetary magnetospheres, 25.
 plasma, warm, 1.
 polarization, 25.
 Poley absorption, 341.
- quantum chaos, 53.
- radar backscatter, 125.
 radar cross sections, 125.
 radar scatter, 231.
 radio emissions, 25.
 radio windows, 1.
 random incidence, 309.
 ray theory, 93.
 Rocard equation, 341.
- satellite oceanography, 231.
 scattering by turbulence, 389.
 scattering theory, 93.
 schlieren photography, 285.
 SF₆, 285.
 ship wakes, 231.
 solid-surface energy, 269.
 sound generation, 199.
 source motion, unsteady, 199.
 spectral peak, 389.
 stainless steel (20% Cr - 25% Ni-Nb), 223.
 stochastic modelling, 403.
 stress-induced transformation, 169.
 surface energy, 269.
 symmetry-breaking, 53.

- toughening mechanics, 169.
transformation plasticity, 169.
transmission electron microscopy, 223.
turbulent boundary layer, 389.
- wall curvature, 389.
wall pressure spectrum, 389.
wave equation, 93.
wave equations, coupled, 25.
windows, radio, 1.

END OF THE FOUR HUNDRED AND TWELFTH VOLUME (SERIES A)
