Research articles

Upper and lower limits on the stability of calving glaciers from the yield strength envelope of ice 913
J. N. Bassis & C. C. Walker

Folding wrinkles of a thin stiff layer on a soft substrate 932
J.-Y. Sun, S. Xia, M.-W. Moon, K. H. Oh & K.-S. Kim

Neutral coated inclusions of finite conductivity 954
P. Jarczyk & V. Mityushev

Graph theory and the Jahn–Teller theorem 971
A. Ceulemans, E. Lijnen, P. W. Fowler, R. B. Mallon & T. Pisanski

Time scales for dynamical relaxation to the Born rule 990
M. D. Towler, N. J. Russell & A. Valentini

Electromechanical phase transition in dielectric elastomers 1014
R. Huang & Z. Suo

The thickness of the falling film of liquid around a Taylor bubble 1041
E. W. Llewellin, E. Del Bello, J. Taddeucci, P. Scarlato & S. J. Lane

Particle-wave duality: a dichotomy between symmetry and asymmetry 1065
J. A. Vaccaro

Broken baby Skyrmions 1085
J. Błędzki, M. Spieß & P. Sutcliffe

An Euler-type method for the strong approximation of the Cox–Ingerson–Ross process 1105
S. Dereich, A. Neuenkirch & L. Szpruch

Relaxation to quantum equilibrium for Dirac fermions in the de Broglie–Bohm pilot-wave theory 1116
S. Colin

Bounding the plastic strength of polycrystalline solids by linear-comparison homogenization methods 1136
M. I. Idiart

Lagrangian models of reactive transport in heterogeneous porous media with uncertain properties 1154
G. Severino, D. M. Tartakovsky, C. Srinivasan & H. Viswanathan

Force-enhancing vortex equilibria for two parallel plates in uniform flow 1175
T. Sakajo

Analytic theory of defects in periodically structured elastic plates 1196
C. G. Poulton, A. B. Movchan, N. V. Movchan & R. C. McPhedran
