Supplementary Material (ESM). Contents of the ESM might include details of methods, derivations of equations, large tables of data and computer programs. However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication
Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Proc. R. Soc. A employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor has final authority in all matters relating to publication.

Electronic Submission details
The Royal Society’s electronic submission and peer-review service provides Proc. R. Soc. A authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. A website, www.rspa.royalsociety.org for further details.

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of scientific progress. We support many young scientists, engineers and technologists; influence science policy; debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from over 1400 Fellows and Foreign Associates.

Our mission is to expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society’s strategic priorities are to:

• invest in future scientific leaders and in innovation,
• influence policymaking with the best scientific advice,
• promote science and mathematics education, increase access to the best science internationally, and
• inspire an interest in the joy, wonder and excitement of scientific discovery.

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling 44 (0)20 7839 5546, or visit the Society’s Web site (royalsociety.org).
