Editorial
Editorial 1
M. Berry

Review articles
Nanostructured bainite 3
H. K. D. H. Bhadeshia
Thin films for solar control applications 19
S. S. Kanu & R. Binions

Research articles
Constructing tensegrity structures from one-bar elementary cells 45
Y. Li, X.-Q. Feng, Y.-P. Cao & H. Gao
Mobility of ‘N-loops’: bodies cyclically connected by intersecting revolute hinges 63
S. D. Guest & P. W. Fowler
Bragg scattering and wave-power extraction by an array of small buoys 79
X. Garnaud & C. C. Mei
The transient swimming of a waving sheet 107
O. S. Pak & E. Lauga
Sharp global nonlinear stability for a fluid overlying a highly porous material 127
A. A. Hill & M. Carr
A generalized theory of viscous and inviscid flutter 141
S. Mandre & I. Mahadevan
The application of enzyme reaction, nonlinear diffusion models to the malting process 157
N. Fowkes & R. O’Brien
Morphological instability of a non-equilibrium ice-colloid interface 177
S. S. L. Peppin, A. Majumdar & J. S. Wettlaufer
Hyper-Kähler geometry and semi-geostrophic theory 195
S. Delahaies & I. Roussarie
Steady electrical and micro-rheological response functions for uncharged colloidal inclusions in polyelectrolyte hydrogels 213
A. Mohammad & R. J. Hill
Travelling waves of a diffusive Kermack–McKendrick epidemic model with non-local delayed transmission 237
Z.-C. Wang & J. Wu
A wavelet-based model of one-dimensional periodic structure for wave-propagation analysis 263
P. Sonekar & M. Mitra
Nonlinear secondary whirl of an overhung rotor 283
K. Nandakumar & A. Chatterjee
