Physical Sciences

VOLUME 434

1991

Published by
THE ROYAL SOCIETY
6 Carlton House Terrace, London SW1Y 5AG

ISSN 0080-4630

The three numbers in this volume can be obtained separately from the Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

Copyright

© 1991 The Royal Society and the authors of individual papers

Except as otherwise permitted under the Copyright, Designs and Patents Acts, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the publisher, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of the Act) for an individual for the purposes of research or private study.

The text paper used in this publication is alkaline sized with a coating which is predominantly calcium carbonate. The resultant surface pH is in excess of 7.5, which gives maximum practical permanence.

Turbulence and stochastic processes: Kolmogorov's ideas 50 years on

A Special Issue compiled and edited by J. C. R. Hunt, O. M. Phillips and D. Williams

The local structure of turbulence in incompressible viscous fluid for very large Reynolds numbers. Dissipation of energy in the locally isotropic turbulence By A. N. Kolmogorov	page 9
Kolmogorov's hydrodynamic attractors By V. I. Arnol'd	19
Approximation of attractors, large eddy simulations and multiscale methods By R. Temam	23
Transition functions, paths and path integrals By D. Williams	41
Turbulent cascade and intermittency growth By R. H. Kraichnan	65
Random multifractals: negative dimensions and the resulting limitations of the thermodynamic formalism By B. B. Mandelbrot	79
From global scaling, <i>à la</i> Kolmogorov, to local multifractal scaling in developed turbulence By U. Frisch	89
Structure and dynamics of homogeneous turbulence models and simulations By Z.-S. She, E. Jackson and S. A. Orszag	101
The Kolmogorov spectrum and its oceanic cousins: a review By O. M. Phillips	125
Local isotropy of the smallest scales of turbulent scalar and velocity fields By C. Van Atta	139
Kolmogorov similarity hypotheses for scalar fields: sampling intermittent turbulent mixing in the ocean and galaxy By C. H. Gibson	149
On local isotropy of passive scalars in turbulent shear flows By K. R. Sreenivasan	165
Kolmogorov's contributions to the physical and geometrical understanding of small-scale turbulence and recent developments By J. C. R. Hunt and J. C. Vassilicos	183
Kolmogorov's two-equation model of turbulence By D. B. Spalding	211
Equations of turbulent motion of an incompressible fluid (Appendix to preceding paper) By A. N. Kolmogorov	214
Some applications of Kolmogorov's turbulence research in the field of combustion By K. N. C. Bray and R. S. Cant	217

No. 1891 8 August 1991

<i>Editorial</i>	241
X-ray topographic studies of solid-state reactions. II. Solid-state polymerization of 2,4-hexadienediol bis(<i>p</i> -toluene sulphonate) By M. Dudley, J. N. Sherwood and D. Bloor	243

Singular point analysis and integrals of motion for coupled nonlinear Schrödinger equations By G. Baumann, W. G. Glöckle and T. F. Nonnenmacher	263
High-resolution image simulations of small metal particles By A. I. Kirkland, D. A. Jefferson, D. Tang and P. P. Edwards	279
Theory of dilute electro-rheological fluids By J. Hemp	297
On the concentration dependence of surface diffusion coefficients in capillary porous materials By S. K. Bhatia and D. D. Do	317
Criticality in reactors under domain or external temperature perturbations By E. F. Van de Velde and M. J. Ward	341
Component design-based model for deformation and rupture of tough fibre-reinforced ceramic matrix composites By D. R. Hayhurst, F. A. Leckie and A. G. Evans	369
Design of uni-axially loaded components fabricated from tough fibre-reinforced ceramic matrix composites By S. H. Haddad, D. R. Hayhurst and F. A. Leckie	383
The application of resonance enhanced multiphoton ionization to the detection of hydrogen atoms during the oscillatory combustion of hydrogen By D. L. Baulch, J. F. Griffiths and R. Richter	399
Stripes or spots? Nonlinear effects in bifurcation of reaction-diffusion equations on the square By B. Ermentrout	413
Wiener-Hopf splitting of a 2×2 matrix By D. S. Jones	419
Observation of a standing kink cross wave parametrically excited By G. S. Guthart and T. Y.-T. Wu	435
On the geometry of composite bubbles By T. Herdtle and H. Aref	441
<i>Rapid communications</i>	
On the non-radial oscillations of a star. III. A reconsideration of the axial modes By S. Chandrasekhar and V. Ferrari	449
Acoustic resonance in spherically symmetric waves By W. Chester	459
Infinitely many Stokes smoothings in the gamma function By M. V. Berry	465
On the fully developed flow in a curved pipe at large Dean number By S. C. R. Dennis and N. Riley	473
Korn's inequality for sequences By K. Bhattacharya	479
No. 1892 9 September 1991	
Comparative lagrangian formulations for localized buckling By G. W. Hunt and M. K. Wadde	485
Elastic fields in joined half-spaces due to nuclei of strain By H. Y. Yu and S. C. Sanday	503
Elastic field in joined semi-infinite solids with an inclusion By H. Y. Yu and S. C. Sanday	521
The development of travelling waves in a simple isothermal chemical system. IV. Quadratic autocatalysis with quadratic decay By J. H. Merkin and D. J. Needham	531
On the microwave loss of granular high T_c superconductors in 0.1 GHz to 1 THz region By T. C. Choy and A. M. Stoneham	555

A translated rigid ellipsoidal inclusion in an elastic medium By L. J. Walpole	571
Thin-skin electromagnetic fields in the neighbourhood of surface-breaking cracks in metals By D. H. Michael, A. M. Lewis, M. McIver and R. Collins	587
Plane strain fracture in poroelastic media By C. Atkinson and R. V. Craster	605
On the non-radial oscillations of a star. II. Further amplifications. By S. Chandrasekhar, V. Ferrari and R. Winston	633
Embedding theorems and the spectra of certain differential operators By D. E. Edmunds and S. Jiong	641
Hyperasymptotics for integrals with saddles By M. V. Berry and C. J. Howis	655
 <i>Rapid communications</i>	
Exact solutions for a class of nonlinear free surface flows By P. N. Shankar	677
A linearized Riemann solver for the time-dependent Euler equations By E. F. Toro	683
Magnetic resonance, optical and magnetic studies of the nicotinate dihydrates of dysprosium and erbium By J. M. Baker, M. T. Cook, C. A. Hutchinson, Jr, M. J. M. Leask, M. G. Robinson, A. L. Tronconi and M. K. Wells	695
Magnetic resonance studies of Dy ³⁺ and Er ³⁺ in lanthanum nicotinate dihydrate By J. M. Baker, M. T. Cook, C. A. Hutchinson, Jr, P. M. Martineau, A. L. Tronconi and R. T. Weber	707
Methods of centre manifold and multiple scales By K. Fujimura	719
Errata: Davini, C. & Parry, G. P., <i>Proc. R. Soc. Lond. A</i> 432 , 341–365 (1991)	735
Errata: Mei, C. C. & Naciri, M., <i>Proc. R. Soc. Lond. A</i> 432 , 535–546 (1991)	735
Errata: Sharma, R. K. <i>Proc. R. Soc. Lond. A</i> 433 , 121–130 (1991)	736
Instructions to Authors	737
