

# PROCEEDINGS OF THE ROYAL SOCIETY A

*Proc. R. Soc. A* publishes articles across the chemical, computational, Earth, engineering, mathematical and physical sciences. The journal publishes research papers, as well as short reviews containing original and interesting new ideas. The articles published are high-quality, original, fundamental articles of interest to a wide range of scientists, and often have long citation half-lives. As well as established disciplines, we encourage emerging and interdisciplinary areas.
