No. 1 8 January 2010

Editorial
Editorial
By M. Berry 1

2010 Anniversary Series
Nanostructured bainite
By H. K. D. H. Bhadeshia 3

Review articles
Thin films for solar control applications
By S. S. Kanu & R. Binions 19

Research articles
Constructing tensegrity structures from one-bar elementary cells
By Y. Li, X.-Q. Feng, Y.-P. Cao & H. Gao 45
Mobility of ‘N-loops’: bodies cyclically connected by intersecting revolute hinges
By S. D. Guest & P. W. Fowler 63
Bragg scattering and wave-power extraction by an array of small buoys
By X. Garnaud & C. C. Mei 79
The transient swimming of a waving sheet
By O. S. Pak & E. Lauga 107
Sharp global nonlinear stability for a fluid overlying a highly porous material
By A. A. Hill & M. Carr 127
A generalized theory of viscous and inviscid flutter
By S. Mandre & L. Mahadevan 141
The application of enzyme reaction, nonlinear diffusion models to the malting process
By N. Fowkes & R. O’Brien 157
Morphological instability of a non-equilibrium ice–colloid interface
By S. S. L. Peppin, A. Majumdar & J. S. Wettlaufer 177
Hyper-Kähler geometry and semi-geostrophic theory
By S. Delahaies & I. Roulstone 195
Steady electrical and micro-rheological response functions for uncharged colloidal inclusions in polyelectrolyte hydrogels
By A. Mohammadi & R. J. Hill 213
Travelling waves of a diffusive Kermack–McKendrick epidemic model with non-local delayed transmission
By Z.-C. Wang & J. Wu 237
A wavelet-based model of one-dimensional periodic structure for wave-propagation analysis
By P. Sonekar & M. Mitra 263
Nonlinear secondary whirl of an overhung rotor
By K. Nandakumar & A. Chatterjee 283
Contents

No. 2  8 February 2010

2010 Anniversary Series
Solar change and climate: an update in the light of the current exceptional solar minimum
By M. Lockwood 303

Review articles
On the Lagrangian optimization of wall-injected flows: from the Hart–McClure potential to the Taylor–Culick rotational motion
By T. Saad & J. Majdalani 331

Research articles
Temperature-dependent shear flow and the absence of thermal runaway in valley glaciers
By A. C. Fowler, R. Toja & C. Vázquez 363
An analytical model for dispersion of pollutants from a continuous source in the atmospheric boundary layer
By P. Kumar & M. Sharan 383
On the critical equilibrium of the spiral spring pendulum
By P. Coullet, J.-M. Gilli & G. Rousseaux 407
On the thermodynamic entropy of fatigue fracture
By M. Naderi, M. Amiri & M. M. Khonsari 423
Strong ellipticity and progressive waves in elastic materials with voids
By S. Chirîţă & I.-D. Ghiba 439
A progressive simultaneous iteration solution for dynamic element vibration analysis
By K. K. Gupta & C. L. Lawson 459
The finite-product method in the theory of waves and stability
By C. J. Chapman & S. V. Sorokin 471
On the bounding of limit multipliers for combined loading
By M. Fraldi, L. Nunziante, A. Gesualdo & F. Guarracino 493
Three-dimensional Green’s function and its derivative for materials with general anisotropic magneto-electro-elastic coupling
By F. C. Buroni & A. Sáez 515
A non-structured subwavelength near-field microwave lens
By C. Monzon 539
Steady axisymmetric motion of a small bubble in a tube with flowing liquid
By J. Q. Feng 549
Beyond fractional derivatives: local approximation of other convolution integrals
By S. J. Singh & A. Chatterjee 563
Self-consistent mean-field magnetohydrodynamics
By A. Courvoisier, D. W. Hughes & M. R. E. Proctor 583
Fractals in elastic-hardening plastic materials
By J. Li & M. Ostoja-Starzewski 603

No. 3  8 March 2010

2010 Anniversary Series
Cosmic strings and superstrings
By E. J. Copeland & T. W. B. Kibble 623

Contents

Review articles
Geological pattern formation by growth and dissolution in aqueous systems
  By P. Meakin & B. Jamtveit 659

Research articles
The effect of crystal orientation on the indentation response of commercially pure titanium: experiments and simulations
  By T. B. Britton, H. Liang, F. P. E. Dunne & A. J. Wilkinson 695
High-temperature growth of anatase on kaolinite substrate
  By M. Rieder, M. Klementová & L. Szatmáry 721
A theoretical model of the explosive fragmentation of vesicular magma
  By A. C. Fowler, B. Scheu, W. T. Lee & M. J. McGuinness 731
Evolving graphs: dynamical models, inverse problems and propagation
  By P. Grindrod & D. J. Higham 753
On the Poincaré–Hill cycle map of rotational random walk: locating the stochastic limit in a reversible Schnakenberg model
  By M. Vellela & H. Qian 771
Measurement of the mechanical properties of granular packs by wavelength-scanning interferometry
  By Y. Zhou, R. D. Wildman & J. M. Huntley 789
Matchgate and space-bounded quantum computations are equivalent
  By R. Jozsa, B. Kraus, A. Miyake & J. Watrous 809
A constrained eigenvalue problem and nodal and modal control of vibrating systems
  By Y. M. Ram 831
Interfacial cracking in a graded coating/substrate system loaded by a frictional sliding flat punch
  By H. J. Choi & G. H. Paulino 853
A glance beyond the quantum model
  By M. Navascués & H. Wunderlich 881
Enumerating periodic patterns of synchrony via finite bidirectional networks
  By A. P. S. Dias & E. M. Pinho 891
A generalized Coleman–Noll procedure for the exploitation of the entropy principle
  By V. A. Cimmelli, A. Sellitto & V. Triani 911

No. 4 8 April 2010

2010 Anniversary Series
Heterofunctionalization catalysis with organometallic complexes of calcium, strontium and barium
  By A. G. M. Barrett, M. R. Crimmin, M. S. Hill & P. A. Procopiou 927

Research articles
Sustained oscillations in an evolutionary epidemiological model of influenza A drift
  By P. Magal & S. Ruan 965
Influence of feedback on the stochastic evolution of simple climate systems
  By L. Mahadevan & J. M. Deutch 993

## Contents

Linear stability of a solid–vapour interface  
By R. W. Style & M. G. Worster 1005

Boundary integral equations for general laminated plates with coupled stretching–bending deformation  
By C. Hwu 1027

The longitudinal static stability of an aerodynamically alleviated marine vehicle, a mathematical model  
By M. Collu, M. H. Patel & F. Trarieux 1055

The transient coupled thermo-piezoelectric response of a functionally graded piezoelectric hollow cylinder to dynamic loadings  
By M. H. Babaei & Z. T. Chen 1077

An eigenstrain-based model for residual stress arising from transient local surface heating  
By J. M. Bromley, A. Saimoto, H. Alizadeh, D. J. Smith & C. E. Truman 1093

Freezing of a supercooled spherical droplet with mixed boundary conditions  
By S. Tabakova, F. Feuillebois & S. Radev 1117

Fast-forward of adiabatic dynamics in quantum mechanics  
By S. Masuda & K. Nakamura 1135

Particle absorption by black holes and the generalized second law of thermodynamics  
By S. Funkhouser 1155

On the global stability of two-dimensional, incompressible, elastic bars in uniaxial extension  
By J. Sivaloganathan & S. J. Spector 1167

Desargues maps and the Hirota–Miwa equation  
By A. Doliwa 1177

The rheology of suspensions of solid particles  
By S. Mueller, E. W. Llewellyn & H. M. Mader 1201

Rupture of thin films formed during droplet impact  
By R. Dhiman & S. Chandra 1229

---

### 2010 Anniversary Series

**No. 5  8 May 2010**

Strong correlations in quantum vortex nucleation of ultracold atomic gases  
By A. Nunnenkamp, A. M. Rey & K. Burnett 1247

**Research articles**

A model of carbon dioxide dissolution and mineral carbonation kinetics  
By M. J. Mitchell, O. E. Jensen, K. A. Cliffe & M. M. Maroto-Valer 1265

Multivariate empirical mode decomposition  
By N. Rehman & D. P. Mandic 1291

Mode-mixity-dependent adhesive contact of a sphere on a plane surface  
By J. F. Waters & P. R. Guduru 1303

Evolutionary games on graphs and the speed of the evolutionary process  
By M. Broom, C. Hadjichrysanthou & J. Rychtář 1327

Could light harvesting complexes exhibit non-classical effects at room temperature?  
By M. M. Wilde, J. M. McCracken & A. Mizel 1347

### Contents

Qualitative criterion for interception in a pursuit/evasion game  
By J. A. Morgan  1365

Variational multi-fluid dynamics and causal heat conductivity  
By N. Andersson & G. L. Comer  1373

Bipenalty method for time domain computational dynamics  
By H. Askes, M. Caramés-Saddler & A. Rodríguez-Ferran  1389

Meixner polynomials of the second kind and quantum algebras representing su(1,1)  
By G. Hetyei  1409

Dynamics of the Jacobian matrices arising in three-dimensional Euler equations: application of Riccati theory  
By K. Ohkitani  1429

**Special feature**

Unique structure and property of dendrimers in biomedical applications  
By M. Chai  1441

The 8 year thicket of triazine dendrimers: strategies, targets and applications  
By E. E. Simanek, H. Abdou, S. Lalwani, J. Lim, M. Mintzer, V. J. Venditto & B. Vittur  1445

Amplification of local chirality within a folded dendrimer. An intramolecular ‘sergeants and soldiers’ experiment  
By A. L. Hofacker & J. R. Parquette  1469

Poly(amidoamine) dendrimer-supported organoplatinum antitumour agents  
By B. A. Howell & D. Fan  1515

Haemolytic activity of polyamidoamine dendrimers and the protective role of human serum albumin  
By B. Klajnert, S. Pikala & M. Bryszewska  1527

Pre-clinical and behavioural toxicity profile of PAMAM dendrimers in mice  
By A. S. Chauhan, N. K. Jain & P. V. Diwan  1535

---

**2010 Anniversary Series**

Constitutive modelling of arteries  
By G. A. Holzapfel & R. W. Ogden  1551

**Research articles**

Stability of ice-sheet grounding lines  
By R. F. Katz & M. G. Worster  1597

Numerical simulation of two-dimensional and three-dimensional axisymmetric advection–diffusion systems with complex geometries using finite-volume methods  
By J. M. A. Ashbourn, L. Geris, A. Gerisch & C. J. S. Young  1621

On some remarkable properties of an extended thermodynamic model for dense gases and macromolecular fluids  
By M. C. Carrisi, M. A. Mele & S. Pennisi  1645

Multiple solutions for a class of $p(x)$-Laplacian equations in $\mathbb{R}^N$ involving the critical exponent  
By Y. Fu & X. Zhang  1667

*Proc. R. Soc. A (2010)*
Spectral gradient flow and equilibrium configurations of point vortices

By A. Barreiro, J. Bronski & P. K. Newton 1687

Sensitivity of the macroscopic response of elastic microstructures to the insertion of inclusions

By S. M. Giusti, A. A. Novotny & E. A. de Souza Neto 1703

Modelling bacterial behaviour close to a no-slip plane boundary: the influence of bacterial geometry

By H. Shum, E. A. Gaffney & D. J. Smith 1725

Latitudinal point vortex rings on the spheroid

By S.-C. Kim 1749

Stability of fronts and transient behaviour in KPP systems

By A. Ghazaryan, P. Gordon & A. Virodov 1769

Elastic wave dispersion in microstructured membranes

By M. Lombardo & H. Askes 1789

On second-order differential equations with highly oscillatory forcing terms

By M. Condon, A. Deaño & A. Iserles 1809

Acoustic energy radiated by nonlinear spherical oscillations of strongly driven bubbles

By J. Holzfuss 1829

On the stability and control of unicycles

By R. S. Sharp 1849

No. 7 8 July 2010

Research articles

Chaos in body–vortex interactions

By J. Roenby & H. Aref 1871

A critique of some modern applications of the Carnot heat engine concept: the dissipative heat engine cannot exist

By A. M. Makarieva, V. G. Gorshkov, B.-L. Li & A. D. Nobre 1893

Noise-induced suppression of periodic travelling waves in oscillatory reaction–diffusion systems

By M. Sieber, H. Malchow & S. V. Petrovskii 1903

Spreading speeds and travelling waves for non-monotone time-delayed lattice equations

By J. Fang, J. Wei & X.-Q. Zhao 1919

On reconstruction of three-dimensional harmonic functions from discrete data

By A. N. Galybin & J. Irsä 1935

The Shannon entropy of Sudoku matrices

By P. K. Newton & S. A. DeSalvo 1957

Piezoelectric effect on the velocities of waves in an anisotropic piezo-poroelastic medium

By M. D. Sharma 1977

Sub-wavelength plasmonic crystals: dispersion relations and effective properties

By S. P. Fortes, R. P. Lipton & S. P. Shipman 1993

Green–Naghdi fluid with non-thermal equilibrium effects

By B. Straughan 2021

Spinning rough disc moving in a rarefied medium

By A. Plakhov, T. Tchemisova & P. Gouveia 2033

Dispersion of biased swimming micro-organisms in a fluid flowing through a tube
By M. A. Bees & O. A. Croze 2057

Reciprocal symmetry, unimodality and Khintchine’s theorem
By Y. P. Chaubey, G. S. Mudholkar & M. C. Jones 2079

Revisiting quantum notions of stress
By R. Maranganti & P. Sharma 2097

Electrical structures of interfaces: a Painlevé II model
By L. Bass, J. J. C. Nimmo, C. Rogers & W. K. Schief 2117

A sharp version of Ehrenfest’s theorem for general self-adjoint operators
By G. Friesecke & B. Schmidt 2137

A nonlinear equation for ionic diffusion in a strong binary electrolyte
By S. Ghosal & Z. Chen 2145

Modelling rigid origami with quaternions and dual quaternions
By W. Wu & Z. You 2155

No. 8 8 August 2010

Review articles
The fourth element: characteristics, modelling and electromagnetic theory of the
memristor
By O. Kavehei, A. Iqbal, Y. S. Kim, K. Eshraghian, S. F. Al-Sarawi & D. Abbott 2175

Research articles
A new Legendre-type polynomial and its application to geostrophic flow in rotating
fluid spheres
By X. Liao & K. Zhang 2203

Simulation of water entry of a wedge through free fall in three degrees of freedom
By G. D. Xu, W. Y. Duan & G. X. Wu 2219

Omni-directional Rayleigh, Stoneley and Schölte waves with general time dependence
By A. P. Kiselev & D. F. Parker 2241

A new transform method I: domain-dependent fundamental solutions and
integral representations
By E. A. Spence & A. S. Fokas 2259

A new transform method II: the global relation and boundary-value problems in
polar coordinates
By E. A. Spence & A. S. Fokas 2283

On the inverse problem of calculus of variations for fourth-order equations
By M. C. Nucci & A. M. Arthurs 2309

Thermal vibration of carbon nanotubes predicted by beam models and molecular
dynamics
By L. Wang, H. Hu & W. Guo 2325

High-frequency homogenization for periodic media
By R. V. Craster, J. Kaplunov & A. V. Pichugin 2341

Stochastically forced water waves in a circular basin
By K. Onu & N. Sri Namachchivaya 2363

Convective magnetic fields in a dispersive half-space
By G. Barton 2383
Contents

Contagion in financial networks
By P. Gai & S. Kapadia 2401

Strain gradient solution for Eshelby’s ellipsoidal inclusion problem
By X.-L. Gao & H. M. Ma 2425

Fundamental properties of surface waves in lossless stratified structures
By G. Valerio, D. R. Jackson & A. Galli 2447

Darboux transformations for a twisted derivation and quasideterminant solutions to the super KdV equation
By C. X. Li & J. J. C. Nimmo 2471

No. 9 8 September 2010

2010 Anniversary Series
Micro-architected materials: past, present and future
By N. A. Fleck, V. S. Deshpande & M. F. Ashby 2495

Research articles
A probabilistic twin nucleation model for HCP polycrystalline metals
By I. J. Beyerlein & C. N. Tomé 2517

Pictish symbols revealed as a written language through application of Shannon entropy
By R. Lee, P. Jonathan & P. Ziman 2545

Coupled dynamics of populations supported by discrete sites and their continuum limit
By T. R. Field & R. J. A. Tough 2561

Regularity and singularity in solutions of the three-dimensional Navier–Stokes equations
By J. D. Gibbon 2587

Conservation laws of inviscid non-isentropic compressible fluid flow in \( n > 1 \) spatial dimensions
By S. C. Anco & A. Dar 2605

Periodic frameworks and flexibility
By C. S. Borcea & I. Streinu 2633

Anelasticity and grain boundary sliding
By L. C. Lee & S. J. S. Morris 2651

The instability theory of drumlin formation applied to Newtonian viscous ice of finite depth
By A. C. Fowler 2673

Nonlinear stability of the one-domain approach to modelling convection in superposed fluid and porous layers
By A. A. Hill & M. Carr 2695

Asymptotic study of imperfect interfaces in conduction through a granular composite material
By I. V. Andrianov, V. I. Bolshakov, V. V. Danishevs’kyi & D. Weichert 2707

Stokes flows past gaps in a wall
By D. Crowdy & O. Samson 2727

Period doubling and chaotic transient in a model of chain-branching combustion wave propagation
By V. Gubernov, A. Kolobov, A. Polezhaev, H. Sidhu & G. Mercer 2747

Contents

Exponential asymptotics and boundary-value problems: keeping both sides happy at all orders
By C. J. Howls 2771

Corrections
Two results on evolutionary processes on general non-directed graphs
By M. Broom, C. Hadjichrysanthou, J. Rychtár & B. T. Stadler 2795

No. 10 8 October 2010

2010 Anniversary Series
Detecting phase transitions in supercritical mixtures: an enabling tool for greener chemical reactions
By J. Ke, Y. Sánchez-Vicente, G. R. Akien, A. A. Novitskiy, G. Comak, V. N. Bagratashvili, M. W. George & M. Poliakoff 2799

Research articles
Surface permeability tests: experiments and modelling for estimating effective permeability
By A. P. S. Selvadurai & P. A. Selvadurai 2819
Radiation measurements with heat-proof polyethylene terephthalate bottles
By H. Nakamura, H. Kitamura & R. Hazama 2847
Laplacian image contrast in mirror electron microscopy
By S. M. Kennedy, C. X. Zheng, W. X. Tang, D. M. Paganin & D. E. Jesson 2857
Quasi-steady-state and steady-state models for heat and moisture transport in textile assemblies
By C. Ye, B. Li & W. Sun 2875
Impact of drops of surfactant solutions on small targets
By A. Rozhkov, B. Prunet-Foch & M. Vignes-Adler 2897
The geometric phase and the spin-statistics relation
By P. Bandyopadhyay 2917
The coarse-grid problem in ecological monitoring
By N. B. Petrovskaya & S. V. Petrovskii 2933
Map dynamics versus dynamics of associated delay reaction–diffusion equations with a Neumann condition
By T. Yi & X. Zou 2955
Curvature in nematic elastica responding to light and heat
By M. Warner, C. D. Modes & D. Corbett 2975
Double-bracket dissipation in kinetic theory for particles with anisotropic interactions
By D. D. Holm, V. Putkaradze & C. Tronci 2991
Minimum variational principles for time-harmonic waves in a dissipative medium and associated variational principles of Hashin–Shtrikman type
By G. W. Milton & J. R. Willis 3013
An alternative approach on the existence of affine realizations for HJM term structure models
By S. Tappe 3033

A general approach to isothermal hyperelastic modelling of saturated porous media at finite strains with compressible solid constituents
By A. Gajo 3061

Does gravity operate between galaxies? Observational evidence re-examined
By F. J. M. Farley 3089

A long-wave model for the surface elastic wave in a coated half-space
By H.-H. Dai, J. Kaplunov & D. A. Prikazchikov 3097

No. 11 8 November 2010

Research articles
The split ring resonator
By S. G. Llewellyn Smith & A. M. J. Davis 3117

A continuum theory of surface growth
By N. Hodge & P. Papadopoulos 3135

Boundary layers of an anchored magnetic field in a highly conductive flow
By M. Núñez & A. Lastra 3153

A note on configurational anisotropy
By V. V. Slastikov 3167

The formation of subglacial streams and mega-scale glacial lineations
By A. C. Fowler 3181

Normal typicality and von Neumann’s quantum ergodic theorem
By S. Goldstein, J. L. Lebowitz, C. Mastrodonato, R. Tumulka & N. Zanghi 3203

Injection of solids to lift coastal areas
By L. N. Germanovich & L. C. Murdoch 3225

Memory effects for the heat conductivity of random suspensions of spheres
By A. Chowdhury & C. I. Christov 3253

Special feature
Geospace effects of high-speed solar wind streams
By S. K. Morley 3275

An investigation of the magnetosphere–ionosphere response to real and idealized co-rotating interaction region events through global magnetohydrodynamic simulations

CIR versus CME drivers of the ring current during intense magnetic storms
By M. W. Liemohn, M. Jazowski, J. U. Kozyra, N. Ganushkina, M. F. Thomsen & J. E. Borovsky 3305

Dropouts of the outer electron radiation belt in response to solar wind stream interfaces: global positioning system observations

High-speed stream driven inferences of global wave distributions at geosynchronous orbit: relevance to radiation-belt dynamics
By E. A. MacDonald, L. W. Blum, S. P. Gary, M. F. Thomsen & M. H. Denton 3351

Generation of magnetic and particle Pc5 pulsations during the recovery phase of strong magnetic storms
By V. Pilipenko, O. Kozyreva, V. Belakhovsky, M. J. Engebretson & S. Samsonov 3363
High-latitude ionospheric response to co-rotating interaction region- and coronal mass ejection-driven geomagnetic storms revealed by GPS tomography and ionosondes
By D. Pokhotelov, P. T. Jayachandran, C. N. Mitchell & M. H. Denton 3391

Short-term periodic features observed in the infrared cooling of the thermosphere and in solar and geomagnetic indexes from 2002 to 2009

2010 Anniversary Series
Macromolecular crystallography at synchrotron radiation sources: current status and future developments
By E. M. H. Duke & L. N. Johnson 3421

Research articles
Clutter suppression and classification using twin inverted pulse sonar (TWIPS)
By T. G. Leighton, D. C. Finfer, P. R. White, G.-H. Chua & J. K. Dix 3453

Reconstruction of potential energy profiles from multiple rupture time distributions
By P.-W. Fok & T. Chou 3479

Impingement of liquid jets at atmospheric and elevated pressures: an observational study using paired water jets or water and methylcyclohexane jets
By N. Yasuda, K. Yamamura & Y. H. Mori 3501

Natural catalytic activity in a marine shale for generating natural gas
By F. D. Mango, D. M. Jarvie & E. Herriman 3527

Infinite-dimensional numerical linear algebra: theory and applications
By A. C. Hansen 3539

Suppression of curvature in nematic elastica
By M. Warner, C. D. Modes & D. Corbett 3561

Time-domain approach to the forward scattering sum rule
By M. Gustafsson 3579

Asymptotic formulae for implied volatility in the Heston model
By M. Forde, A. Jacquier & A. Mijatović 3593

The square root depth wave equations
By C. J. Cotter, D. D. Holm & J. R. Percival 3621

Predicting the onset of high-frequency self-excited oscillations in elastic-walled tubes
By R. J. Whittaker, M. Heil, O. E. Jensen & S. L. Waters 3635

Neutral shells and their applications in the design of electromagnetic shields
By L. P. Liu 3659

On certain sums over the non-trivial zeta zeroes
By M. W. Coffey 3679

Hashin–Shtrikman bounds and their attainability for multi-phase composites
By L. P. Liu 3693

Towards a dynamical theory of observation
By G. Jaroszkiewicz 3715
