The text paper used in this publication is alkaline sized with a coating which is predominantly calcium carbonate. The resultant surface pH is in excess of 7.5, which gives maximum practical permanence.

Contents

Series A Volume 437

No. 1899 8 April 1992

Integral equations and exact solutions for the fourth Painlevé equation By A. P. Bassom, P. A. Clarkson, A. C. Hicks and J. B. McLeod	pages 1
Time-domain asymptotics and the method of stationary phase By C. J. Chapman	25
Perfect boundary conditions for parabolic water-wave models By Robert A. Dalrymple and P. A. Martin	41
Cross field thermal transport in highly magnetized plasmas By Michalis Psimopoulos and Ding Li	56
Universality classes and fluctuations in disordered systems By J. B. Pendry, A. MacKinnon and P. J. Roberts	67
Correlations between entropy and volume of melting in halide salts By Z. Akdeniz and M. P. Tosi	85
The effect of damping on rigid block motion under harmonic forcing By S. J. Hogan	97
Matrix cracking and the mechanical behaviour of SiC-CAS composites By B. Harris, F. A. Habib and R. G. Cooke	109
On the non-radial oscillations of a star. IV. An application of the theory of Regge poles By Subrahmanyan Chandrasekhar and Valeria Ferrari	133
A new asymptotic representation for $\zeta(\frac{1}{2} + it)$ and quantum spectral determinants By M. V. Berry and J. P. Keating	151
Air drag correction for satellite orbits of low eccentricity By C. J. Brookes	175
<i>Rapid communications</i>	
The forces on a body moving through a viscous fluid By W. Chester	185
The matching condition for two-dimensional flow at low Reynolds number: with applications to the motion of an elliptic cylinder By W. Chester	195
An exact three-dimensional solution for normal loading of inhomogeneous laminated anisotropic elastic plates of moderate thickness By T. G. Rogers, P. Watson and A. J. M. Spencer	199
The conductivity of a sheet containing a few polygonal holes and/or superconducting inclusions By M. F. Thorpe	215
Density of smooth functions in $W^{k, p(x)}(\Omega)$ By David E. Edmunds and Jiří Rákosník	229

No. 1900 8 May 1992

On the electrodynamic balance By W. H. Hartung and C. T. Avedisian	237
Finite-amplitude instability of non-isothermal flow in a vertical annulus By L. S. Yao and B. B. Rogers	267
On transformation strains and uniform fields in multiphase elastic media By George J. Dvorak and Yakov Benveniste	291
Transformation field analysis of inelastic composite materials By George J. Dvorak	311

The Berry phase of a slowing varying waveguide By Jeroen Tromp and F. A. Dahlen	329
Smoothing of Stokes discontinuities By J. Bruce McLeod	343
Discrete inequalities, orthogonal polynomials and the spectral theory of difference operators By B. M. Brown, W. D. Evans and L. L. Littlejohn	355
Fatigue crack growth modelling by successive blocking of dislocations By A. Navarro and E. R. de los Rios	375
Accumulation rates of spiral-like structures in fluid flows By R. M. Everson and K. R. Sreenivasan	391
Comparison of two hyperbolic systems in chromatography By H. P. Urbach	403
A note on K -theoretical index theorems for orbifolds By Carla Farsi	429
Non-specular reflection phenomena at a fluid–solid boundary By R. H. Tew	433
<i>Rapid communications</i>	
Multiple ledge and kink interactions By C. Atkinson and P. Wilmott	451
Near-circular orbits within a rotating oblate atmosphere with a diurnal variation in density and variable density scale height By C. J. Brookes	461
Second variation of liquid crystal energy at $x/ x $ By David Kinderlehrer and B. Ou	475

No. 1901 8 June 1992

Effects of initiator loss by chain transfer in free radical polymerization using batch operators By B. W. Brooks	489
Bifurcation analysis of the control of an adaptive equalizer By Irene M. Moroz, S. A. Baigent, F. M. Clayton and K. V. Lever	501
Potential flow and forces for incompressible viscous flow By Chien-Cheng Chang	517
Automated procedures for the determination of high-temperature viscoplastic damage constitutive equations By F. P. E. Dunne, J. Makin and D. R. Hayhurst	527
Continuum damage based constitutive equations for copper under high temperature creep and cyclic plasticity By F. P. E. Dunne and D. R. Hayhurst	545
Modelling of combined high-temperature creep and cyclic plasticity in components using continuum damage mechanics [Plates 1–3] By F. P. E. Dunne and D. R. Hayhurst	567
The structure of molten and glassy 2:1 binary systems: an approach using the Bhatia–Thornton formalism By Philip S. Salmon	591
Ionic motion in a compacting filtercake By J. D. Sherwood	607
The acoustic ring source and its application to propeller acoustics By P. R. Prentice	629
Vortices with linear cores in excitable media By Valentin I. Krinsky, Igor R. Efimov and Jose Jalife	645
On a singular initial-boundary-value problem for a reaction–diffusion equation arising from a simple model of isothermal chemical autocatalysis By A. C. King and D. J. Needham	657

Contents

v

A method for constructing solutions for homogeneous partial differential equations: localized waves	
By Rod Donnelly and Richard Ziolkowski	673
From classical periodic orbits to the quantization of chaos	
By R. Aurich and F. Steiner	693
Gradient flow and front propagation with boundary contact	
By N. C. Owen & P. Sternberg	715
 <i>Rapid communication</i>	
A note on the integral of a brownian bridge	
By David S. Dean and Kalvin M. Jansons	729
Instructions to Authors	731
Indexes	735
