Research articles

Anisotropic surface effects on the formation of chiral morphologies of nanomaterials 609

Seasonal migration dynamics: periodicity, transition delay and finite-dimensional reduction 634
X.-S. Wang & J. Wu

Simulation of shock wave diffraction by a square cylinder in gases of arbitrary statistics using a semiclassical Boltzmann-Bhatnagar-Gross-Krook equation solver 651
B. P. Muljadi & J.-Y. Yang

A depolarizer as a possible precise sunstone for Viking navigation by polarized skylight 671
G. Ropars, G. Gorre, A. Le Floch, J. Enoch & V. Lakshminarayanan

Unitary transformations depending on a small parameter 685
F. Casat, J. A. Olso & J. Ros

Thermodynamic phase transitions and shock singularities 701
G. De Nittis & A. Moro

The aerodynamics of jumping rope 720
J. M. Aristoff & H. A. Stone

Three-dimensional acoustic scattering by layered media: a novel surface formulation with operator expansions implementation 731
D. P. Nicholls

A computable evolution equation for the joint response-excitation probability density function of stochastic dynamical systems 759
D. Venturi, T. P. Sapsis, H. Cho & C. E. Kamnadiako

Recovery of inclusion separations in strongly heterogeneous composites from effective property measurements 784
C. Orum, E. Cherkaev & K. M. Golden

On the auxetic properties of generic rotating rigid triangles 810
J. N. Grima, E. Chetcuti, E. Manicaro, D. Attard, M. Camilleri, R. Gatt & K. E. Evans

CONCORD: a consensus method for protein secondary structure prediction via mixed integer linear optimization 831
Y. Wei, J. Thompson & C. A. Floudas

A computational study of the molecular and crystal structure and selected physical properties of octahydridosilasequioxane, (Si₂O₃H₂)₄. II. Vibrational analysis 851
C. J. H. Schutte & J. A. Pretorius

A family of mixed double-Goldberg 6R linkages 871
C. Y. Song & Y. Chen

Art and science in the design of physically large and complex systems 891
D. J. Andrews
