Philosophical Transactions: Mathematical, Physical and Engineering Sciences
Series A  Volume 354  Number 1714  15 August 1996

A. Kelly
The 1995 Bakerian Lecture. Composite materials

N. Pan & R. Postle
The tensile strength of hybrid fibre composites: a probabilistic analysis of the hybrid effects

J. H. Rieger
On the complexity and computation of view graphs of piecewise smooth algebraic surfaces

G. Temple
Fundamental mathematical theories
CONTENTS

Radar backscatter and surface roughness measurements for stationary breaking waves

C. D. ANDERSON & J.-M. VANDEN-BROECK
Bow flows with surface tension

V. V. MELESHKO
Steady Stokes flow in a rectangular cavity

N. NIKIFORAKIS & J. F. CLARKE
Quasi-steady structures in the two-dimensional initiation of detonations

P. W. FOWLER & T. TARNAI
Transition from spherical circle packing to covering: geometrical analogues of chemical isomerization

J. J. HEALEY
Location of 2:1 resonances in complex dispersion relationships

P. V. COVENEY & J. A. D. WATTIS
Analysis of a generalized Becker–Döring model of self-reproducing micelles

V. GOLDShteIN, A. ZINOVIEV, V. SOBOLEV & E. ShCHEPAKINA
Criterion for thermal explosion with reactant consumption in a dusty gas

W. R. BOWEN & A. O. SHARIF
The hydrodynamic and electrostatic interactions on the approach and entry of a charged spherical particle to a charged cylindrical pore in a charged planar surface with implications for membrane separation processes

K. A. Q. O’REILLY & B. CANTOR
Cyclic differential scanning calorimetry and the melting and solidification of pure metals
