Perspective

The First Stars: clues from quasar absorption systems
M. Pettini

Review articles

Maximum-principle-satisfying and positivity-preserving high-order schemes for conservation laws: survey and new developments
X. Zhang & C.-W. Shu

Research articles

Cloud base height and cosmic rays
R. G. Harrison, M. H. P. Ambaum & M. Lockwood

The modified Sutherland–Einstein relation for diffusive non-equilibria
M. Baiesi, C. Maes & B. Wynants

Approximation of potential-driven flow dynamics in large-scale self-similar tree networks
J. Mayes & M. Sen

Gain from the two-envelope problem via information asymmetry: on the suboptimality of randomized switching

Elastohydrodynamics induced by a rapidly moving microscopic body
R. J. Clarke & S. Potnis

Dispersion and localization of elastic waves in materials with microstructure
D. J. Colquitt, I. S. Jones, N. V. Movchan & A. B. Movchan

Stress and couple-stress invariance in non-centrosymmetric micropolar planar elasticity
H. Jismaa & M. Ostoja-Starzewski

Chaitin’s halting probability and the compression of strings using oracles
G. Barmpalias & A. E. M. Lewis

Transmission coefficients for the exact triangular barrier: an exact general analytical theory that can replace Fowler & Nordheim’s 1928 theory
R. G. Forbes & J. H. B. Deane

Diffusion-controlled growth of pearlite in ternary steels
A. S. Pandit & H. K. D. H. Bhadeshia

Propagation of elastic waves through a lattice of cylindrical cavities
S. Guo & P. McIver

A numerical implementation of Fokas boundary integral approach: Laplace’s equation on a polygonal domain
B. Fornberg & N. Flyer

Did the Draupner wave occur in a crossing sea?
T. A. A. Adcock, P. H. Taylor, S. Yan, Q. W. Ma & P. A. E. M. Janssen

Revealing competitive behaviours in music by means of the multifractal detrended fluctuation analysis: application to Bach’s Sinfonias
L. Telesca & M. Lovallo

Corrections

A multiplicity result for a nonlinear degenerate problem arising in the theory of electrorheological fluids
M. Mihăilescu & V. Radulescu

Supporting electrolyte asymptotics and the electrochemical pickling of steel
M. Vynnycky
