M. J. Jones, F. Guillaume, K. D. M. Harris & A.-L. Dianoux
Molecular dynamics of tetrakis(trimethylsilyl)silane in the solid state: an incoherent quasi-elastic neutron scattering investigation

T. Ohsuna, O. Terasaki, V. Alfredsson, J.-O. Bovin, D. Watanabe, S. W. Carr & M. W. Anderson
Observations on the role of crown ether templates in the formation of hexagonal and cubic polymorphs of zeolite Y

This issue was produced from the authors’ disks by using the \TeX\ typesetting system.

Philosophical Transactions: Mathematical, Physical and Engineering Sciences
Series A Volume 354 Number 1706 15 February 1996

Advances in coordination chemistry
A Theme compiled and edited by B. F. G. Johnson and M. Schröder

T. W. Johann & J. K. Barton
Recognition of DNA by octahedral coordination complexes

C. D. Garner, D. Collison & E. Pidcock
The nature of the coordination sites of transition metals in proteins

O. Kahn & E. Codiovi
Iron(II)-1,2,4-triazole spin transition molecular materials

A. Bauer, F. Gabbai, A. Schier & H. Schmidbaur
Gold(I) clustering at the triphenylphosphinimine nitrogen atom

A. J. Blake, D. W. Bruce, I. A. Fallis, S. Parsons, H. Richtzenhain, S. A. Ross & M. Schröder
Macrocyclic liquid crystals

P. G. Bruce
Coordination chemistry in the solid state
CONTENTS

M. Stojaković & Z. Stojaković
Support functions for fuzzy sets  pages 421–438

B. J. Briscoe & K. S. Sebastian
The elastoplastic response of poly(methyl methacrylate) to indentation 439–457

C. Bailey, P. Chow, M. Cross, Y. Fryer & K. Percieous
Multiphysics modelling of the metals casting process 459–486

M. S. Soliman & J. M. T. Thompson
Indeterminate bifurcational phenomena in hardening systems 487–494

A. A. Wheeler, G. B. McFadden & W. J. Boettinger
Phase-field model for solidification of a eutectic alloy 495–525

N. Y. Chien, H. Gao, G. Herrmann & D. M. Barnett
Diffusive surface instabilities induced by electromechanical loading 527–541

D. Rh. Gwynnlyw & D. H. Peregrine
Numerical simulation of Stokes flow down an inclined plane 543–565

G. Massimo Palma, K.-A. Suominen & A. K. Ekert
Quantum computers and dissipation 567–584

D. C. Anderson & A. K. Galway
A kinetic and mechanistic investigation of the formation of calcium sulphate in reactions that may be of use in flue-gas desulphurization. I. Oxidation of CaSO₃ or of CaS with O₂ or with SO₂ 585–602

D. C. Anderson & A. K. Galway
A kinetic and mechanistic investigation of the formation of calcium sulphate in reactions that may be of use in flue-gas desulphurization. II. Promotion of the CaSO₃+½O₂ reaction by alkali metal salts 603–620

D. Tripathi, F. Chen & F. R. Jones
The effect of matrix plasticity on the stress fields in a single filament composite and the value of interfacial shear strength obtained from the fragmentation test 621–653

B. F. Dyson, D. R. Hayhurst & J. Lin
The ridged uniaxial testpiece: creep and fracture predictions using large-displacement finite-element analyses 655–676

S. van Smoalen & K. D. M. Harris
Superspace group descriptions of the symmetries of incommensurate urea inclusion compounds 677–700
