Intermittent transformation between radial breathing and flexural vibration modes in a single-walled carbon nanotube 1941
Q. M. Li & M. X. Shi

Further investigation of crystal hardening inequalities in (110) channel die compression 1955
K. S. Havner

Existence of solutions to the convection problem in a pseudomeasure-type space 1983
L. C. F. Ferreira & E. J. Villamizar Roa

On the thermodynamics of degradation 2001
M. D. Bryant, M. M. Khonsari & F. F. Ling

Velocity profile in the Knudsen layer according to the Boltzmann equation 2015
C. R. Lilley & J. E. Sader

Waves in lattices with imperfect junctions and localized defect modes 2037
V. V. Zalipaev, A. B. Movchan & I. S. Jones

Classical two-phase Stefan problem for spheres 2055
S. W. McCue, B. Wu & J. M. Hill

Electromagnetic fields in the presence of an infinite metamaterial wedge 2077
M. A. Salem & A. H. Kamel

Uniform asymptotics of the Pollaczek polynomials via the Riemann–Hilbert approach 2091
J.-R. Zhou & Y.-Q. Zhao

Event-driven feedback tracking and control of tapping-mode atomic force microscopy 2113
S. Mitra, H. Dankowicz & M. R. Paul

Harmonic cosmology: how much can we know about a universe before the big bang? 2135
M. Bojowald

Stochastic networks: from theory to practice
Papers of a Special Feature organized and edited by Erol Gelenbe 2151

Introduction. Stochastic networks: from theory to practice 2151
E. Gelenbe

Intelligibility and first passage times in complex urban networks 2153
P. Blanchard & D. Volchenkov

Oscillations in self-aware networks 2169
M. Geijtenbeek

Scaling laws for delay-sensitive traffic in Rayleigh fading networks 2187
N. Karamchandani & M. Franceschetti

Emergence of network structure in models of collective evolution and evolutionary dynamics 2207
H. J. Jensen

Network of interacting synthetic molecules in steady state 2219
E. Gelenbe
