Research articles

Cauchy integral formula for generalized analytic functions in hydrodynamics
M. Zabarankin

Stresslet asymptotics for a treadmilling swimmer near a two-dimensional corner: hydrodynamic bound states
A. M. J. Davis & D. G. Crowdy

Emergence of unsteady dark solitary waves from coalescing spatially periodic patterns
J. Bridges

Triply resonant penetrative convection
B. Straughan

A visco-elasticity theory for polymeric gels
S. Wang & W. Hwang

Mathematical modelling of elastoplasticity at high stress
T. D. Howell, H. Ockendon & J. R. Ockendon

A paradox of state-dependent diffusion and how to resolve it
P. Tupper & A. Tung

Mathematical theory and analytical solutions for the wave catching-up phenomena in a nonlinearly elastic composite bar
S. J. Huang, R.-H. Dai, Z. Chen & D.-X. Xing

Weyl geometry and the nonlinear mechanics of distributed point defects
A. Yavari & A. Goriely

Existence of multiple vortices in supersymmetric gauge field theory
S. Chen & Y. Yang

Jet noise: sound generation by disc and cylinder sources
M. J. Carley & P. A. Martin

Ascending rockets as macroscopic self-propelled Brownian oscillators
N. Srivastava, P. T. Tkacik & R. C. Gaunt

Transition curves in a parametrically excited pendulum with a force of elliptic type
J. M. Sah & B. Mann

The asymptotic theory of dispersion relations containing Bessel functions of imaginary order
C. S. Chapman

The spectrum of filament entanglement complexity and an entanglement phase transition
C. Buck & A. Simon

Transversely isotropic cyclic stress-softening model for the Mullins effect
S. K. Rokazy & M. A. C. Soudar

Information-theoretic lower bound on energy cost of stochastic computation
K. Weeber, M. Cafl, E. Beker & V. Vedral

Flow of a liquid layer over heated topography
M. G. Blyth & A. P. Bandon

Three-dimensional thermal analysis of wirelessly powered light-emitting systems

Features for damage detection with invariance to environmental and operational variations
E. J. Crisci, G. Mason, R. Wolfson & S. G. Peric

The buckling of capillaries in solid tumours

Non-standard stochastic averaging of large-amplitude ship rolling in random seas
L. Dostal, E. Kreuzer & N. S. Namachchivaya

Einstein’s special relativity beyond the speed of light

Stochastic dynamics of snow avalanche occurrence by superposition of Poisson processes
P. Pantiez, E. Daly, B. Creasy & A. Popovic

Volume title page and table of contents
