M. V. Berry, Editor, IFW, Villefranche-sur-Mer
S. J. Bell, Publisher, Academic Press, New York
C. G. Bars, Department of Bioengineering, Imperial College
C. A. Billi, The Royal Institution of Great Britain, London
A. G. Constantinescu, Department of Electrical and Electronic Engineering, Imperial College
W. Craig, Department of Mathematics and Statistics, McMaster University
P. J. Davis, Division of Applied Mathematics, Brown University
S. H. Davis, Department of Engineering Sciences and Applied Mathematics, Northwestern University
R. J. Dorey, Department of Physics, University of Oregon
A. J. Dobson, Department of Applied Mathematics and Theoretical Physics, University of Cambridge
L. E. Freund, Division of Engineering, Brown University
L. P. Hughson, Department of Mathematics, King's College London
V. S. Inman, Department of Statistical Science, University College London
R. J. Jerrard, Seminar for Angewandte Mathematik, ETH-Zürich
J. T. Jenkins, Theoretical and Applied Mechanics, Cornell University
C. Jordan, Department of Physics, University of Oxford
J. T. C. Lua, Division of Engineering, Brown University
R. C. McPhedran, Department of Theoretical Physics, University of Sydney
L. Mohlabane, Division of Engineering and Applied Sciences, Harvard University
N. S. Mantin, Department of Applied Mathematics and Theoretical Physics, University of Cambridge
P. A. Martin, Department of Computer Science, Colorado School of Mines
H. K. Moffatt, Department of Applied Mathematics and Theoretical Physics, University of Cambridge
T. Muller, Department of Physics and Astronomy, University of Manchester
A. N. Norris, Department of Mechanical and Aerospace Engineering, Rutgers University
H. Oskendon, OCM, Mathematical Institute, University of Oxford
D. G. Pettit, Department of Materials, University of Oxford
D. Phillips, Department of Chemistry, Imperial College
S. Sancar, Department of Physics, King's College London
J. Shemnadhan, Department of Mathematical Sciences, University of Bath
J. Stark, Department of Mathematics, Imperial College
J. M. Thomas, Department of Materials Science, University of Cambridge
L. N. Trefethen, Computing Laboratory, University of Oxford
B. Roberts, Department of Theoretical Physics, University of Cambridge
M. V. Berry, Editor, IFW, Villefranche-sur-Mer

Papers of a Discussion Meeting Issue organized by
Robert Erdélyi, Bernard Roberts, Mike Thompson and Michael Ruderman.

MHD waves and oscillations in the solar plasma

Papers of a Discussion Meeting Issue organized by
Robert Erdélyi, Bernard Roberts, Mike Thompson and Michael Ruderman.

Introduction
R. Erdélyi
Magnetohelioseismology
M. J. Thompson
Observational aspects of sunspot oscillations
J. S. Broomfield, D. J. Southworth
Dispersion relations, rays and ray splitting in magnetohelioseismology
P. S. Cally
Magnetic coupling of waves and oscillations in the lower solar atmosphere: can the tail wag the dog?
R. Erdélyi
The nature of mass and lower atmospheric oscillations
J. De Pontieu & R. Erdélyi
Numerical modelling of MHD waves in the solar corona
M. Cattaneo & T. J. Stein
Recent progress in prominence seismology
J. L. Ballerini
Coronal magnetohydrodynamics waves and oscillations: observations and prospects
M. J. Thompson
Damping of magnetohydrodynamic waves by resonant absorption in the solar atmosphere
M. Gisler, J. Anders & L. Amari

The Royal Society is an independent academy promoting the natural and applied sciences. Founded in 1660, the Society has three roles, as the UK academy of science, as a learned Society, and as a funding agency. It responds to individual demand with selection by merit, not by field. The Society’s objectives are to:

• attract and retain the best scientists
• strengthen UK science by providing support to outstanding individuals
• fund excellent research to push back the frontiers of knowledge
• attract and retain the best scientists
• ensure the UK engages with the best science around the world
• support science communication and education and communicate and encourage dialogues with the public
• provide the best independent advice nationally and internationally
• promote scholarship and encourage research into the history of science

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society’s Web site (www.royalsoc.ac.uk).

Research Support (UK grants and fellowships)
Research appointments: 2547
Research grants: 2539
Conference grants: 2540
Science Advice
General enquiries: 2583
Science Communication
General enquiries: 2572
International Exchanges (for grants enabling research visits between the UK and most other countries (except the USA))
General enquiries: 2550
Library and Information Services
Library/archive enquiries: 2600
