

Theory and applications of numbers without large prime factors

A Theme compiled and edited by
R. C. Vaughan

- G. HARMAN
Small fractional parts of additive forms
- J. B. FRIEDLANDER & A. GRANVILLE
Smoothing 'smooth' numbers
- A. GRANVILLE
Integers, without large prime factors, in arithmetic progressions. II
- R. C. VAUGHAN
The use in additive number theory of numbers without large prime factors
- G. TENENBAUM
Cribler les entiers sans grand facteur premier
- R. C. VAUGHAN & T. D. WOOLEY
Further improvements in Waring's problem. III. Eighth powers
- H. W. LENSTRA JR, J. S. PILA & C. POMERANCE
A hyperelliptic smoothness test. I
- O. SCHIROKAUER
Discrete logarithms and local units

| | |
|---|----------------|
| EDITORIAL | <i>pages</i> 1 |
| G. J. FOSCHINI | 3–16 |
| The canonical artefact and its cosmological interpretations | |
| J. WANG & B. L. KARIHALOO | 17–35 |
| Cracked composite laminates least prone to delamination† | |
| O. A. OLUKOKO, A. A. BECKER & R. T. FENNER | 37–51 |
| A review of three alternative approaches to modelling frictional contact problems using the boundary element method | |
| A. J. ORGAN | 53–72 |
| Transient thermal performance of the Stirling engine wire regenerator | |
| M. SPIVACK & P. E. BARBONE | 73–89 |
| Disorder and localization in ribbed structures with fluid loading | |
| P. A. MARTIN & R. A. DALRYMPLE | 91–104 |
| On amphidromic points† | |
| S. GHOSH & J. C. R. HUNT | 105–127 |
| Induced air velocity within droplet driven sprays | |
| N. M. HARWOOD, G. G. SWINERD & D. G. KING-HELE | 129–147 |
| Individual geopotential harmonic coefficients of order 15 from 30 resonant satellite orbit analyses | |
| M. G. ANDERSON & P. D. BATES | 149–159 |
| Initial testing of a two-dimensional finite element model for floodplain inundation | |
| J. D. SHERWOOD & L. BAILEY | 161–184 |
| Swelling of shale around a cylindrical wellbore | |
| M. SOBNACK & D. G. CRIGHTON | 185–200 |
| Anderson localization effects in the transmission of energy down an irregularly ribbed fluid-loaded structure† | |
| M. V. BERRY & C. J. HOWLS | 201–216 |
| Overlapping Stokes smoothings: survival of the error function and canonical catastrophe integrals | |
| K. J. ANDRIES & J. V. SMITH | 217–238 |
| Opening, stellation and handle replacement of edges of the cube, tetrahedron and hexagonal prism: application to 3-connected three-dimensional polyhedra and (2,3)-connected polyhedral units in three-dimensional nets | |
| H. Y. YU, S. C. SANDAY & C. I. CHANG | 239–252 |
| Elastic inclusions and inhomogeneities in transversely isotropic solids | |
| R. S. BUCY | 253–255 |
| Comments on a paper by Udwadia & Kalaba† | |
| <i>Rapid communication</i> | |
| C. C. MEI, P. SAMMARCO, E. S. CHAN & C. PROCACCINI | 257–265 |
| Subharmonic resonance of proposed storm gates for Venice Lagoon | |
