### Research articles

**Slowing the evolution of insecticide resistance in mosquitoes: a mathematical model**
S. A. Gourley, R. Liu & J. Wu

**Resonant oscillations of an inhomogeneous gas between concentric spheres**
B. R. Seymour, M. P. Mortell & D. E. Amundsen

**Relative equilibria of point vortices and the fundamental theorem of algebra**
H. Aref

**Criteria for convective versus absolute string instability in car-following models**
J. A. Ward & R. E. Wilson

**A mechanism for enhanced static sliding resistance owing to surface waviness**
J. T. Waters & P. R. Curduru

**Variational estimates for the effective response and field statistics in thermoelastic composites with intra-phase property fluctuations**
N. Lahellec, P. Ponte Castañeda & P. Suquet

**Resonant oscillations of an inhomogeneous gas between concentric spheres**
B. R. Seymour, M. P. Mortell & D. E. Amundsen

**Identifying the 'inorganic gene' for high-temperature piezoelectric perovskites through statistical learning**
P. V. Balachandran, S. R. Broderick & K. Rajan

**The effect of shear on acoustic cloaking**
J. D. Smith & P. E. Verrier

**Quantification of fibre polymerization through Fourier space image analysis**
A. Nekouzadeh & G. M. Genin

**The influence of disorder on deformations in semiflexible networks**
J. B. Blundell & E. M. Terentjev

**The time machine: a simulation approach for stochastic trees**
A. Jasra, M. De Iorio & M. Chadeau-Hyam

**The number and types of all possible rotational symmetries for flexoelectric tensors**
H. Le Quang & Q.-C. He

**Random search with k-prototypes algorithm for clustering mixed datasets**
D.-T. Pham, M. M. Suarez-Alvarez & Y. I. Prostov

**Canards and curvature: the 'smallness of ε' in slow–fast dynamics**
M. Desroches & M. R. Jeffrey

**A study on the principle of maximum dissipation for coupled and non-coupled non-isothermal processes in materials**
K. Hackl, F. D. Fischer & J. Svoboda

**On the two-dimensional sloshing problem**
V. Kozlov, N. Kuznetsov & O. Motygin
